VI- **Reading Comprehension** (**80 Marks**)

Read the following passage carefully, and then answer the questions below:

Elizabeth sat quietly in her room, finding comfort there after **misleading** rumors had begun spreading about her at Seagrove Academy last week.

Elizabeth had never been very sociable; she was always more reserved. She preferred experiencing life through the stories of her braver friends: joining clubs, school events, and harmless jokes. Still, she had been spending more time alone than usual since the rumors started about her. A student had anonymously told the headmistress, Ms. Billings, that Elizabeth had cheated on several tests this year. This rumor was especially harmful because **she** had just been nominated for the highly valued Blauvelt Award, a scholarship for honesty and academic promise.

The accusations were ridiculous. Elizabeth had always been an excellent student at Seagrove. It was true that she wasn't naturally gifted. However, she made up for this by working hard and never giving up; she was very careful in her studies and showed strong determination.

Still, the accusations had given the recommendation committee pause. On Friday Elizabeth had been called to Ms. Billings's office, where she was asked about her recent exams scores. The experience was very stressful.

Seagrove was a top school; most of its students came from wealthy backgrounds. But this was not the case for Elizabeth. Her family had little money. She attended Seagrove on a full scholarship. The Blauvelt Award would help Elizabeth's family pay for her college.

Just like she worked hard on her studies, Elizabeth planned to find out who had accused her. She opened the school directory on her bed and started looking through the names

Seagrove was such a small and closed community. Only twenty-one kids would be in her graduating class. Elizabeth knew it was certain that the person spreading rumors about her would come to light. It was just a matter of time.

VII- Summary Making (60 Marks)

Read the following passage, then do as required:

Imagine a world without technology, smartphones, computers, or internet, this means we couldn't instantly connect with friends or access endless information at our fingertips. Communication would rely on letters, in-person conversations, or landline phones, making everything slower and more personal. Life without technology would be simpler, allowing people to focus more on face-to-face communication. However, daily tasks would also be harder—no GPS for directions, no online banking, and limited access to healthcare advancements. Without devices, people might spend more time outdoors, enjoying nature and physical activities. A world without screens would increase productivity as there would be fewer distractions. Without technology, people would likely develop new hobbies and skills that don't rely on digital tools.
