Read the following passage , then answer the questions :-

A farmer had three sons, and he had a farm. His sons didn't want to work on the farm. It was a very small one with three fields. "The farm is too small for us." They said to their father, "We want to go to the town to earn our living. If you divide it among us, there will not be enough land for each of us. "What can I do?" said their father. "Sell the farm and divide the money among us." said the sons. "No" said the father. "I will give the whole farm to the one who proves to be the best farmer."

Each son wanted the whole farm. Each one said to himself, "I must do better than my brothers. I must learn about growing rice." Secretly, each one bought books on farming and read them at night. At the end of the second year, the amount of rice growing in each field was doubled. "You have a lot of money from the extra rice." Said their father. “Creativity is a God’s gift to us.” Plan and write a report of TWO paragraphs (not less than 10 sentences) about creativity explaining **the importance of creativity** and **how can we be creative**.

Read the following passage and answer the questions below:-

From far out in space, Earth looks like a blue ball. Since water covers three-fourths of the Earth's surface, blue is the colour we see most. The continents look brown, like small islands floating in the huge, blue sea. White clouds wrap around the Earth like a light blanket. The Earth is shaped like a sphere, or a ball. It would take years to walk around the whole planet.

A spaceship can fly around the widest part of the sphere in only 90 minutes. Even though spaceships have travelled to the Moon, people cannot visit the Moon without special suits. The Moon has no air or water. Plants and animals can't live there either. Astronauts first landed on the Moon in 1969. After that, there were six more trips to the Moon. They brought back Moon rocks, which scientists are still studying.

The Sun is the closest star to Earth. A star is a hot ball of burning gas. The Sun looks very big. But the Sun is just a medium-sized star. The burning gases from the Sun are so hot that they warm the Earth. Even though the Sun is always glowing, the night here on Earth is dark. That's because the Earth turns around, every 24 hours. During the day, the Earth faces the Sun. Then we see light. During the night, the Earth turns away from the Sun. Then it faces the darkness of space. Each day we learn more about the Earth, the Moon, and the Sun.
