### **Summary Making**

We are living a world where technology almost surpassed humanity. Don't you think it is making learners lazy day by day? They are becoming dependent on technology for their assignments rather than using their brains for the thought process. As humans are not error-free, similarly technology too does not come error-free. There are many problems like server error and connectivity problems which take much time to troubleshoot it. Cheating is an illegal activity, but technology made it more powerful and easy to use with its powerful wings. It becomes very tough to control this activity, especially in the examination environment.

### **Summary Making**

Whales are the largest animals in the world, even larger than some species of dinosaurs. Ironically, whales are among the gentlest creatures we know. There are people who go through great length to help them. Whales live in the ocean but in terms of behavior, they are more similar to humans than fish. They live in family groups and they even travel in groups when they have to migrate from cooler to warmer waters. The young stay with their parents for as long as fifteen years. Whales are known not to desert the ill or injured members; instead, they cradle them. Moreover, female whales have very strong maternal instincts.

## Reading Comprehension

### Reading the following text, and then answer some questions below:

Winter is cold in some places. Many plants do not grow during winter. Some plants die. Snow and ice may cover the ground. It can be hard for animals to find food during winter. Animals get through this time in many ways.

Birds and butterflies can fly. Many of them do not stick around for the winter. They leave. They go to a place with nice and warmer weather. Then they come home in the spring time. We call this migration. Migration means the movement from one place to the other for different reasons. Migrating is a good way to avoid the cold.

Another good way to avoid the cold is to sleep through it. Many animals hide during the winter. Their bodies slow down. They save their energy. They do not eat. They live off of their fat. They do this until food returns. We call this hibernation.

Snakes, frogs, and bears hibernate. Some animals store food in their homes. They do not sleep all winter, but they do much less. They live on what they saved in the summer and fall. This is what squirrels, beavers, and raccoons do. Skunks do this too.

Other animals tough it out. They do not leave. They do not hide. They must survive. Sometimes nature helps them out. Some animals grow thicker coats in the winter. Other animals change their color. For example; the arctic fox is brown in the summer. His coat turns white in the winter.

Winter may be pretty. It is nice to see snow on the trees. But it is dangerous too. People are also at risk and danger. You can get frost bitten or worse. How do you beat the winter? Do you wear a thick coat? Do you stay inside? Or do you live somewhere warm?

### From a, b, c and d, choose the correct answer:

#### **1. What is the best title for this passage?**
