l-k-a-e-s

3. I like to see a when we go camping.

a-t-l-r-e-w-a-f-l

4. We can see an in the middle of the sea.

s-i-a-n-d-l

Week 1 (Our Beautiful Planet)

Grammar: (superlative adjectives)

Superlative Adjectives

We use **superlatives** to describe the most of something.

For example:

This is the **highest** mountain.

This is the **longest** river.

We make a superlative by adding **-est** to the adjective:

high + **est** = **highest**
long + **est** = **longest**

If an adjective ends with vowel-consonant, we double the final consonant.

big + **g** + **est** = **biggest**

-Write the correct form of superlative adjective:

Examples:

*The cheetah is **the fastest** animal. **(fast)**

1. Hani is the..... student in the class. **(smart)**

2. This is the..... restaurant in the city. **(good)**

3. Africa is the continent. **(big)**

4. Ameera is the because her birthday is today. **(happy)**

Week 2: *Exploring Space*

sun

planet

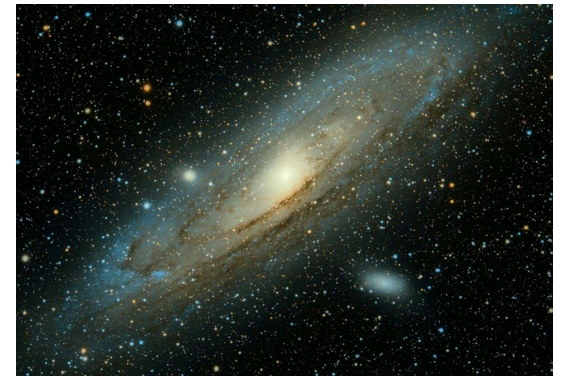

star

moon

HFW

very-have-
when-about

space

Week 2: Vocabulary

Read the following text and answer the questions:

Exploring Space

Exploring space is one of the greatest adventures in human history. Scientists can travel beyond the Earth and learn more about space than ever before.

Space exploration helps improve life on Earth. Many inventions we use today came from space technology, such as GPS, satellite communication, weather forecasting. The scientists use powerful telescope to study far galaxies and search for new planets. Exploring space also teaches us that the universe is vast and full of mysteries and it encourages students to study science and learn more.

1. Why do scientists use telescope?

a. To learn more about the universe

b. To play games

c. To sleep in the spaceship

2. How does space exploration inspire the students?

a. Be lazy

b. To love learning science

c. To stop learning

3. Who travels to space?

a. some people

b. doctors

c. astronauts

4. Which inventions came from space?

a. books

b. pencils

C. GPS

FILL THE BLANKS WITH THE CORRECT ANSWER

Example

A

There are a lot of **stars** in space.

stars

suns

rockets

B

Rockets carry _____ into space.

the moon

astronauts

stars

C

The Earth is a _____.

star

planet

sun

D

The smallest planet is _____.

Jupiter

the Earth

Mercury
