1 Big Changes

رابط الدرس الرقمي
www.ien.edu.sa

1 Listen and Discuss

Read the texts below. Find the sentence that talks about the most important event in each. After you finish reading, write the effect that each important event had.

The world is constantly going through changes. Look at some important events that have changed the world and affected the lives of many people in modern times.

The Unification of the Kingdom of Saudi Arabia

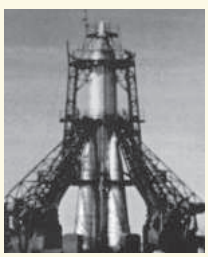

King Abdulaziz, a gifted leader, was responsible for the legendary event that marked the beginning of modern Saudi Arabia. In 1902, he regained Riyadh, beat the city garrison, took the Masmak Fortress, and established his headquarters in the city. He expanded Saudi Arabia to include all of the Hijaz, Makkah and Madinah and united all the tribes. On September 23, 1932, the Kingdom of Saudi Arabia was officially established, with Arabic as the national language and the Holy Qur'an as its constitution. King Abdulaziz initiated the building of infrastructure and set Saudi Arabia on the road to modernization.

The United Arab Emirates - UAE

The federation of the United Arab Emirates, known as UAE, consists of seven sheikhdoms; Abu Dhabi, Ajman, Dubai, Fujairah, Ras Al-Khaimah, Sharjah and Umm Al Quwain. The city of Abu Dhabi in Abu Dhabi is the capital. The UAE was officially established in 1971. It came after the discovery of enormous oil reserves in Abu Dhabi in 1958. The UAE dirham, a single national currency, was launched in 1973. The oil revenues as well as income from other commercial activities have been used to develop a thriving economy and social infrastructure. Abu Dhabi now hosts its own grand prix at Yas Marina Circuit and Dubai is home to the tallest building in the world, the Burj Khalifa.

The Space Race

The Russians launched the world's first artificial satellite, *Sputnik 1*, on October 4, 1957. Next, *Sputnik 2* went up into space on November 3. The Americans won the race to land on the moon more than ten years later—with *Apollo 11* on July 20, 1969. "This is one small step for a man, one giant leap for mankind," said astronaut Neil Armstrong, the first person to walk on the moon. His Royal Highness Prince Sultan bin Salman Al Saud flew on *STS-51G Discovery* in June 1985 as the representative of the Arab Satellite Communications Organization (ARABSAT). He was the youngest person to fly on the Space Shuttle at the age of 28.*

The Communications Revolution

The first communications satellite, called *Telstar*, was launched from Cape Canaveral on July 10, 1962. This marked the start of rapid transmission of TV signals over wide areas. What we take for granted today—satellite television, cellular telephones, wireless and high-speed Internet connections, and so forth—were part of science fiction only 40 years ago. Teenagers today are the first real citizens of the digital world. Unlike their parents, they have grown up in a world in which electronic delivery of information and entertainment is natural and more accepted than conventional forms like the newspaper, tape, or film.

Saud: I'm from Dubai, but my grandparents were from Germany. In fact, they were from Berlin.
Hans: So I guess you still have family here.
Saud: I'm afraid we lost touch with our relatives.
Hans: And how long have you been here?
Saud: I've been here for almost three years. You see, I have a German passport because of my grandparents. So I can work legally in this country.
Hans: By the way, what do you do?
Saud: I'm a biologist. I do research in a lab for a pharmaceutical company.
Hans: Do you miss Dubai?
Saud: Quite a bit. But I've got a good job. I've made lots of friends. I fit in OK... I'm happy here.

رؤية VISION 2030
المملكة العربية السعودية
KINGDOM OF SAUDI ARABIA

9 Reading

Before Reading

Think about Saudi Arabia's progress and growth since its foundation in 1932 until now.

- What are the most significant advances or changes?
- How do you think these will develop or progress in the future?

Progress towards the future

All successful changes start with a vision. Successful visions are based on strong pillars. The first pillar of our vision is our status as the heart of the Arab and Islamic worlds. We recognize that Allah the Almighty has given to our country, a gift more precious than oil. Saudi Arabia is the Land of the Two Holy Mosques, the most sacred sites on earth and the direction of the Kaaba (Qibla) to which more than a billion Muslims turn at prayer. We will expand and further develop our country to ensure that that Muslims from around the world can visit the Holy Sites.

The second pillar of our vision is our determination to become a center for global business. We will develop the economy to encourage investment from other countries and international businesses.

The third pillar is **transforming** our unique geographical location into a global **hub** connecting three continents, Asia, Europe and Africa. We will use our geographical position to improve trade and transport to and from our country.

Although our country is rich in its natural resources, our real wealth lies in the ambition of our people and the potential of our younger generation. They are our nation's pride and the architects of our future. We will support young people in finding jobs and training.

Our vision is built around three themes: A **vibrant** society, a **thriving** economy and an **ambitious** nation.

The first theme is vital to achieving the vision. We believe in the importance of a vibrant society. Members of this society live in accordance with the Islamic principle of moderation, are proud of their national identity and their ancient cultural heritage, enjoy a good life, are protected by caring families and are supported by a social and health care system. The government is committed to supporting families and the education and wellbeing of their children.

In the second theme, a thriving economy provides opportunities for all by building an education system that meets the needs of the market. It creates economic opportunities for small **enterprises** as well as large corporations. Therefore, we will develop and **diversify** our economy to create job opportunities.

Our third theme-an ambitious nation-is built on a responsible, **transparent** and high-performing government. We will apply efficiency and responsibility at all levels.

We will also prepare the right environment for our citizens, businesses and society to be responsible and take the initiative in facing challenges and seizing opportunities.

We are confident about Saudi Arabia's future. With all the blessings Allah has given us, we cannot help but be optimistic about the decades ahead.

The future of our country is one of huge promise and great potential. Our precious country deserves the best.

Our vision, grounded in our country's strengths, will deliver this stability and create a brighter future for our country and our people.

2. Read the text and compare with your ideas. Underline new information.

How the Internet has changed the world

It all started in 1969 when a student at the University of Stanford tried to log in to a university computer, from his home in Los Angeles. This gave scientists the idea that people could communicate through computers, instead of posting letters or talking by telephone.

Many scientists researched ways to try and do this. In 1990 Tim Berners-Lee and Robert Dailliau succeeded. They created a system for people to communicate with each other and find out information using computers. In the beginning, they called it the "Worldwide Web". They changed the name to "The Internet" later. The Internet started with a few basic websites and e-mail. At first, it was used mainly by scientists, governments and the military. Now, more than 30 years later, there are more than four and a half billion users of the Internet (about half of the world's population!).

E-mail, instant messaging and online video calls connect people across the globe for business, education and social purposes. Social networks allow people to communicate with large numbers of friends, and upload pictures and videos to share.

Information is accessible to everyone online. All you need to do is 'Google' a few key words and you get numerous sites and documents. We can also now learn via the Internet. People can attend university or courses online and obtain academic and professional qualifications.

MG_01_COMBO_TEXT_2024.indb 14 30/4/24 2:00 AM

C. Read the text and make notes in the chart about the important facts and the changes the Internet has brought about.

D. Think about an event that has brought about major changes. Make notes in the chart about the event and the impact it has had on your country.

	Impact 1	Impact 2	Impact 3
What was the event?			
When and/ or where did it happen?			
Did the event have a positive or negative impact on your country?			

2. Use the information you put in the chart to write a short discursive essay about the event and the impact on your country.

3. Exchange and comment on each other's work. Correct and re-write.

1 Listen and Discuss

Read the three texts below. Find the sentences that say exactly what each person does in his job.

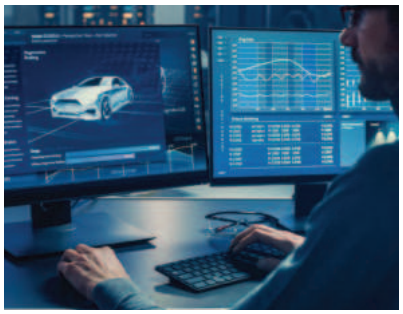

Dream JOBS

Have you ever wondered how people get really cool jobs? Imagine you've been working at the same job for a long time, and you're getting tired of the daily grind. Maybe you can get inspiration from these lucky people and do something creative and interesting.

CAR SCULPTOR

Working with clay is normally associated with artists, not with the automotive industry. However, some of the world's largest automobile companies have a permanent staff of sculptors to help them make designs for cars and visualize ideas for future products. Salim Saif went to art school and was going to be an artist, but he ended up as a sculptor for General Motors. Salim spends his days using his hands to craft anything from miniature clay models to actual-size car sculptures. He's been working for the company since he left college, and he and his team have helped design the latest models to come off the showroom floor.

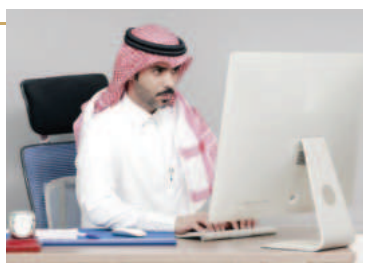

FOOD SCIENTIST

When someone says that he is a laboratory scientist, what immediately comes to your mind? You probably think of a white lab coat, sterile surroundings, a microscope, and test tubes. But that is not the case of Matthew Duval. For the last three years, he's been working as a food scientist for the makers of Tasty's ice cream, and he has created several new flavors. He's constantly searching for new combinations of flavors to keep the products fresh and interesting for the company's customers. In his lab, he experiments with different products and flavors until he gets them just right. And, of course, he always gets to taste the results. One part of Matthew's job involves market research. He's good at presenting his new products to customers and getting their input.

ANIMATION DESIGNER

Animation has been in high demand in advertising, special effects, video games, and films. Animators need to have artistic ability, creativity, storytelling ability, technical skills, scientific and technical knowledge, and the ability to work with others.

Animators need to understand character development and be able to portray character emotions in a convincing way. As computer generated imagery (CGI) technology is used in both live action films and animated movies and interactive games, it has become necessary for designers to have scientific and technical knowledge. Animation projects involve many people who work as a team. Clear and effective communication with team members and clients is crucial.

OPENINGS [Internships]

Media Intern: TV and Radio Media International

Do you want to be part of the fast-paced world of television and meet famous people at the same time? Here's your chance. Our interns research information about hot topics. They need to find information quickly and be able to summarize it in clear language. Our hosts use the information on their programs. Our interns also greet our guests when they arrive in our studios. You need to be fluent in English and be good at using computers. And you must be friendly and outgoing. This is a paid internship for the summer.

Archaeological Interns: Students Learning Overseas

Here's an opportunity to study history firsthand and to work with noted archaeologists on an exciting dig. We've been uncovering ruins at the famous ancient city of Pompeii for several years. Interns' job is to dig slowly and carefully. They also work to uncover buildings that have been buried for centuries. It is very hard and painstaking work. The reward is a chance to discover something that the volcano Vesuvius buried with its lava two thousand years ago. This is an unpaid three-month internship, but lodging and meals are provided near the site.

Environmental Engineering: Saudi Construction, Riyadh

Great opportunity for a civil engineering graduate student in the environment field! This project involves the construction of a road and a number of other local projects, such as research centers and new pipelines. The interns work alongside experienced civil engineers and receive training in the different work sectors. You need to be able to read blueprints, have some knowledge of Arabic, and be able to cope with temperatures that average 104°F (40°C). Food and accommodation will be provided.

Send applications to: internships@jpool.com Attach a cover letter and a résumé.

1 Listen and Discuss

1. Read the title. What words does it make you think of?
2. Read the text. Find the sentences that talk about the future and the ones that talk about the past.

A Vision of the Future

The French writer Jules Verne wrote several books in the late 1800s. In them, he wrote about the future. He asked, "What will life be like at the end of the 20th century—one hundred years from now?" In one of his adventure novels *(From the Earth to the Moon)*, his characters traveled to the moon in a rocket. In another novel *(20,000 Leagues Under the Sea)*, his characters dove through the depths of the ocean in a submarine in the shape of a whale. In a novel titled *Paris in the Twentieth Century*, Verne described a city with skyscrapers of glass and steel, high-speed trains, gas-powered automobiles, and a global communications network. Space rockets and submarines and other things in his novels didn't exist in Verne's time, but many of the inventions that Verne imagined became reality by the end of the 1900s. That's why people call Verne a visionary.

Comments Made in the United States in 1955: Right or Wrong Predictions?

Read the predictions below. Find the sentences that talk about the future.

"I seriously doubt that fast food restaurants will ever catch on."

"Have you seen the new cars coming out next year? It won't be long before $1,500 won't even buy a used car."

"Did you see where some baseball player just signed a contract for $75,000 a year just to play ball? It wouldn't surprise me if someday they'll be making more than the president."

"Soon all our kitchen appliances will be electric. They are even making electric typewriters now."

"I'll tell you one thing, if things keep going the way they are, it's going to be impossible to buy a week's groceries for $20."

"If they think I'll pay 50 cents for a haircut, forget it."

FYI

What a dollar bought in 1955 would take about $9.65 to buy in 2020, because of inflation. The average baseball player makes nearly $4.5 million a year. Today a haircut for a man costs an average of $28.

9 Reading

Before Reading

1. Read the title. What words does it make you think of?
2. Read the text. Match a heading to each paragraph.
   - **a.** What the car contained
   - **b.** The burial of a car
   - **c.** 50 years later
   - **d.** They lived to see it
   - **e.** Everyone came to the event

The Tulsa Time Capsule

1 A crowd of people gathered outside the courthouse in Tulsa, Oklahoma, in June 1957, to witness the burial of an unusual time capsule: a brand-new gold-and-white Plymouth Belvedere car. The city leaders explained: "In exactly 50 years time, this car will be unearthed to show the world who we were and how we lived in Tulsa in 1957."

2 The automobile contained a flag, a city phone directory, an unpaid parking ticket, and the contents of a woman's purse: bobby pins, a ladies' powder compact, a plastic rain cap, several combs, a tube of lipstick, a pack of gum, a wad of tissues, $2.73 in bills and coins. Five gallons of gas were also included, in case the combustion engine became obsolete by 2007 and no fuel was available.

3 The event attracted all sorts of people to Denver Avenue that day in 1957. Some thought that the idea of burying a new car was dumb; others thought it was brilliant. Raffle tickets (for the car) were sold. The person to guess the approximate population of Tulsa in 2007 would win. "I'll never be alive," said Teddy Baxter, aged 6. "Sure you will," answered his brother Henry, who was 19. "I might not be, but you'll be around for sure." Gene McDaniel, who was 20 at the time, thought: "In 2007, I'll be 70—I'll never make it."

4 The Plymouth was wrapped in protective materials and lowered into a concrete vault, which was supposed to withstand even a nuclear attack. It lay there for 50 years.

On June 13, 2007, the vault was opened, and the car was raised as thousands of people watched. The organizer of the event said: "Ladies and gentlemen, I present you Miss Belvedere." Unfortunately the tomb was unable to protect the car from moisture, and the vintage vehicle was covered in rust. The contents of a "typical" woman's handbag in the glove compartment looked like a lump of rotted leather. The microfilm that recorded the names of the contestants wasn't found. There was a bit of disappointment that the items were not in better condition. However, some items inside the time capsule were in good shape—they included a U.S. flag and some historical documents, such as aerial maps of the city and postcards.

5 The good news is that when the Belvedere was unearthed, Teddy and Gene were still alive. They never thought they would be here to see it happen. Someone present said, "It's our King Tut's tomb. It's like a fairy tale."

10 Writing

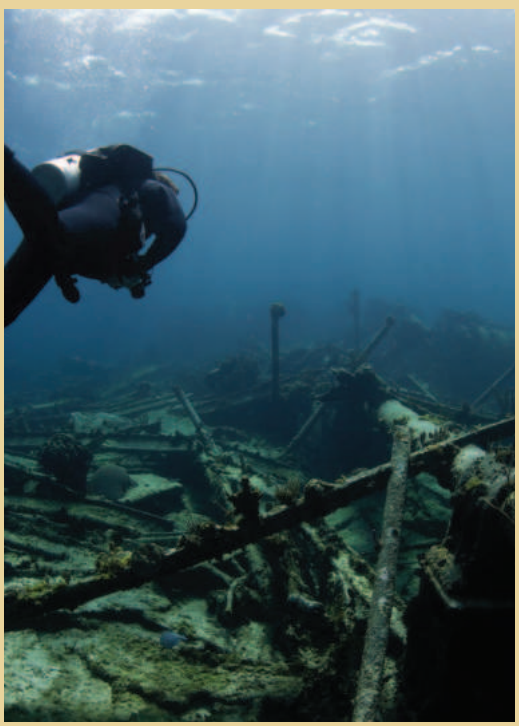

A. Answer the questions.

1. Read the title. Who do you think the keeper is?

2. Look at the photos. Where was the treasure hidden?

Keeper of hidden treasure

This is not a fairy tale, nor a scary story; it is the story of the discovery of 900-year-old treasure off the Korean shore.

A fisherman caught an octopus that had bits of blue pottery attached to its tentacles. At first, he thought they were shells. He caught more octopus and they all had shards attached to their tentacles. Finally, he brought up an octopus that had a whole plate caught on its tentacles.

That was when he realized that he had made an important discovery; he had heard about shipwrecks with ancient pottery, in the area. So he contacted the museum as soon as he got back.

An urgent underwater exploration led to the discovery of thirty, perfect examples of 12th century bowls, thanks to the octopus family.

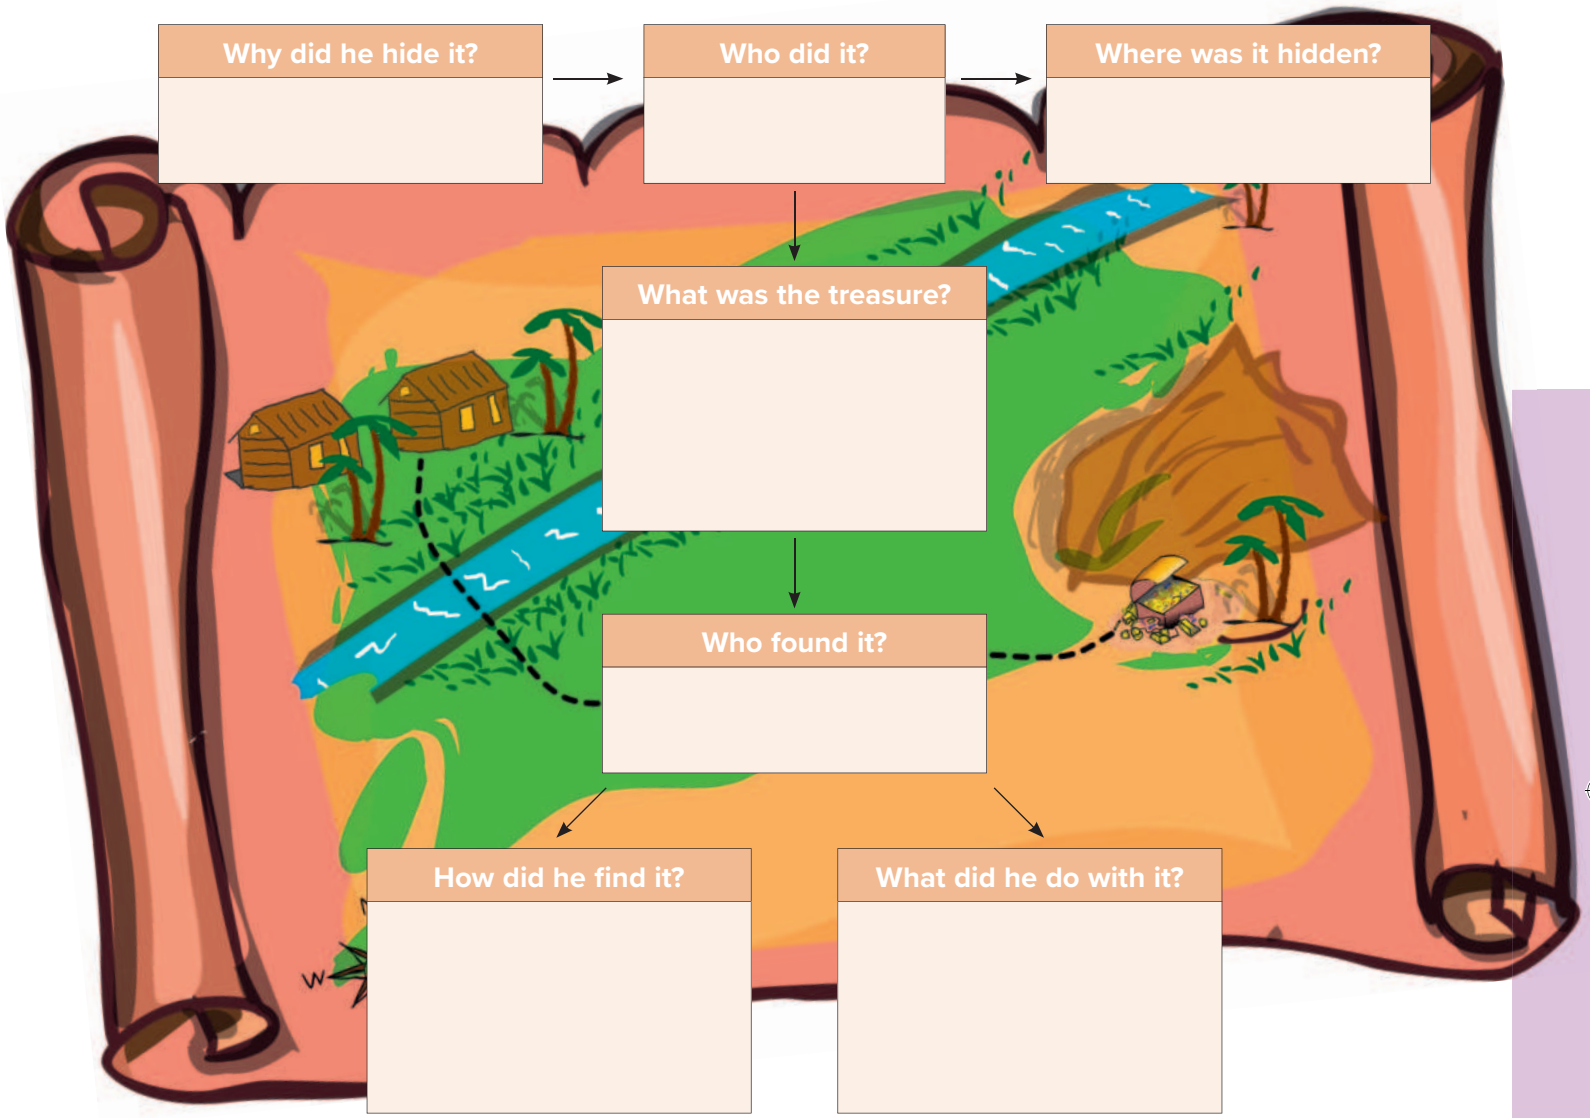

3. Read the story and make notes in the boxes.

- The **order of the events**. What happened first, second, third and so on? Use a variety of past tenses to order your events.
- The **beginning** and **end** of the story. How will you begin your story? How will you end your story?

THE FOLD-UP BIKE

It looks like an ordinary bike, but it's portable. This folding bike can easily be transported and stored when it is not in use. It can make your life easier. In contrast to the standard bike, it is much smaller and less bulky, so it can be parked and stored more readily. The fold-up bike is attractive, and it comes in a variety of styles.

About Bicycles

Bicycles were invented in France in the 1790s. The first bikes were made of wood, had a front wheel that didn't move from left to right, and didn't have pedals. In 1817, a steerable front wheel was developed by Baron Karl von Drais in Germany, and in 1839, the first pedals were introduced by Kirkpatrick MacMillan, a blacksmith from Scotland. The first bikes had large front wheels because it was believed that the bigger the front wheel, the faster the bike.

9 Reading

Before Reading

1. What words do you think of when you read the words "credit card"?

2. Read the text and write sentences to show the history of the credit card. Use the timeline below.

The World of Plastic

1 Can you imagine a world without credit cards? Until the 1950s, a world without the use of cash was simply inconceivable. Today an economic universe without plastic would be impractical. Whether it's for business or for leisure, the credit card is used to pay for goods and services from New York to Beijing.

2 It all started in 1949 when Frank McNamara scheduled a business dinner in a New York restaurant. Before he left for the dinner, Frank changed suits. When the waiter presented the check, Frank realized that he had left his wallet in the other suit. The embarrassing situation was solved, but that night Frank asked himself: "Why should people be limited to spending what they are carrying in cash, instead of being able to spend what they can afford?" A year later, Frank returned to the same restaurant in New York. When the check came, Frank handed the waiter a small cardboard card, a Diner's Club Card, and signed for the meal. This event is known in the credit card industry as the "First Supper." Soon the concept of "charging it" was picked up by merchants as an alternative form of payment to the use of cash. By 1952, the Diner's Club Card was accepted by thousands of businesses across the United States, and it became a status symbol for those who carried it.

3 The Diner's Club Card soon became a cultural icon. Hollywood cashed in on the "charge-it craze" with the 1962 movie, *The Man from the Diner's Club*. In it, an employee at Diner's Club issues a credit card to a well-known gangster and has to get it back in order to keep his job. The Ideal Toy Corporation joined in the trend when it created a board game called the *Diner's Club Game*. The idea of the credit card quickly expanded outside the United States. The Diner's Club Card became the first international charge card in 1952 with franchises in Canada, France, and Cuba. In 1955, Western Airlines became the first airline to accept the Diner's Club Card. Ten years later, the card was accepted by every airline in the United States. Diner's Club expanded its services to hotels, car rentals, and other businesses.

4 Other famous international credit cards have been created such as American Express, Visa, and MasterCard. There are hundreds of local bank cards, department store credit cards, supermarket credit cards, and so forth around the world.

5 In 1984, the first card members rewards program was created, aimed mostly at business travelers. It gave valuable benefits and special privileges to loyal users. Now many reward programs offer free airline miles and discounts on hotels and other products.

6 Ever since a businessman forgot his cash in 1949, people have used credit cards. An entirely new business was created that revolutionized the way the world has paid for goods and services ever since.

Michael Faraday, research on electricity in space

1843 — 1865 — 1973

The Invention of the Cell Phone

The history of the cell phone goes back to Michael Faraday who researched into whether space could conduct electricity, in 1843. His work had a substantial effect on the development of cellular phones. Dr. Mahlon Loomis, a dentist, was the first person to communicate through the wireless atmosphere in 1865. He developed a method of transmitting and receiving messages through the atmosphere.

Dr. Martin Cooper is considered to be the inventor of the first portable cellular phone. He was the first person to use a cellular phone in 1973.

Cell phones went public in 1977 with trial testing in Chicago and eventually other cities in the US. As the cell phone became more popular, it drew the interest of large companies and was introduced in more places around the world.

The Cellular Technology Industry Association (CTIA), developed in 1988, set goals and standards for cellular phone providers.

In spite of consumer demand, it took cellular phone service nearly 40 years to become commercially accessible. It has now become one of the largest industries internationally with billions of users.

E. Read the texts. Which text most closely represents your point of view?

The computer and the Internet. Good or bad?

Have we become dependent on computers and the Internet?

´ Thread Started on Jan 12, 2023, 4:55 PM ´

Computers have become an integral part of our lives. They make day to day tasks easier and save time. Does that make us incapable of doing simple tasks without the aid of the computer?
Can we still use hard copies of dictionaries or books?
Can we write by hand?
I think most of us can. Not having to do things in a conventional manner allows more time for thought and creativity.

Re: Computer and the Internet. Good or bad?

´ Reply #1 on Jan 12, 2023, 5:21 PM ´

I agree that computers and the Internet are valuable tools that provide access to information quickly and efficiently. On the other hand, literacy appears to be affected in more ways than one. People don't bother to learn how to spell correctly or write by hand. They sometimes rely on the computer to correct their grammar and spelling. I know my handwriting has suffered since I started word processing.

Re: Computer and the Internet. Good or bad?

´ Reply #2 on Jan 12, 2023, 7:43 PM ´

Does it matter if we are not all adept at handwriting? At the end of the day, technology is here to stay. If computers can help us write, why should we write by hand? Isn't it better to invest that time on learning?

Re: Computer and the Internet. Good or bad?

´ Reply #3 on Jan 13, 2023, 4:01 PM ´

Learning is the big issue here. Does technology foster learning or does it provide ready data that do not promote critical thinking? And what about math? There seem to be more and more young people who are unable to calculate. They are completely dependent on computers.

Re: Computer and the Internet. Good or bad?

´ Reply #4 on Jan 13, 2023, 9:40 PM ´

The Internet has contributed greatly to learning, through the wealth of information it can provide, on a wide range of topics. In addition, it has made it possible for people to study through e-learning. In other words, the Internet has brought schools and universities to people, wherever they might be, provided that they are connected.

Re: Computer and the Internet. Good or bad?

´ Reply #5 on Jan 16, 2023, 5:12 PM ´

Our teacher says that the Internet prevents us from developing our memory, an important aspect of learning. He thinks that easy access to information prevents learning, simply because we do not have to make any effort to memorize. I don't agree. Memorizing facts is not an effective way of learning. There are a lot of people who are unable to do that, yet when you talk to them or let them present a viewpoint or solve a problem, you realize they are highly intelligent and articulate. I am getting confused. Can someone help?

2 Reading

Before Reading

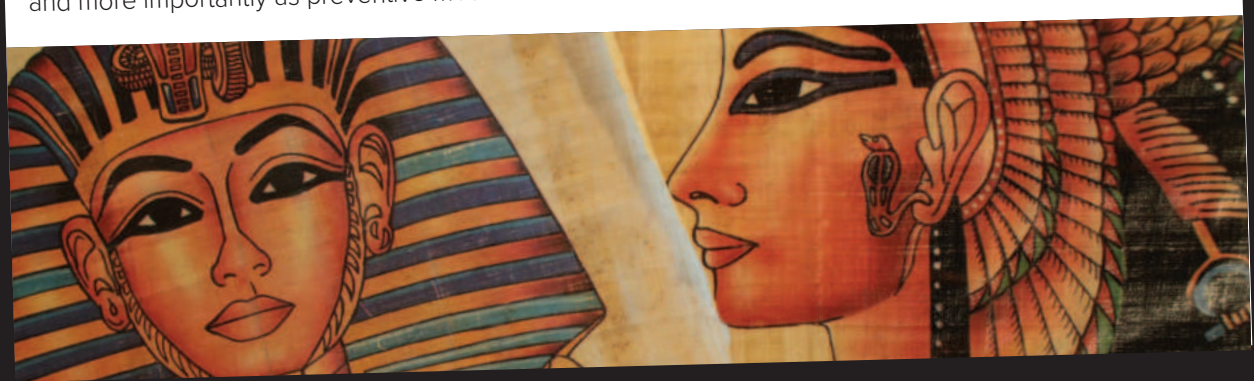

1. Look at the photo of ancient Egyptians. What do you notice about their eyes?
2. What did they use for the heavy eye make-up that is so noticeable in the wall painting?
3. What was the purpose of the make-up?

EYE MAKE-UP IN ANCIENT EGYPT

Ancient Egypt's striking eye make-up protected wearers against eye disease, according to French scientists. The make-up was concocted with a mixture of lead and lead salts and it was used to adorn the eyes and ward off evil!

Philippe Walter, who co-headed a team of scientists from the Louvre museum and the CNRS (National Center for Scientific Research, France), pointed out that this observation had been made in the past by ancient Greeks and Romans who believed that the make-up had medicinal properties, but the team wanted to determine the exact composition and how it worked.

Contrary to widely held belief that lead is harmful, the team demonstrated that in very low doses lead does not damage cells. The research was carried out with a tiny electrode, to observe the effect of Egyptian lead chloride on a single cell. It proved that lead produces a molecule that activates the immune system which in turn attacks bacteria in case of an eye infection. So, make-up was used as a disinfectant and more importantly as preventive medication.

After Reading

A. Answer the questions about the reading.

1. What was Egyptian make-up concocted with?

3. What did the Greeks and Romans believe?

5. What were the findings of the research?
6. According to the text, how long have people been using make-up?

4 Chant Along

I Wonder What They'll Be

My children will be grown some day,
And I hope I'll still be here
To see what they will be.
But whatever they may do
They won't be needing me
To take them by the hand.
Hoping they'll be kind
And praying that they'll find
A castle made of stone and not of sand.

Chorus

Will they be just what I want?
Will my dreams come true?
If I could predict
If someone knew—
I may not be there,
And when I am gone,
Life will go on
Without me.

My children will be grown some day,
But I might not be around
To hear what they will say.
I wonder if they'll understand
The things I've wished for them.
When they're on their own,
Will the path I've shown
Help them carry on,
And bring love and light
To their own home?

Chorus

Will they be just what I want?
Will my dreams come true?
If I could predict
If someone knew—
I may not be there,
And when I am gone,
Life will go on
Without me.

I READING

Read about Ellis Island in New York.

Between 1892 and 1954, most people who came to live in the United States passed through Ellis Island. During that time, more than 12 million immigrants had this experience. Sometimes more than 10,000 people would go through Ellis Island in a single day. Most of these newcomers came from Europe and almost all of them came across the Atlantic Ocean by steamship. The trip was very difficult. The food was terrible, the ships were usually crowded and dirty, and the weather was usually bad so a lot of people got sick.

After the immigrants got off the ship at Ellis Island, they first had to pass a medical test. Sometimes they would wait for hours to see a doctor. If they were sick, they were usually sent back home. Over 250,000 people were sent home between the years 1892 and 1954. Some of those refused entry were young children, so one or both parents would have to go back with them. For these people, it meant their dream of living in the United States was over.

Today Ellis Island is a museum. You can see pictures of what the immigrants and the ships looked like. You can also listen to recorded interviews of some of the immigrants as they tell stories about what it was like to come to this country. In spring 2001, *The Statue of Liberty-Ellis Island Foundation* started offering a new service. You can now trace your ancestors' records. Among other things, you can find out the name of the ship they came on, how old they were, and what nationality they were. Of course there is a fee for this service, but for many people it is worth it to find out more about their family members' first days in the New World.

Read the sentences about Ellis Island. Write ***T*** for ***True*** or ***F*** for ***False.***

1. _____ Ellis Island is in California.

2. _____ Immigrants came to Ellis Island and then had to pass a medical test.

3. _____ Today Ellis Island is a museum.

4. _____ Ellis Island was used between the years 1892 and 1954.

5. _____ Many people came to Ellis Island from Europe.

6. _____ The ships were clean and didn't have many people on them.

7. _____ The food on the ships was great.

8. _____ For most immigrants, the trip across the Atlantic was difficult.

F READING

Read the story, and answer the questions.

How many times have you been near a dangerous animal? How close have you been to a poisonous snake? Well Tony Kepler raises killer snakes for a living, and he loves his job. He has been working with them since he was a little boy, and he's not afraid of them at all.

Tony's father has been handling snakes for twenty years, and he has taught his son a lot about them. Now Tony is able to make money from snakes. He collects the venom from rattlesnakes found in the western part of the U.S. Venom is the liquid that comes out of the snake's fangs when it bites. Tony sends the venom to a lab, and the lab makes it into antivenin. When a poisonous snake bites a person, a doctor gives that person antivenin. This antivenin keeps the venom from killing the person. Tony has been earning his living this way for five years.

Tony's father has handled nearly 1,000 snakes in his lifetime. He has taught hundreds of people how to hold snakes. He has also shown them how to feed snakes and how to get venom from them. Not everyone can get used to the idea of picking up a snake. Many people heard scary stories about snakes when they were children and have been afraid of them ever since. Tony has been trying to educate people about the positive things snakes do. For one thing, they help control the rat and mouse population. Snakes are also very clean and quiet, and they rarely disturb humans.

Tony's job is very different from a lot of jobs, but it is a really important one. Without venom collectors, many people would be in real danger and some would die.

Read the article. Answer the questions.

Looking Ahead

The future is hard to see and plan—even for experts. Read the quotations below:

- "It will be years—not in my [life] time—before a woman will become prime minister [of the United Kingdom]." Baroness Margaret Thatcher said this in 1974, just five years before she became the first female British Prime Minister.
- "There is no reason anyone would want a computer in their home." Ken Olsen, who started Digital Equipment Corporation, said this in 1977.
- "It will take at least 200 years to put a man on the moon." Experts at the magazine *Science Digest* wrote this in 1948.

Yet some predictions are amazingly accurate. At about the same time that *Science Digest* made its prediction, British writer Arthur C. Clarke predicted a moon landing and missed the date by just one year. What are some of Clarke's more recent predictions?

- Space travel will soon become common.
- Within the next 1,000 years, we will be plugged into an Internet that lets us download the libraries of distant planets.

Will these predictions come true? No one knows right now. But there is one thing we can be quite certain about: Science and technology has become more and more important and it will affect our future in very powerful ways.

Will the end result be positive, helping people live longer, happier lives? Or will it be negative, perhaps destroying the environment through pollution and global warming?

The answer will probably depend on how we decide to use science and technology. For this reason, it is important to think carefully about the future. Maybe we can't predict it accurately, but we need to think about what could happen and how our lives will be in the future.

1. Find one prediction that did not come true.

_____

2. What did Arthur C. Clarke accurately predict?

_____

3. What is another prediction that Clarke has made?

_____

4. What is one thing about the future that we can be sure of?

_____

5. Will science and technology have a positive or negative effect on the future?

G READING

Read the article. Answer the questions.

The Psychology of Advertising

Instead of making claims about products, advertisements today often try to give people reasons to buy the products. This is where psychology—the study of how people think and behave—comes in.

Psychology is important to the way ads look. Advertisers use stories (e.g., the woman who made her family happy by buying the right soup, the man who was well-rested for his meeting after flying on the right airline) because people like to put themselves in stories. They use pictures more than words because we fantasize and daydream in pictures.

Psychology is important to the stories that ads tell. According to psychologists, people in our society have certain needs. Ads try to show people that they can meet these needs by buying products. Here are some of these needs and ads that appeal to them:

Friendship. We like to be part of a group of friends. Ads show us that if we drink a certain juice, we will belong to a group of friends who drink it too.

Success. A car goes up a driveway to an obviously expensive house. The person driving this car has had a lot of success in life. If we buy the car, we will too.

Escape. Sometimes our lives seem boring and we'd like to escape for a while. Car ads that show people driving a car to the top of a mountain do this. So do the McDonald's ads that tell us that we "deserve a break today."

Psychology even helps advertisers know who to advertise to. For example, children today have more and more influence on buying decisions. One mother says that her 6-year-old son kept asking her to buy a certain vacuum cleaner. He had seen the vacuum cleaner advertised during a children's TV show.

1. What are two things advertisers use in their ads?

_____

2. Generally, what do ads try to show people?

_____

3. What are three of the needs that ads appeal to?

_____

4. How are companies today getting children to influence their parents on what to buy?

_____
