Khalid's Big Day

Although my alarm clock was ringing loudly, I was reluctant to drag myself from bed because it was ceremony day, and I was due to receive my diploma. Filled with enthusiasm, Mum banged repeatedly at my door, eager for me to wake up and get ready for the event which I had been fearing for days. Although I blocked my ears, I could still hear a familiar singing voice filling up the house like a cloud of thick smoke. I was quite certain it must be Aunt Maryam. It was obvious by their behavior that they were more concerned about today's ceremony than I was. "Leave me alone, please," I begged. They deliberately ignored my request, and both continued banging aggressively at my door. Filled with a huge wave of frustration, I pulled open the door, shouting, "Mum, stop! You are being rude."

"You don't want to go do you? Khalid, this degree you completed is reported to be one of the most complex courses in the country and above all, your test scores, which you won a variety of trophies for, are among the best in the region. Your determination has resulted in you becoming a fully qualified medical professional. This certificate is the reward you so very much deserve," she responded, in a startlingly direct manner.

I was certain, if the universities had sent the invitations earlier, giving us more notice, my father would have been able to book a flight in time and that's what was causing me the most disappointment. My father is certainly more interested in my educational studies than any of his current work projects in Europe and would love to be here. I was heartbroken, but I wanted to please my mother, so I attended the ceremony anyway.

"Khalid Al Ali!" I nervously approached the stage, guided by the bright lights, I felt a firm pat on my right shoulder. It must be Ahmed from biology. He is one of the most annoying boys in school and often hits people in class, I thought. "Congratulations, my son." It couldn't be. Could it? I thought. "You made it!" My eyes lit up with delight. There he stood, the man who'd looked after me my whole life, teary eyed but bursting with pride.

a. his medical degree
b. the test scores
c. a trophy

4 **Khalid's father couldn't attend the ceremony because he ____.**

a. didn't receive an invite
b. was working overseas
c. missed his flight

5 **Which sentence best describes Khalid's mother?**

a. She is very anxious and quite funny.
b. She is over excited and a little annoying.
c. She is rude and not very enthusiastic.

6 **It was ____ who tapped him on the shoulder.**

a. Ahmad
b. Aunt Maryam
c. Khalid's father

Sara.Teale

Alternative Energy Now! is being released to encourage global leaders to do more to tackle complex factors, such as overpopulation of urban developments, which are resulting in rising temperatures. The documentary looks at the alternative energy sources that are being employed by nations in order to battle the climate crisis and focuses mainly on the countries which are more interested in making real change than others. One of the most concerning aspects of the documentary is that a report stated some of those in global positions speak positively for change and share their innovative ideas during global climate meetings. However, when it comes to implementing these projects, they do very little. What shocked me the most was the report that suggested if countries had, in fact, studied the data in the early nineties when concerns were raised, we would have a much more positive outlook today. Spoiler alert: Experts predict a frightening future.

The documentary explains how wind energy is thought to be among the best and cleanest energy sources because it has little negative impact on the environment, and therefore, reduces the reliance on sources that create fossil fuels. In China and the US, wind turbines are being placed in coastal regions, open plains, and mountains areas, making them a constant source of energy from the continuing high winds. The turbines gather kinetic energy through air in motion and use it to generate electricity.

More good news! Roofs are being replaced with greener options across American cities to combat rising temperatures. In 2001, Chicago covered 20,000 square feet of its city hall roof with vegetation. It was reported to have made a 50-degree difference in temperature to the building, which resulted in a reduction in cooling and heating costs and overall energy demand in comparison to a nearby tar roof building.

Solar power is believed to be more popular with individual households today than other energy sources. This might be because it was reported by a European government that installing the panels can also make homes more cost efficient. Although solar panels are easily accessible, meaning people can take more control of their energy use rather than relying on large scale government projects such as wind farms, they are extremely costly and only produce energy for half the day due to reliance on sunlight.

The documentary states that cities are heating up at a faster rate due to the ____.

a. absence of climate change initiatives
b. lack of alternative energy sources
c. growth of the population

What is the main focus of paragraph 2?

a. the harmful emissions generated by China and the US
b. the actions taken to generate clean energy
c. the negative effect of a renewable energy technology

A number of world leaders ____ when it's time to put climate initiatives in place.

a. are lazy and uninterested
b. appear enthusiastic and positive
c. often share their ideas

What is located in coastal spaces?

a. solar panels
b. roof vegetation
c. wind technology

*******BONUS*****The author was surprised by the report because countries didn't ____.**

a. review the statistics earlier
b. have a positive outlook
c. predict this negative outcome

What is being installed on top of urban buildings to battle temperature increases?

a. wind turbines
b. tar roofs
c. plants

According to the author, solar power is becoming more commonly known because ____.

a. solar panels are said to be more economical

b. government-run alternative energy initiatives are too slow

c. the panels are not expensive to buy

According to the documentary, what is a significant difference between solar energy and wind energy?

a. Solar energy is more widely used in the US and China than wind energy.

b. Solar energy is less efficient than wind energy.

c. Solar energy makes homes more cost efficient, unlike expensive wind-powered homes.

According to the text above ,what do you think will happen next in the story?

it can be inferred that Carla's negative experience with social media will likely lead to a further decline in her mental well-being and self-esteem.

Justification question Write your answer in full sentences. **Why is your answer to the inference question the best answer? Use the information in the text above to support your answer.**

Carla's positive start with social media turns negative as she becomes consumed by it. Her increased phone use and self-comparisons lead to distancing from friends and outdoor activities. Discovering a post that harms her self-esteem suggests a worsening mental state. The narrative hints at a continued decline, potentially isolating Carla further from her friends and once-enjoyed activities.

Laila is a technology reporter at the Al Khaleej Times newspaper . As part of an assignment, she accepted to be part of an ethical hacking experiment. Basically, a group of ethical hackers would try to compromise her system without her knowing how, when, and where. Laila only knew that it would happen at some point. For a whole month, the hackers did an extensive research on Laila, crawling through her Instagram and Facebook pages, Al Khaleej Times articles and even found out her date of birth from a website on family trees.
Almost two months after the assignment began, the hackers launched their attack. They pretended to be whistleblowers in control of sensitive government information and sent her an email with some of the files attached. The malware infection occurred the moment she opened the file, and the attackers got access to everything, including email address and webcam. And it wasn't even that difficult to do.

Read the following text and answer the question below in full sentences.

Saeed has been working in the same organization for over 20 years. He loves managing his small team of staff and felt that he thrives on the stress of work. He is in a job which he perceives to be rewarding and stressful in equal measure. He is the problem solver, the one to volunteer for any task. He works extra hours and feels a great sense of responsibility in his role.
However, recently, he began to struggle to manage the stress of his job. Thoughts and worries about work seeps into every part of his life. He would wake up at night with nightmares, worrying about a task he has not completed, or trying to remember if he had sent an urgent email. He found that his mind wanders to work whilst he is spending time with his family. He withdrew from friends as he didn't have the headspace to switch off and relax.

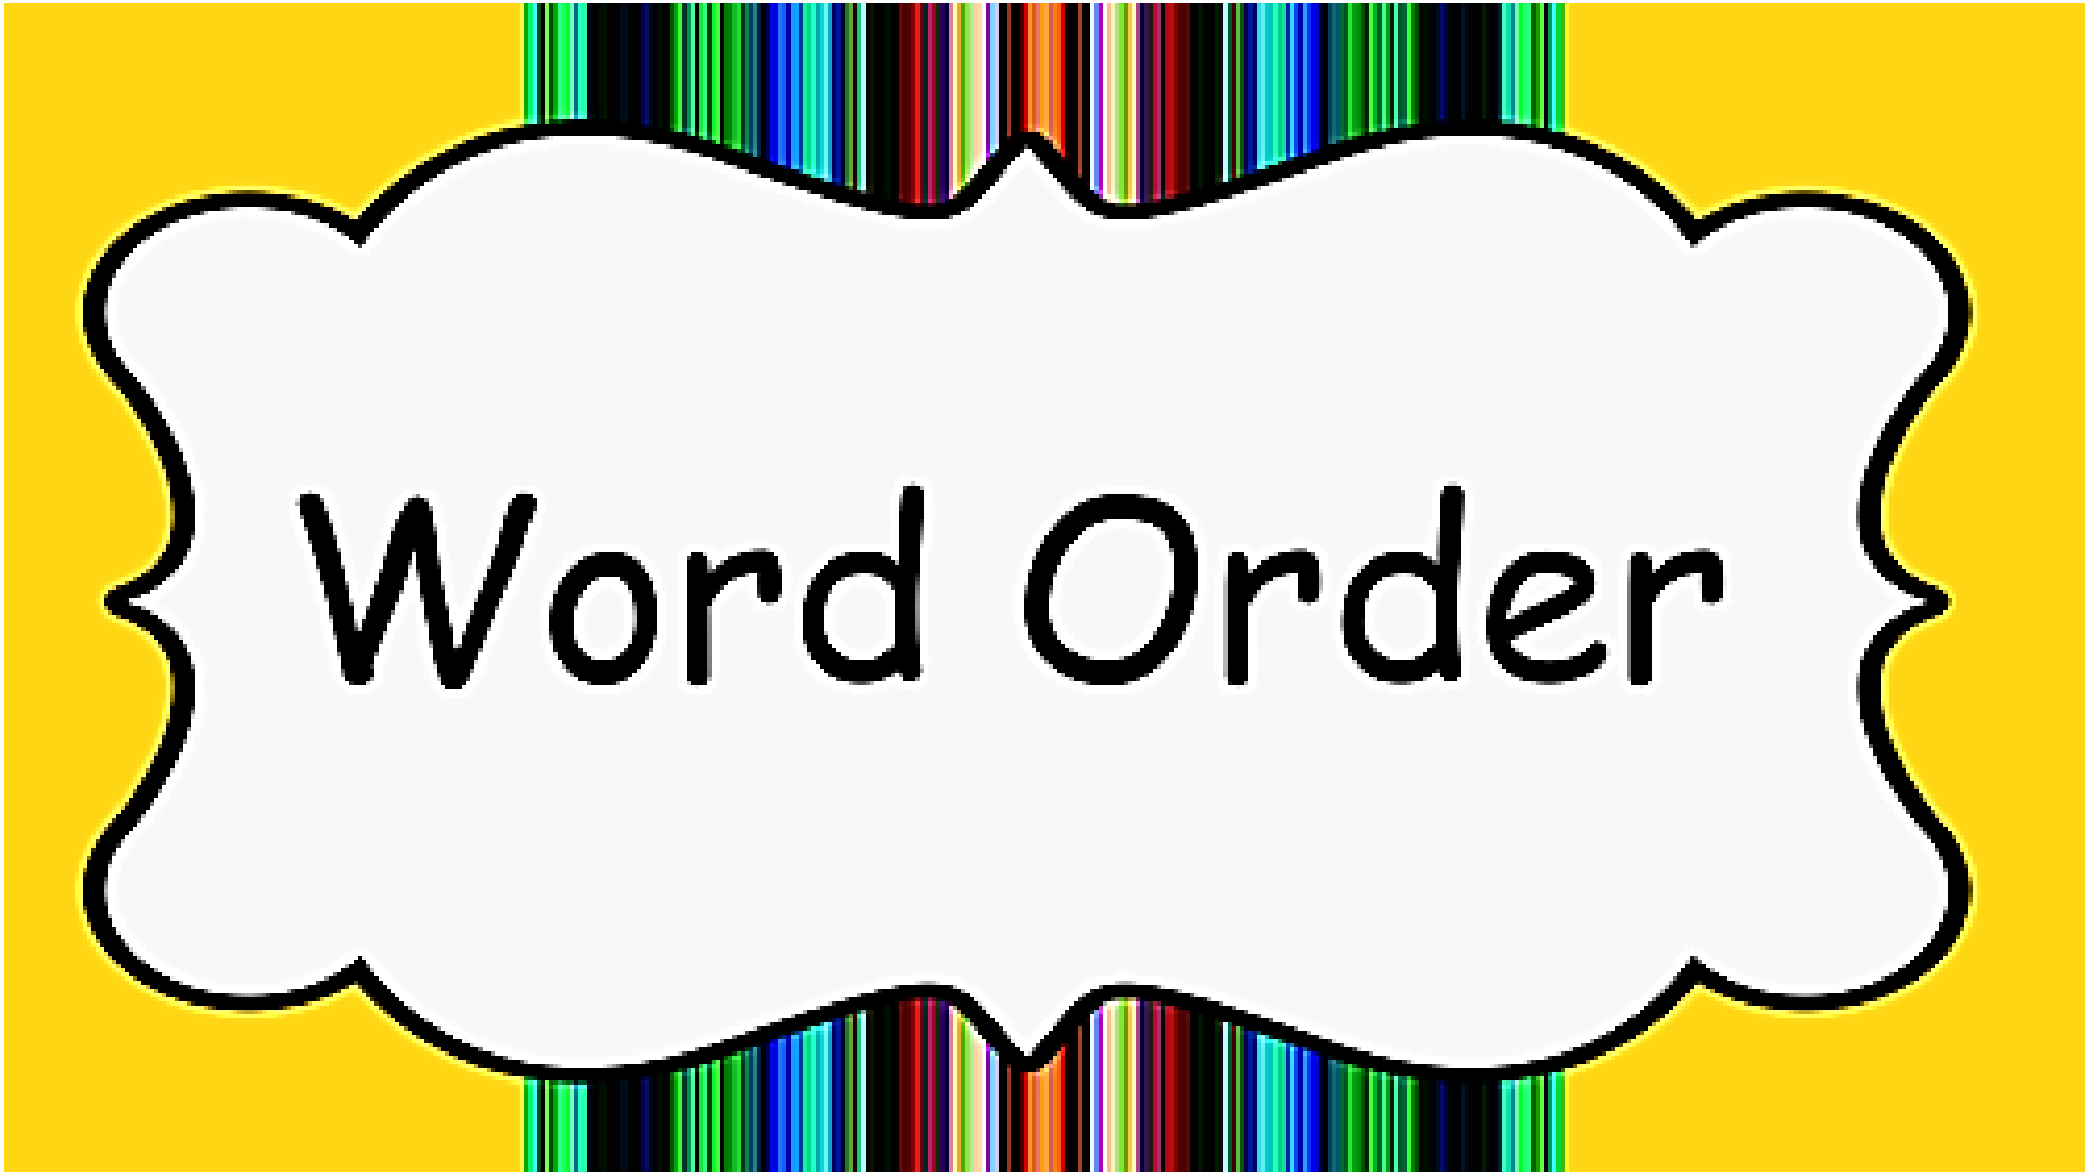

According to the text above , what type of life does Saeed have now?

Saeed's current life is characterized by high stress and challenges in managing work-life balance.

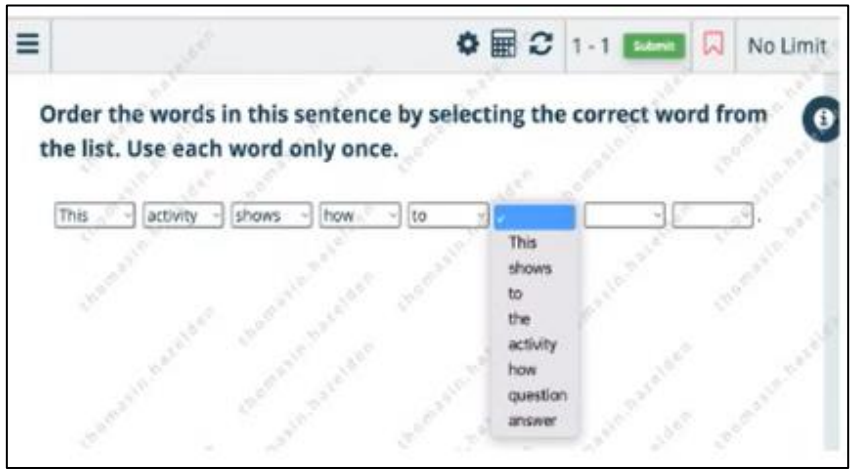

Justification question

Write your answer in full sentences. **Why is your answer to the inference question the best answer? Use the information in the text above to support your answer.**

Saeed, with over 20 years in the same organization, initially embraced work stress but is now struggling to cope. The text mentions pervasive thoughts and worries about work impacting every aspect of his life, including disruptions to his sleep with work-related nightmares. His mind frequently wanders to work even during family time. Additionally, he withdrew from friends due to a lack of mental space to switch off and relax.

Pros/Cons Essay

Advantages and Disadvantages Essay

What if there was no Topic? It has been considered one of the most significant issues for almost everyone in each civilized community. Thus, some people strongly support the idea that Topic is advantageous. In contrast, others stand against it since they considerably believe that Topic is disadvantageous. However, from where I stand, it is my belief that Topic is a mixed blessing since it has both advantages and disadvantages which are discussed below in detail.

First and foremost, Topic has multiple positive sides such as more convenient as well as more efficient. That means, if people use Topic, it will be more suitable. Moreover, the more people use Topic, the more dynamic it will be. For example, recent studies have concluded that Topic affects human life positively in terms of efficiency and convenience. That is the first side of Topic. The other side represents the disadvantages.

Pros/Cons Essay

On the other hand, Topic has some disadvantages since it is less reliable and less productive. In other words, people cannot fully depend on Topic because they will not find the result they seek. Additionally, Topic could have a negative effect on people because sometimes it causes and provides harm. For example, according to the most updated statistics, the percentage of satisfaction among those who use Topic is significantly decreasing. That is the ugly face of Topic.

To sum up, Topic is believed to be is a controversial and a debatable issue. Not only does it have advantages such as appropriateness, but it also has disadvantages like the lack of reliability. As a result, people have been divided into two teams voting either for or against it. Finally, I believe it mainly depends on how people approach it.

What if there was no TOPIC? It has been considered one of the most significant factors for almost everyone in each civilized community. Thus, some people strongly support the idea that SIDE 1. In contrast, others stand against it since they believe that SIDE 2 considerably. However, from whereI stand, it is my belief that MY SIDE for many reasons; REASON 1 as well as REASON 2.

First and foremost, MY OPINION because it is REASON 1. That means, if MY OPINION WITHOUT SHOULD, it will be more suitable. Additionally,the more MY OPINION WITHOUT SHOULD, the more appropriate it will be. For example, according to the most updated statistics, the percentage of satisfaction among those who agree with my view is significantly increasing.That is the first reason why MY OPINION. Another supporting reason is being REASON 2.

Opinion Essay

Secondly, the second reason why MY OPINION is that it is REASON TWO. In other words, being REASON TWO encourages a lot of people to MY OPINION VERB. Problem-Solving Essay مقال لمشكلة

المشكلة refers to تعريف المشكلة. It has been considered one of the most significant issues for almost everyone in each community. This is extremely harmful to the earth as well as humans. It is quite challenging to control المشكلة; however, it is not unmanageable. The first step in solving any problem is identifying the causes of the problem. Therefore, people need to first understand the causes of المشكلة that will help them proceed further in solving it.

First and foremost, reasons' recognition for the existence of المشكلة makes it approachable because it has become a grave problem that needs undivided attention. It is not happening because of a single cause but several causes which are both natural as well as manmade. The natural causes include الاسباب الطبيعية للمشكلة. For instance, مثال يدل على الاسباب الطبيعية. Moreover. Human influence has been a very serious factor because of such activities like اسباب بشرية. Thus, steps must be taken immediately to stop المشكلة and make the earth better again.

As stated earlier, it might be challenging but it is not entirely impossible. المشكلة can be stopped when combined efforts are put in. For that, individuals and governments, both have to take steps towards achieving it. People must begin with الحل الأول من ناحية الناس. Furthermore, they need to الحل الثانى من ناحية الناس.As for the government's part, they must حل من ناحية الحكومة.

In conclusion, despite uncertainties and varied feelings about المشكلة, the causes remain in place. As a result, it is significantly urgent to not only recognize those causes but also take the necessary steps to put an end to the forthcoming damage as well as the suffering of future generations. Therefore, every little step, no matter how small, carries a lot of weight and is quite significant in stopping المشكلة.
