People all over the world like travelling. They travel to see other countries, modern cities and ancient towns. Also, travel to enjoy beautiful places or to learn about other cultures and different ways of life.

People who live in the village often enjoy going to a big city to visit museums and big shopping malls, things they do not have in their **hometown**. People from the city often like a quiet holiday by the sea or in the mountains because they are tired of the noise of the city and they need to have a rest.

People travel by train, plane, ship or boat and by car. The fastest way of travelling is travelling by plane, but the most comfortable is travelling by ship and the cheapest is travelling by bus or car.

If we travel, we will see and learn many things that we can never see or learn at home. The best way to study geography is to travel and the best way to know people is to meet them at their homes.

A zoo is a place where animals are housed, cared for, shown to people. A zoo usually has animals that are from other countries and natures. They are used to teach people about animals around the world. Zoos give the chance for animals to be cared for and protected. The first **modern** zoo was opened in Paris in 1793. The first zoo was simply used to show off as many animals as possible. The animals lived in small cages and people did not care very well for the animal's health.

Today, zoos put the care and health of the animals first. Zoos are also used as research centres, meaning that the animals and the nature that they live in are studied carefully. They help us to know more about animals from the world and how they live. Zoos have programmes to save rare animals from death. They keep **them** in a safe environment in the zoo. They give food and care for the rare animals to help them become more in number.

Read the following passage then answer the questions below:

Chess is called the game of kings. People have been playing it for over 500 years. Chess is based on an older Indian game. The chess we play today is from Europe. Chess is a two-player game. One player uses the white pieces. The other uses the black pieces. Each piece moves in a special way. One piece is called the king. Each player has one. The game ends when a player loses his king. There are many rules for playing chess. They are very difficult.

16

Some people think that chess is more than a game. They think that chess makes the minds **stronger**. Good chess players use their brains when they think about what will happen next. These skills are useful in life and in chess.

Chess is not just for people. We can also play chess with computers. Playing chess with computers started in 1970s. At first, computers made mistakes. As time went on, they became smarter. In 1997, a computer beat the best player in the world. It was a very big computer called Deep Blue. By 2006, a cell phone could beat the best players in the world.

B. Reading Comprehension (16 Marks)

Read the following passage, then answer the questions below:

The bell rang. Our teacher had just finished explaining the lesson to the class. Before he could say another word, some of the students stood up. They were ready to head to the canteen quickly. Our teacher told them, "There isn't any need to run. Stay calm. There's much food and time for you to have during your break."

However, once he got out of class, the boys started running and pushing each other down the stairs. There was a lot of pushing, and laughing. Suddenly, there was a loud scream. One of the boys in front missed a step and fell off the stairs. He landed hard on the ground.

The boy had a broken arm and was crying out of pain. His friends quickly helped him up. The teacher called for an ambulance using his phone. While waiting for it, the other boys in the group were talking about the accident. They knew why their teacher asked them not to run on the stairs. Then the teacher said, "Let this be a lesson to you." The injured boy was then taken to the hospital. After one week, he returned back to school with a plaster on his arm. We all felt sorry for him.
