Animal Habitats

Read the following text and answer the questions:

Every animal needs a home that gives food, water, and shelter. Because our world is so big, these homes look very different!

1. The Hot and Dry Desert

The **desert** is a place that gets very little rain. It is often very hot during the day. Animals like camels live here because they can go a long time without drinking water.

2. The Deep Blue Sea and Rivers

Many animals live in the water. The **sea** is made of salt water and it is home to huge whales and colorful fish. **Rivers** are different because they have fresh water. You might find crocodiles or hippos splashing in a river to stay cool.

3. The Chilly Arctic

The **Arctic** is covered in ice and snow! Polar bears have thick white fur to keep them warm in this freezing habitat.

4. High Mountains

The **mountains** are very tall and rocky. It can get very cold at the top. Mountain goats are amazing climbers that live on these cliffs.

5. The Green Jungle

A **jungle** is a thick forest that stays warm and wet. It is filled with tall trees and big green leaves. This is the perfect home for monkeys to swing from branch to branch and for colorful parrots to fly.

Animals Around Us

Every week, our class learns about animals that live in different places around the world. Some animals live on land, and some live in water. One animal lives in the sea and moves smoothly using its fins. Another animal is a bird, but it cannot fly and likes very cold places. High above the ground, there is a bird with strong wings that can see very far. On land, one animal is famous for being the fastest runner. Another animal is very big and strong and lives in forests. In hot places, there is a large animal with thick fur that can climb trees. Near rivers, a very large animal enjoys staying in the water for a long time.
