B- Reading Comprehension (16 Marks)

Read the following passage carefully, then answer the questions below: (255 words)

Coffee is probably the most popular drink in the world. It has many positive properties that are good for your health. Drinking coffee can help reduce the chances of some cancers and stomach diseases. It has had a long and interesting history on its road to becoming the much-loved drink that it is today.

The coffee tree was first discovered in Africa in the 9th century. The coffee berries that grow on the trees **contain** coffee beans, which can be made into a drink. Even though the drink we know as coffee is well known all around the world, most countries have their own special way of making it. 'Cowboy coffee' is made in Finland and Norway by mixing coffee and boiling water together in a kettle and pouring out the liquid into a cup.

Turkish coffee is made by mixing coffee and sugar in a small pot with a long handle called an ibrik. The ibrik is held over a fire and then removed when the coffee comes to the boil. The mixture is poured into a small ceramic cup and drunk slowly, leaving the remains of the coffee at the bottom. Italians typically drink small cups of espresso every day and usually do not even sit down when they order **it**; they drink it and leave. Many people in USA have an electric coffeemaker, which uses a filter to separate the water from the coffee. Hot water drips through the coffee and comes out as the drink they know and love.

a) From a, b, c, and d, choose the correct answer: (6× 2 = 12 Marks)
