Reading Comprehension

-Read the following passage carefully, then answer the questions below:

In the winter, many animals and birds travel hundreds of kilometers to places with a warmer climate and more food. This incredible journey takes place every year at about the same time in winter. It is common to see birds sitting on walls or telephone wires having the rest before they complete the long journey between the places where they spend summer and winter.

Scientists do not know exactly how the birds find their way to and from their winter homes. It is thought that there are different ways, for example, using the sun and the stars for navigation. Some people believe that they depend on their senses, including their sense of smell to help them find the way. Some animals and birds travel thousands of kilometers. The blue whales, for example, have been known to travel up to 20.000 kilometers.

Summer is a very difficult period for birds in Kuwait because it is very hot and humid. Many birds seek a refuge where there is water, food, and shelter. So, the best places to see birds during this time is where they may be nesting, near water. Despite the small size of the State of Kuwait, there are many places to find interesting places for birds. Sometimes even parks and gardens can attract groups of birds.

A) Choose the correct answer from a, b, c and d: (6×2= 12 Marks)

1. The best title of the passage is:

a- Birds and Animals Migration

a- winter homes b- the birds

c- different people d- the stars

3. The underlined word "refuge" in the 3rd paragraph means:

a- deep water b- safe place

c- short way d- tropical forest

4. The writer of the passage wants to:

a- invite people to build more nests for birds

b- give a brief idea about the weather of Kuwait in summer

c- tell us how the blue whales can travel for a long distance

d- show why birds and animals travel from one place to another

5. Many birds travel hundreds of kilometers to:

a- find more warmth, food, and drink

b- use their sense of smell

c- join the blue whales in their journey

d- meet more groups of birds

6. Birds sit on walls and telephone wires when they:

a- meet each other

b- start to build nests

c- see the sun

d- feel tired

B) Answer the following questions: (2×2= 4 Marks)

7. How do birds find their way when they travel for a long distance?

……

Reading Comprehension

Reading comprehension Read the following passage, then answer the questions below:

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again.

Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass, and plastic can be recycled. It also **reduces** pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done repeatedly. Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

A) Choose the correct answer from a, b, c or d:

1) What is the main idea of paragraph (4)?

a) What recycling is. b) How to save the future.

c) Why plastic is important. d) How to recycle different things.

2) What is the meaning of the underlined word "reduces" in paragraph (2)?

a) lowers b) helps c) uses d) improves

3) What does the underlined word "it" in paragraph (3) refer to?

a) fuel b) time c) energy d) recycling

4) Plastic is called the wood of the future because:

a) it's a natural material. b) it helps save money.

c) it is strong and beautiful. d) it can be used to make furniture.

5) According to the text, one of the following statements is <u>NOT TRUE:</u>

a) All trash and waste can be recycled.

b) Harsh weather doesn't affect plastic.

c) It's difficult to find space for trash.

d) Glass and mental can be recycled many times

6) The purpose of the writer is to tell us that:

a) All materials on earth are useful.

b) Planting trees helps in recycling.

c) Recycling is a good way to use trash.

d) Steel and aluminum can be recycled easily.

<u>B) Answer the following questions:</u>

7)- What kind of materials can you find in your house that can be recycled?

……

……

8)- Why is recycling important to the environment?
