Reading Comprehension

- **Read the following passage carefully, then answer the questions below:**

The Koala bear is one the cutest animal in the world . It has a small body , grey coloured fur , and a white belly . It doesn't have a tail . What's funny about the Koala bear is that **it** is not a bear at all .

Koalas are actually like Kangaroos , a type of animals that have pockets where they keep their young in . A newborn Koala is called a joey and when it is born , it doesn't look like the grown –up Koala we know . It is born blind and without ears or fur.

Soon after its birth , the Joey goes in to the mother's pocket , and continues to grow it.s eyes , legs and fur for six months . The young Koala then leaves the pocket and mostly stays on the mother's back to grow for six more months . It stays there until it is ready to climb up the trees , sleep on the branches and eat on its own

Koalas spend most of their lives in trees called " gum trees " and only go to the ground if necessary . Living in these trees helps them to reach their food easily and stay away from wild animals that might attack. Although gum leaves are **poisonous** to other animals , they are the only food for Koalas eat . The Koala's stomach has special bacteria that can take energy and water from the leaves . When they are not climbing trees , Koalas sleep up to 20 hours a day . A grown up Koala can grow to be around 15 to 20 years old.
