

## **Reading Comprehension (12m)**

Our planet is made of continents and oceans. The Pacific Ocean is one of the biggest oceans which take more than one third of the planet's surface. It extends from the Arctic Ocean in the north to the southern ocean in the south. It's bounded by the continents of Asia and Australia in the west and the Americas in the east. Scientists found the fact that there is zero light in the deepest part of this ocean. Asia is the biggest continent on Earth. It's also one third of our planet. Asia is bounded on the east by the Pacific Ocean, on the south by the Indian Ocean and on the north by the Arctic Ocean. China and India are the largest countries in it. Kuwait is in Asia.
