Module 1 : The Sustainable Self

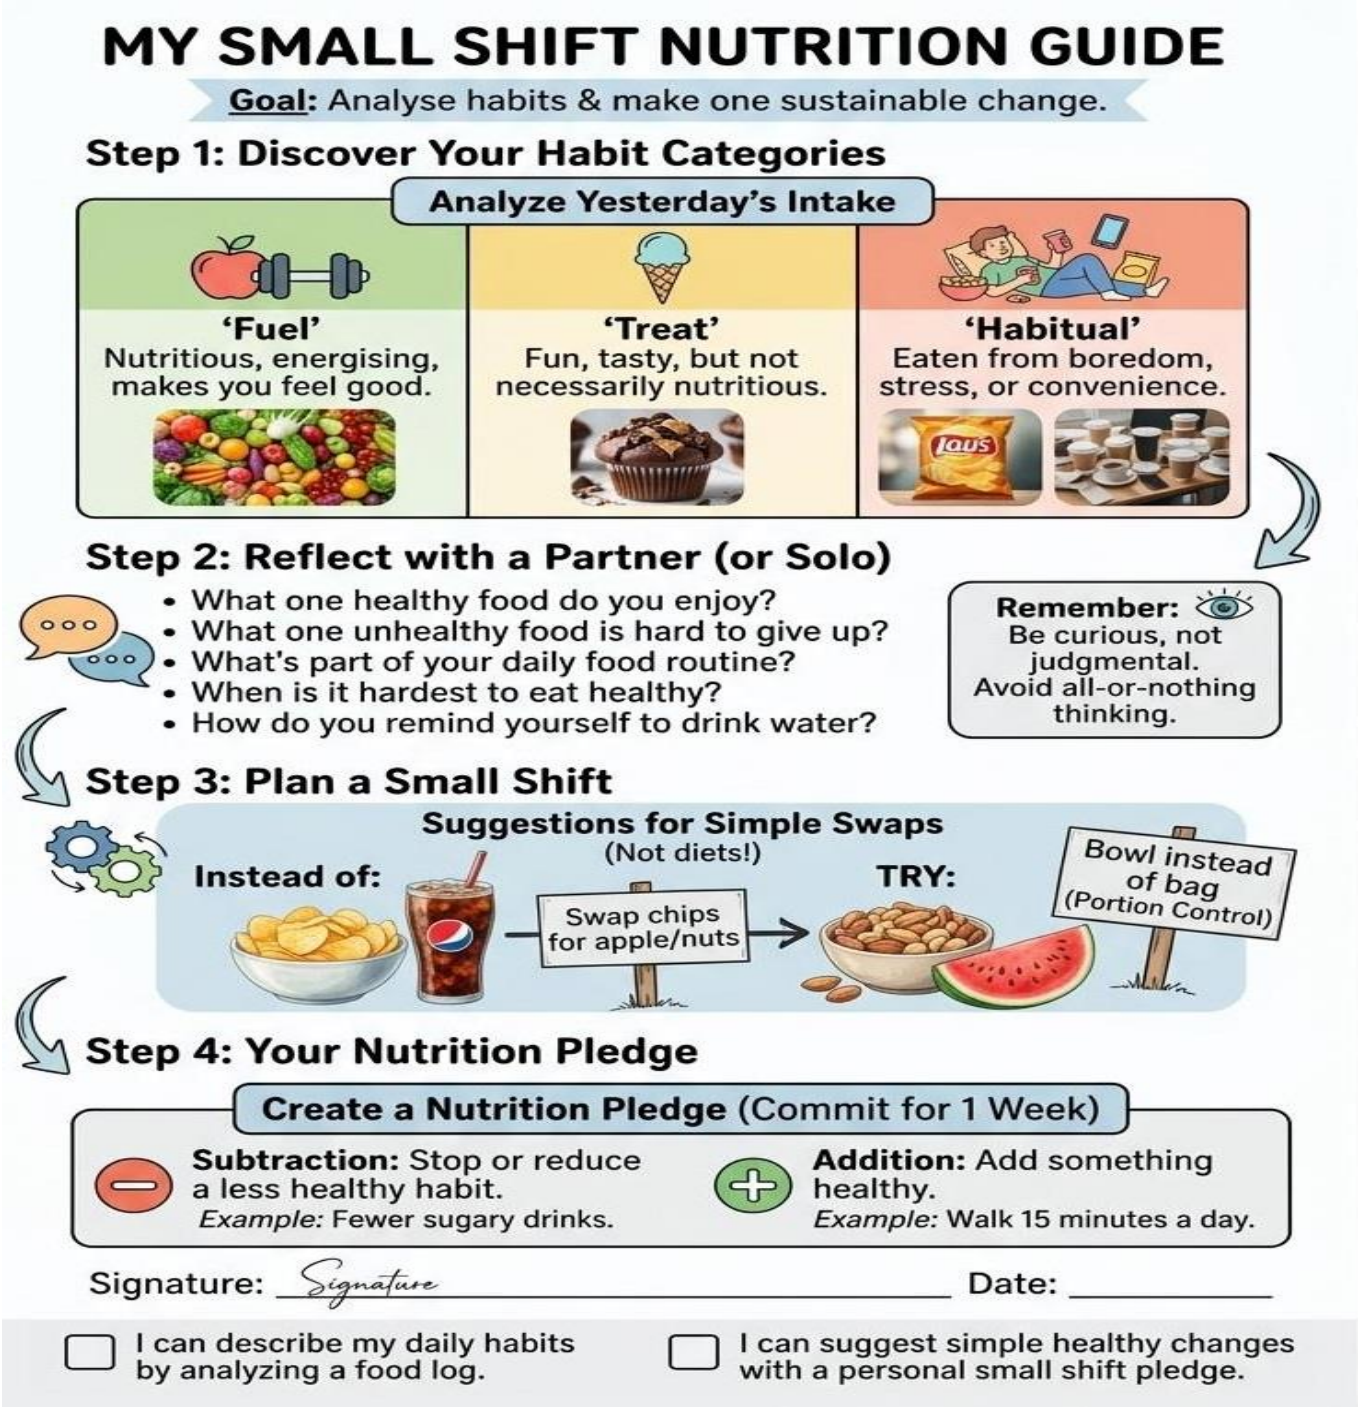

Unit 1 " The Science of Nutrition."

Introduction to Module 1 Unit 1

L1 Opener

(Food Log Reflection)

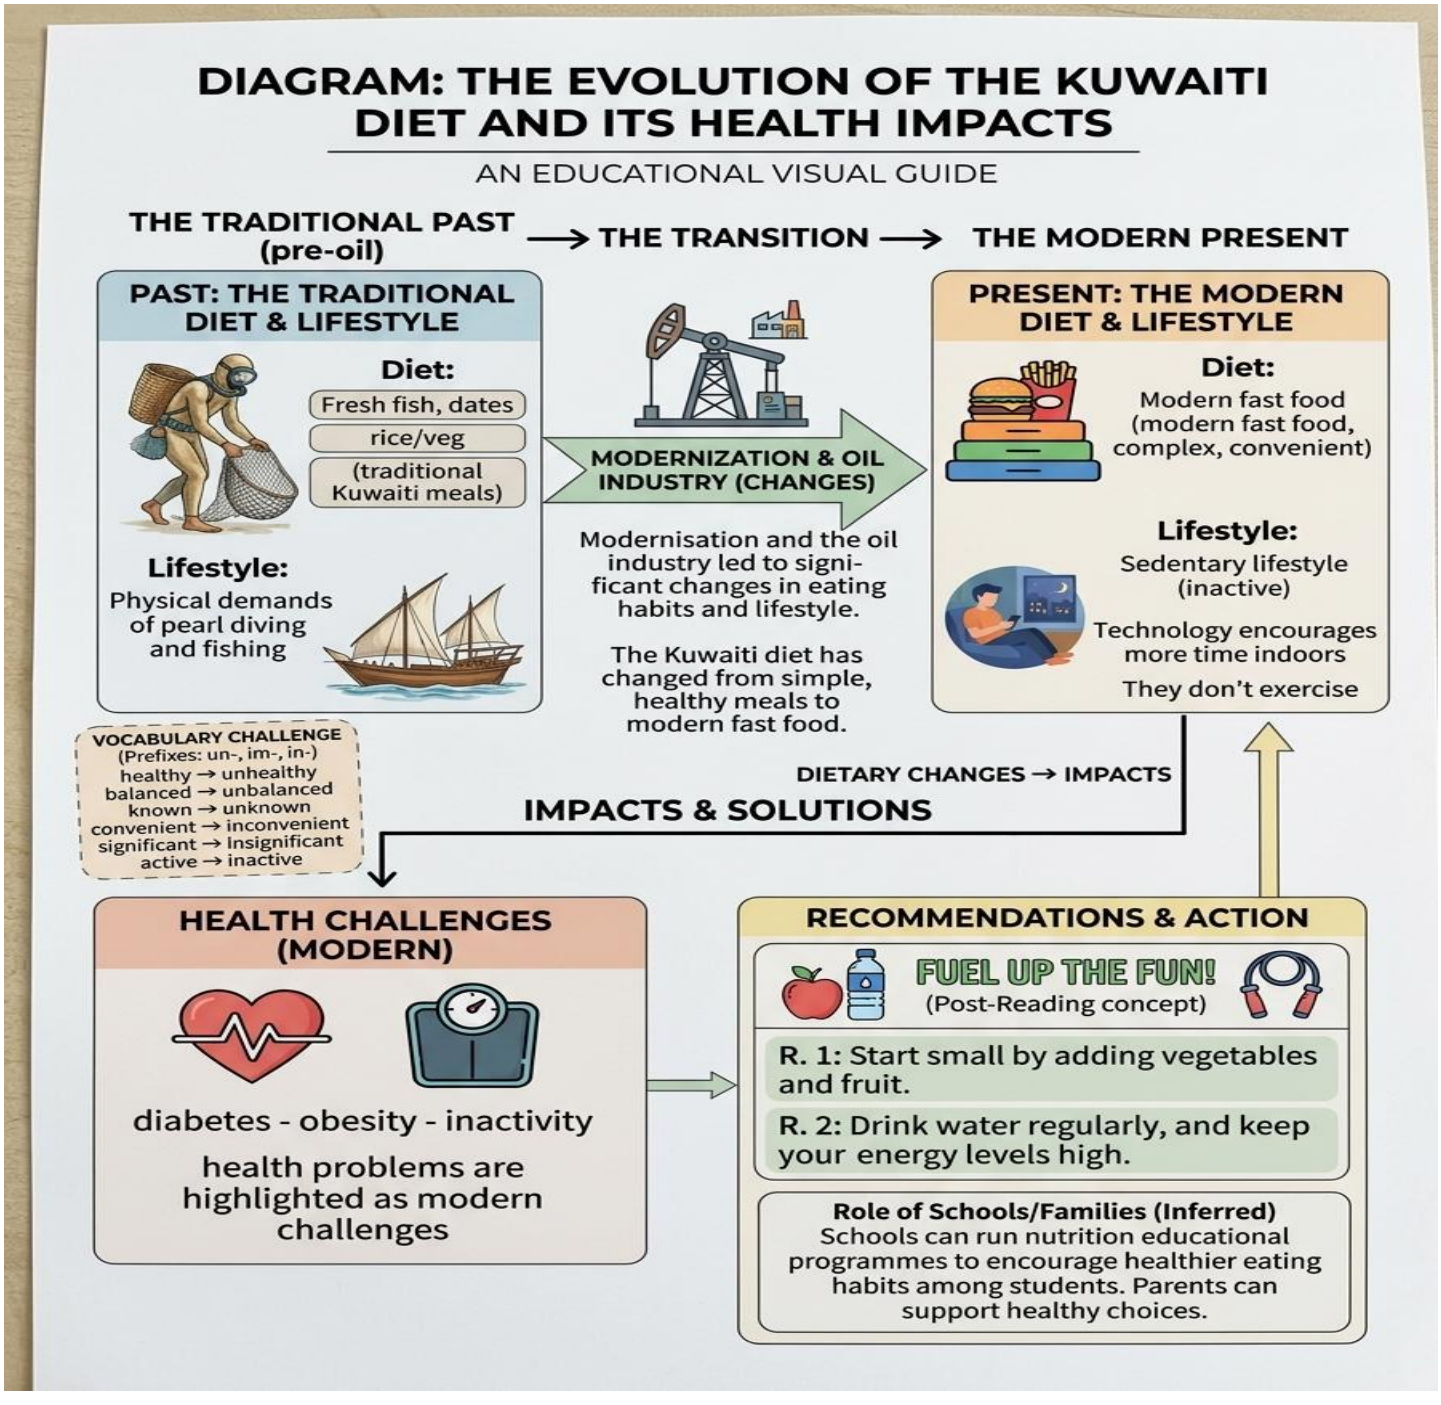

We should look at what we eat and make small healthy changes. First, you list your food by dividing it into fuel, treats, or habits. Then you choose one easy change – like swapping a snack or drinking a less sugar and commit to it for the week.

L 2 Reading

(The Evolution of the Kuwaiti Diet)

In the past, people in Kuwait ate simple, healthy food like fish, dates, and rice. Their active jobs kept them fit, so obesity was very rare. After oil was discovered, fast food and modern life changed how people ate. Cars and technology have made daily life much less active. Unhealthy eating and lack of exercise cause obesity and diabetes to rise. Many young teenagers became inactive and spent more time indoors. Today, schools run special programs to teach students how to eat well. These programs help kids eat more fruit and vegetables instead of fast food.

L4 Listening

(The Heritage Lunchbox)

Traditional Kuwaiti food is healthier for kids' school lunchboxes. Mothers discuss smart swaps, like using whole-wheat bread and reducing salt in cheese. These simple changes keep authentic heritage flavours while cutting down on processed ingredients and preservatives. Students need to practice designing their own school meals that balance local culture with healthy nutrition.

L5 Speaking

(International School Meal Systems)

There are many differences among international school meal systems across different countries. **Japan** uses a school lunch program called Kyoushoku to teach responsibility and health education. In contrast, the system in the **USA** relies mainly on personal choices where parents pack lunches daily. Meanwhile, **Finland** provides free, nutritious hot meals to ensure all students are treated equally regardless of income. Overall, the theme centers on evaluating different school lunch models to practice speaking, debating, and expressing personal positions.

L6 Writing

(Writing 8 sentences explaining the benefits of the healthy food options in the canteen and suggesting alternative options)

Introductory Sentence:
Replacing junk food with healthy options in our school canteen is very important for students' health and learning.

Supporting Idea 1:
Healthy food provides essential nutrients that give students natural energy during the day.

Supporting Idea 2:
Canteen should offer traditional fresh meals, fresh fruits and nuts.

A Concluding Sentence:
In summary, making smart canteen swaps will help students stay active, focused and healthy every day.

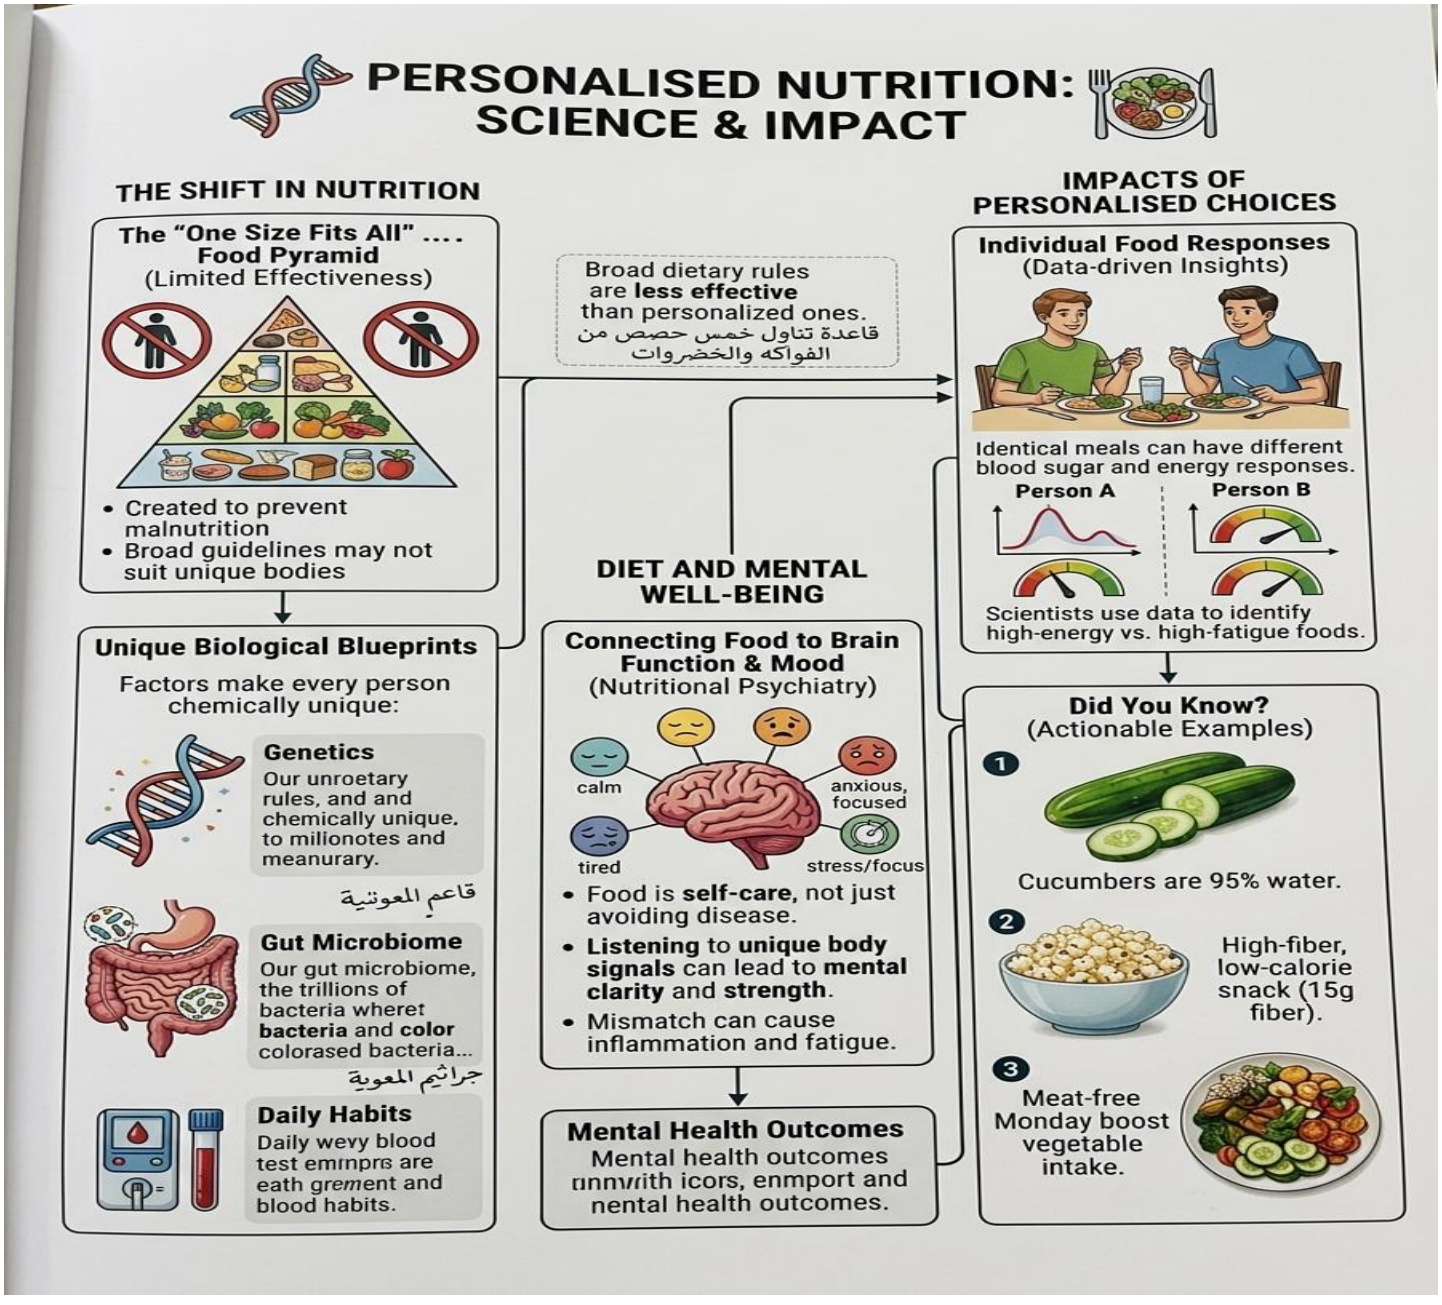

The topic

Healthy food options in the canteen give students energy to stay active throughout the school day. Eating nutritious meals like fresh fruit and whole grains supports their brain health. Good eating habits formed at school also protect them against long-term health problems like heart disease and diabetes. To make the menu better, the canteen could start serving some grain bowls packed with brown rice, vegetables, and lean proteins. Adding fruit with yogurt would give students a delicious, sweet alternative to packaged desserts. Swapping out sugary sodas for natural fruit is another simple way to boost daily nutrition. Replacing heavy fried items with baked pita chips or air-popped popcorn would also satisfy cravings without adding unhealthy fats. Offering these fresh choices helps everyone build better habits while making healthy eating habits.

L 7 Reading

(Personal Nutrition)

The concept of personalized nutrition, moving away from general "one size fits all" diet rules. General guidelines were originally created to prevent malnutrition, but science now shows that everyone processes food differently. Personal biology, such as genetics, gut microbiome, and daily habits, determines how an individual reacts to specific foods. Using DNA and blood tests helps identify which foods give a person energy versus those that cause fatigue or inflammation. The nutritional psychiatry links food choices directly to brain function, mood, and mental health. Ultimately, personalized nutrition focuses on tailoring diets to an individual's unique body and mind to boost both physical and mental strength.

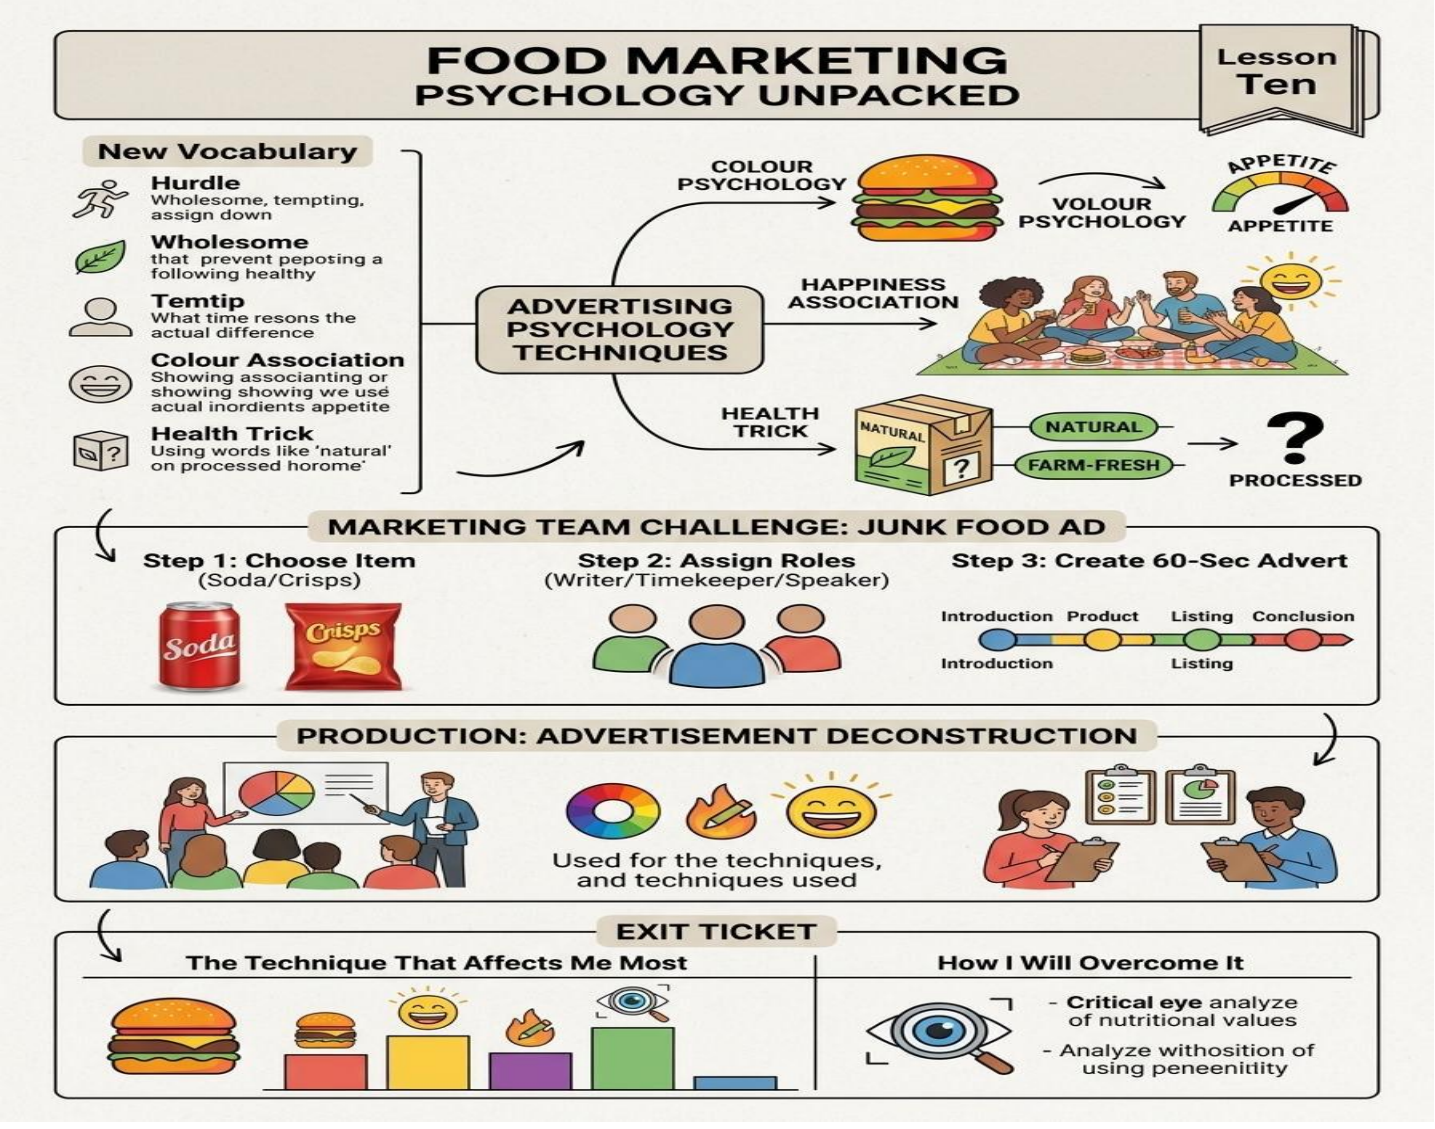

L 9 Listening (The Mediterranean Secret)

The Mediterranean lifestyle outlines the three main pillars of the lifestyle: a diet rich in plant-based foods and olive oil, socialising through shared meals, and regular physical activity like walking or gardening encouraging students to reflect on their own habits, suggest dietary swaps, and describe a day living in the Mediterranean lifestyle.

L 10 Speaking (Food Marketing)

This lesson page focuses on the concept of food marketing and how psychology is used to sell food products. It explores common techniques companies use to make processed or unhealthy items look and sound more appealing to consumers. Students learn how strategies like colour psychology, health tricks, and associations with happiness can influence buying choices and mindfully affect eating habits. The activities guide students to practice creating their own advertisements using these persuasive methods. Finally, it addresses the ethical side of marketing and encourages critical thinking about how consumers can overcome misleading techniques.

Global warming could cause drought and possibly famine in China, the source of much of Hong Kong's food, by 2050, a new report predicts. Hong Kong could also be at risk from flooding as sea levels rose. The report recommends building seawalls around low-lying areas such as the new port and airport. The report "Reclamations" published by the World Wide Fund for Nature (WWF), uses the most recent guesses on climate change to point to a **gloomy** outlook for China.

By 2050 about 30 to 40 per cent of the country will experience changes in the type of vegetation that survives, with tropical and sub-tropical forest conditions shifting northward and hot desert conditions currently rising in the west **where** the desert is temperate. Crop-growing areas will expand, but any benefit is expected to lose its glamor by moisture making it too dry to grow crops such as rice. The growing season also is expected to alter, becoming shorter in southern and central China, the mainland's breadbasket. The rapid changes make it unlikely that plants could adapt.

"China will produce smaller crops," Dr. Rik Leemans, one of the authors of the report, said during a brief visit to the territory yesterday, "there will be decreased production because of water limitations,". Famine could easily result and be expected because of the rising demands of population and diminished seen productivity of the land. "It looks very difficult as a whole," he said.

Choose the correct answer from a,b,c,and d:

1-The best title for this passage could be ……

a- Weather in China b- Problems of population
c-Dangers of Global Warming in China d- Development in China

2-The underlined word gloomy means:

a- glad and happy b- dark and depressing
c- global d- glittering

3-The underlined word where refers to……

a-The northward b- sub-tropical forest c-Hong Kong d – The west

4- The main idea of paragraph (3) is ……

a- The carcity of food in China. b. the effects of global warming
c-the spread of diseases d-The lack of forests in Honk Komg

5-The synonym of "benefit" is……..

a- advantage b- disadvantage c- dry d- rapid

6- All the following statements about the passage are FALSE EXCEPT:

a- Plants can't adapt to weather changes.
b- Famine is a result of overpopulation.
c- There is a light image about the future of China.
d- Lack of water doesn't affect the problem of famine.

Answer the following questions:

7- China will produce less crops Because of :
Water limitations

8- Why could Famine be easily expected?
because of the rising demands of population and diminished seen productivity of the land.

Summary Making

Read the following passage then do as required:

I am surprised that you seem to find no fault at all with computers. I quite agree with you that they are excellent means of entertainment and a valuable source of information. But you seem to forget that they have also become a source of addiction to many children. A lot of mothers nowadays complain about the fact that their children have become so obsessed with their computers and the internet, that they lose contact with their friends and so grow lonely. Besides, their health is affected as they spend long hours sitting in front of the screen. Their eyes hurt and their backs ache. In addition to that they become less performing at school because of this time-consuming activity. They do not find time to do their homework well or to do some reading. Apart from that, using the internet for a long time may lead to the impoverishment of young pupil's language skills because the language used on the internet isn't only full of mistakes but often consists od abbreviations and unfinished sentences, which doesn't help young pupils to improve their language.

In a paragraph of four (4) sentences, only summarize and paraphrase the previous passage in an answer to the following question:

Introduction to Module 1 Unit 2

L1 Opener

(Sustainable Living)

This page is about sustainable living and how we interact with our environment. It shows different kinds of energy, such as wind turbines and oil tanks. The lesson teaches about waste management through recycling bins, landfills, and donating second-hand items. It also highlights how trash and waste can harm sea animals. Finally, students practice talking about eco-friendly topics and giving helpful advice.

Lesson Two: Reading

The Shagaya Renewable Energy Park

Kuwait has traditionally relied on fossil fuels like oil and natural gas to generate electricity, which produces harmful emissions. Kuwait launched a national project called the Shagaya Renewable Energy Park, managed by the Kuwait Institute for Scientific Research (KISR). The Shagaya Renewable Energy Park utilizes renewable energy sources such as solar and wind power to generate electricity. A key national goal of the park is helping Kuwait produce 15% of its energy from renewable sources by the year 2030. Using clean energy reduces the need to burn oil, thereby lowering harmful emissions and creating a healthier environment. Ultimately, the Shagaya Renewable Energy Park demonstrates Kuwait's commitment to building a more sustainable future for future generations.

Lesson Four: Listening
Smart Homes, Smart Choices

The lesson focuses on various renewable energy and sustainable development projects located within the GCC region. It highlights specific initiatives such as solar plants, wind farms, and sustainable cities like Masdar City. Students are guided to analyze facts about these projects, including their locations, aims, and benefits. Finally, it provides exercises for learners to practice discussing and interviewing about these green energy efforts.

Lesson Five: Speaking
Powering a Greener GCC

This lesson focuses on powering a greener GCC through various renewable energy initiatives. It highlights specific projects like solar and wind parks in Kuwait, Saudi Arabia, the UAE, and Oman. Students learn to extract key information from fact files about sustainable urban and energy projects. The practice activities guide learners to conduct informative interviews discussing the benefits of these environmental projects.

Lesson Six: Writing
Power With Purpose

Let's Write

Caring for your home means caring for the planet and creating a better future.

3 **Plan and write** a paragraph of no fewer than **8 sentences** (approximately **90 words**) explaining why **responsible choices at home** and **suggesting smart technology to install.**

Outline

An Introductory Sentence:

Making responsible choices at home helps us save energy and protect our planet.

- **Supporting Idea 1:**

We can make good choices by turning off lights when we leave a room and not wasting water.

- **Supporting Idea 2:**

We should also install smart technology like smart thermostats and smart LED lightbulbs to save power automatically.

- **A Concluding Sentence:**

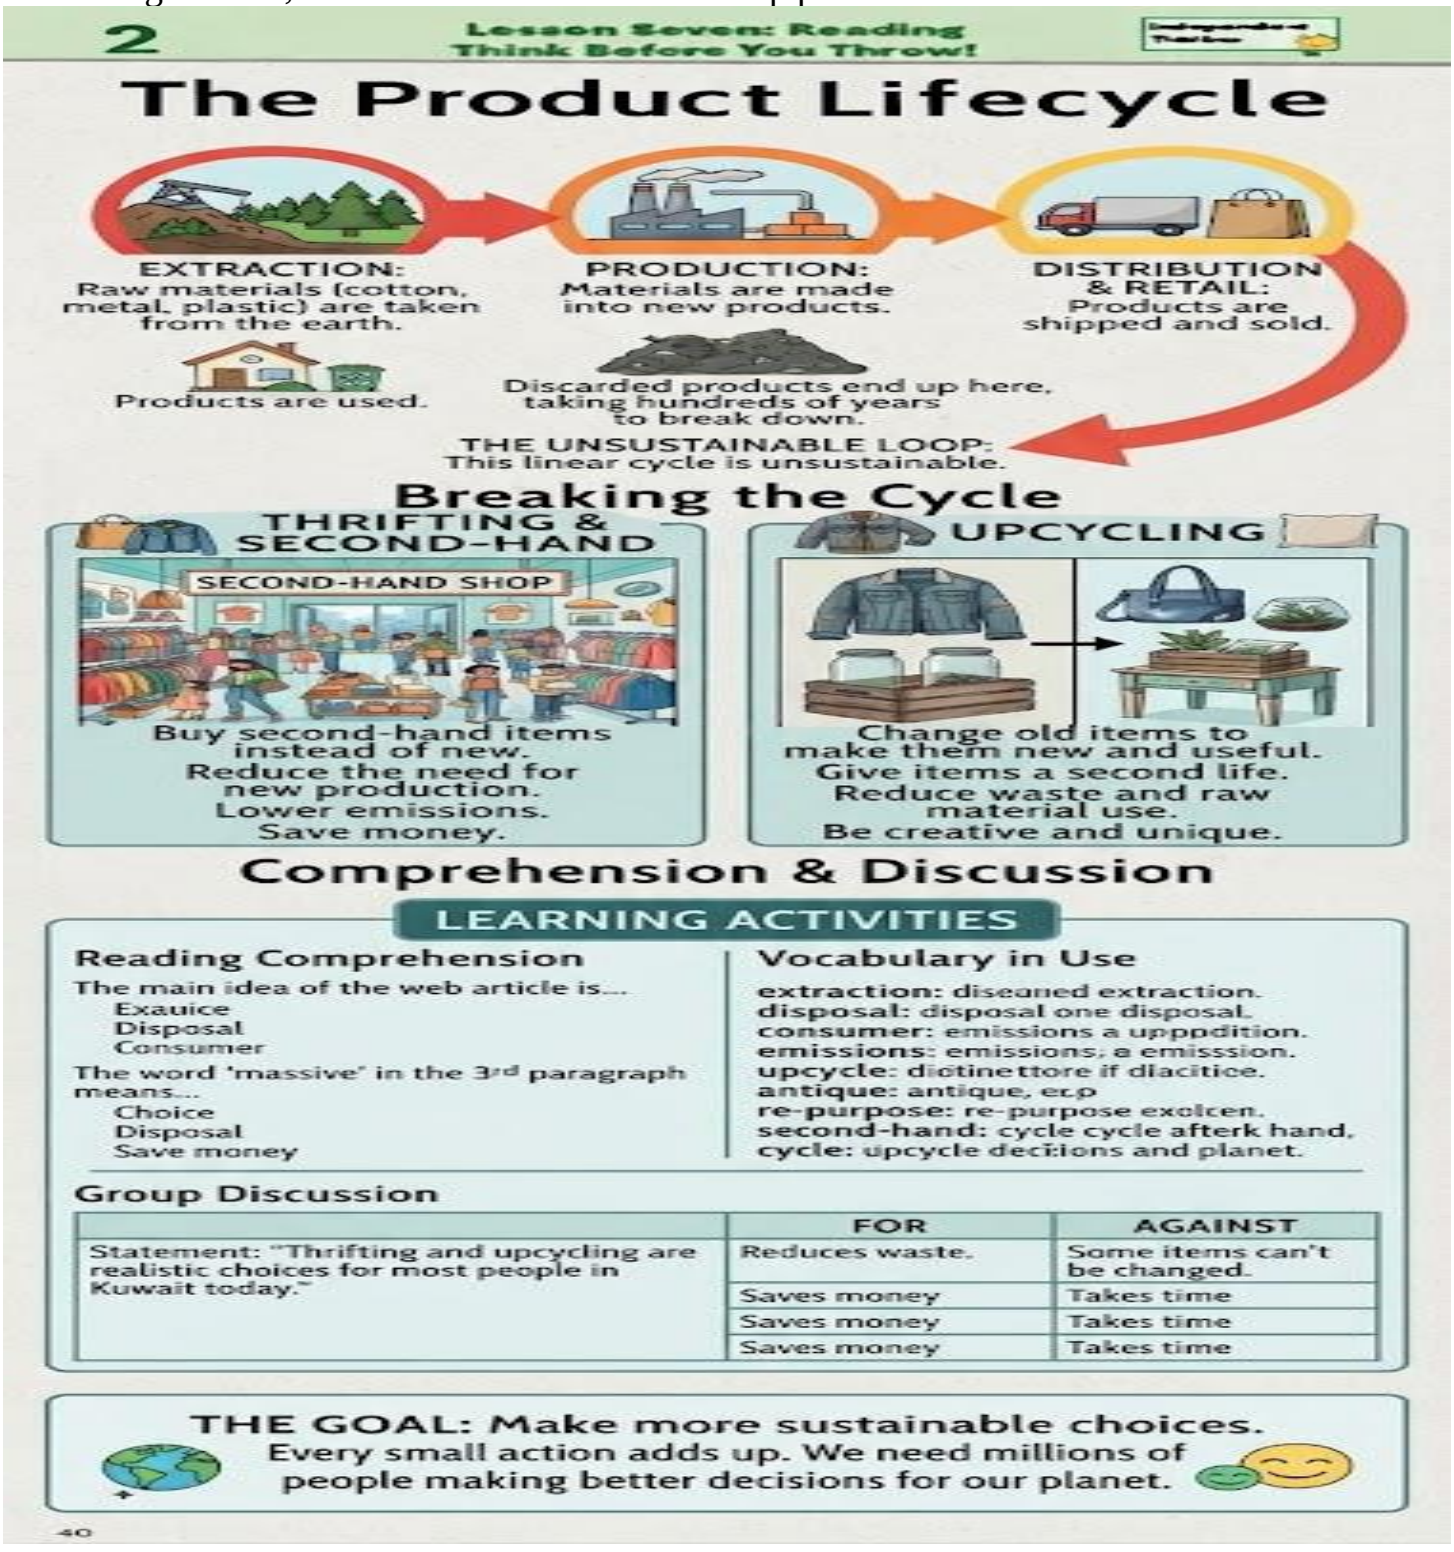

Taking care of our home with smart habits and technology makes the world a better place.

Paragraph

Making responsible choices at home helps us save energy and protect our planet. We can make good choices by turning off lights when we leave a room. It is also important to save water every single day. We should also install smart technology to help us. Putting in a smart thermostat is a very smart idea. It can control the house temperature automatically. We can install smart LED lightbulbs too. They use less electricity than normal lights. Taking care of our home with smart habits and technology makes the world a better place.

Lesson Seven: Reading
Think Before You Throw!

The lesson is titled "Think Before You Throw!" and focuses on product life cycles and sustainability. It explains how raw materials are extracted, turned into products, and eventually end up in landfills. It highlights thrift shopping and buying second-hand items as ways to reduce the need for new production and lower emissions. It discusses upcycling, which involves changing old items to make them new, useful, or more beautiful. It encourages making smarter, more sustainable choices to help protect the environment and reduce waste.

Lesson Eight: Grammar

1st If Conditional and Modal Verbs

Form: If + present simple, modal verb

Lesson Nine: Listening
Rethinking Waste Worldwide

The theme of the lesson focuses on listening to a documentary about waste management systems worldwide. It explores different methods of handling rubbish such as burial, incineration, sorting, and composting. Students discuss recycling steps and what happens to rubbish after disposal. Finally, learners practice comparing these global techniques to recommend a suitable waste management system for Kuwait.

Lesson Ten: Speaking
Throw-away Culture

This lesson focuses on speaking about "Throw-away Culture" and introduces new vocabulary such as brand-new, outlive, seldom, manufacture, and strict. Students watch a documentary clip and discuss the life cycle and environmental problems of various items like t-shirts, mobile phones, and paper cups. Learners plan and write a script for a one-minute documentary that covers an item's process, problems, solutions, and final advice. Finally, students evaluate and present their documentary-style speeches to the class while using appropriate sequencing language.

🕮Reading Comprehension Passage

Read this passage then answer the questions Below:

Most children in poor countries don't have enough food to eat. They don't have the fancy clothes, toys and other things that children of more developed countries have. Instead of going to school to gain a good education, children in underdeveloped countries set out to work from as young as four or five years old. By the age of twelve, most of them are given the responsibilities of looking after and supporting their parents who are often weak from hunger and ill health.

Deprived of any form of education from such a young age, these underprivileged children are forced to take up illegal odd jobs which often have hazardous and unsuitable working conditions. Since it is illegal for young children to work, the corporations or factories that do hire these children hide them away from the main working areas. **They** trap children for long stretches of time in dark and dirty rooms. In India, for example, there are children who work in factories which manufacture matches. The working hours in these factories are long and the work is tedious, but what is most significant is that such factories are potential fire hazards. Not only do these children risk their lives by working, but they are also exploited as they are paid minimal wages.

The United Nations encouraged countries to prohibit the import of products made by children under the age of 15. We may think such measures will stop the problem of child **exploitation**, but the truth is they may lead to other problems. Even though the garment factories may be exploiting children by paying them low salaries, they do nevertheless provide them with a more or less safe working environment and proper jobs. Dismissing children from work does not necessarily mean that children will no longer work. In fact, they may end up in the hands of drug pushers or other criminals and lead a life of vice selling drugs or steal for a living.

A- Choose the best completion from a, b, c and d :

1- The best title for this passage is ……

a- The problems of poor countries b- Lack of jobs in poor countries

c- Working children in poor countries. d- Good education for children.

c- providing safe environment d- misusing children in poor countries

4- Dismissing children from work may lead them to……

a- sell drugs or steal b- have safe working environment.

c- have enough to eat. d- stop the problem of children work.

5- Which of the following statements is not True about the passage:

a- Factories try to exploit children in poor countries.

b- Children are trapped in dark and dirty rooms.

c- Children are paid minimal wages.
d- Children should work and learn at the same time

B- Answer the following questions:

6- Where do factories hide the children?

II Summary-Making

- Read the following passage, then do as required below:

Most students fail because they are afraid, above all else, of failing, of disappointing or displeasing the many anxious adults around them, whose limitless hopes and expectations for them hang over their heads like a cloud. In addition, they are bored because the things they are given and told to do in school are so trivial, so dull, and make such limited and narrow demands on the wide spectrum of their intelligence, capabilities, and talents. Furthermore, school regulations might also affect their standards and cause them to fail. Finally, bad companions are a fundamental reason of students' failure.

In a paragraph of four (4) sentences, only summarize and paraphrase the previous passage in an answer to the following question: (4 x 15 =60 Marks)

Why the author believes that MOST children fail.

Lesson One: Opener

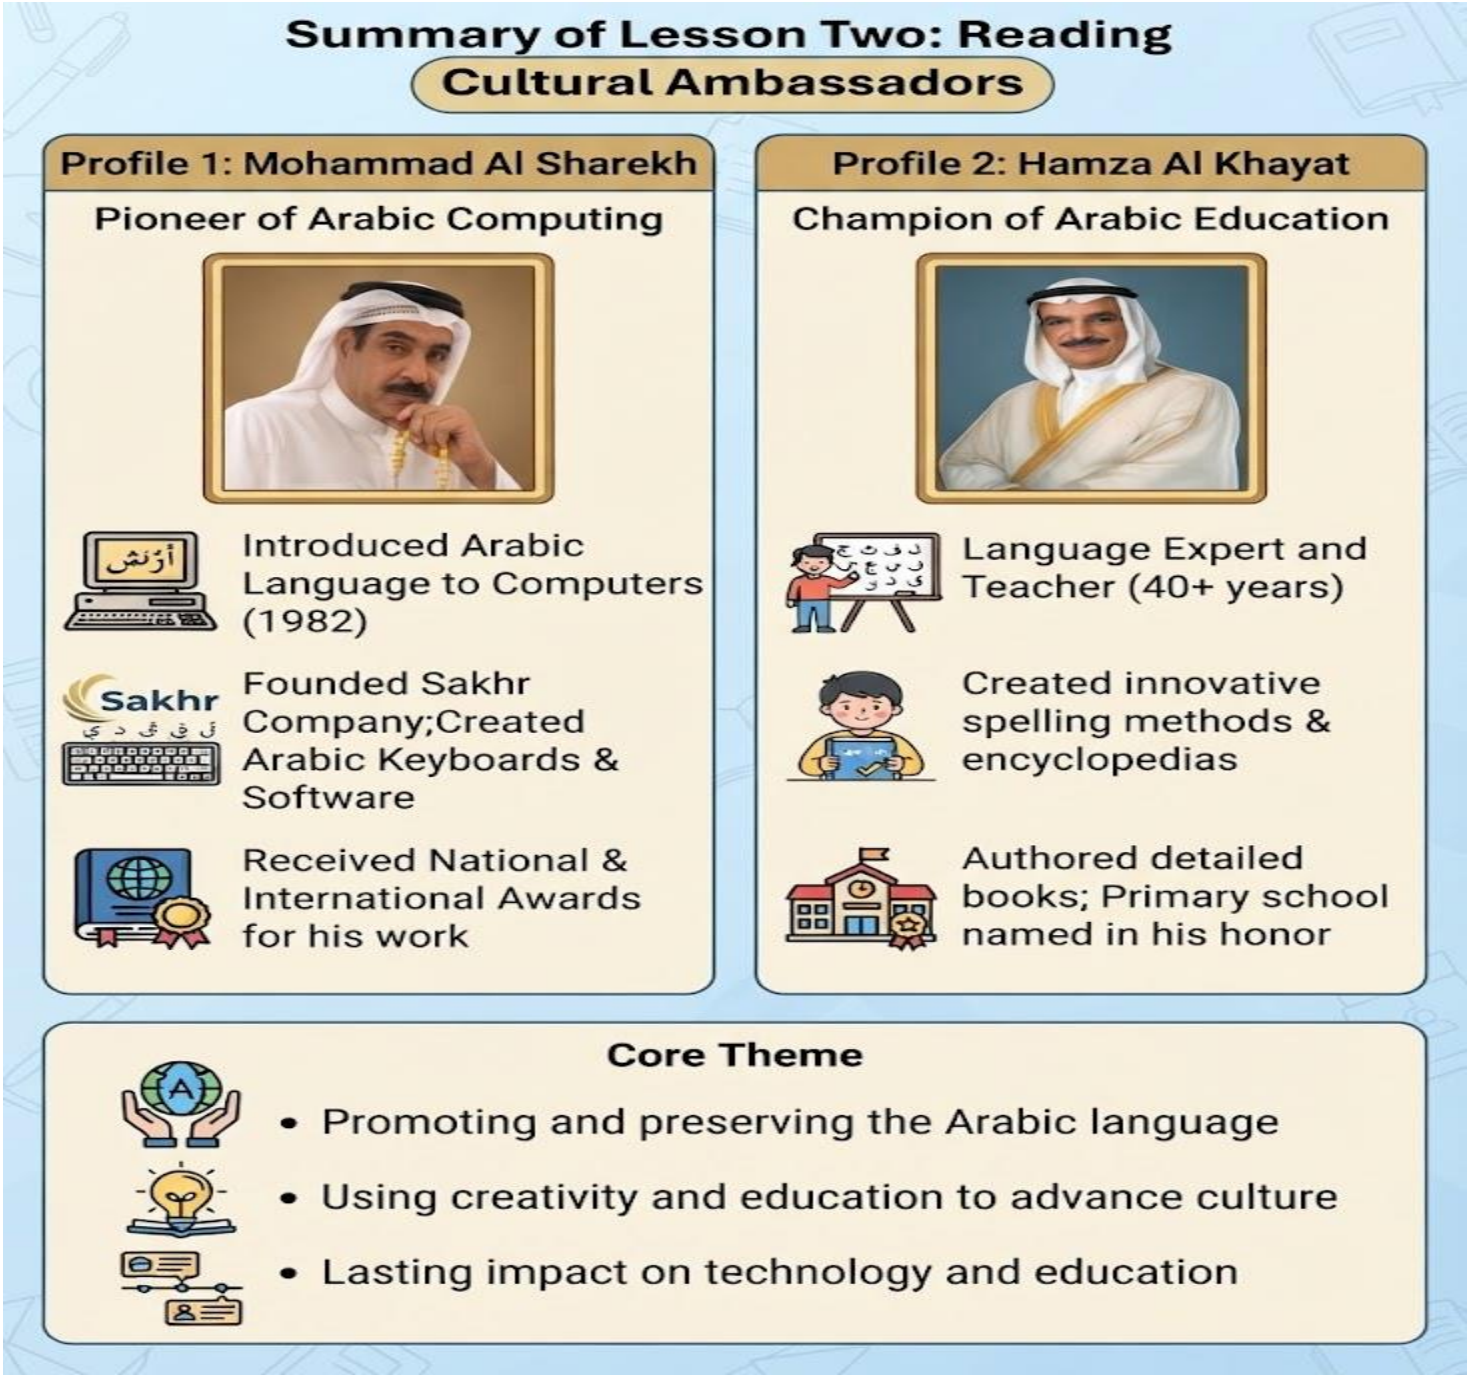

Stamps That Tell Our Story

The theme of this lesson is exploring how historical stamps tell the story of Kuwait's cultural heritage. It focuses on traditional life, values, and national symbols through pictures on postage stamps. Students learn and practice new vocabulary words related to history, evidence, and cultural traditions. The activities encourage learners to discuss past ways of life, such as trading and fishing. Finally, it prompts students to reflect on their national identity and design a modern digital stamp.

Lesson Two: Reading
Cultural Ambassadors

This lesson focuses on cultural ambassadors who have made significant contributions to the Arabic language. The first profile highlights Mohammad Al Sharekh, a Kuwaiti businessman and creator who introduced the Arabic language to computers. He founded Sakhr Company to develop Arabic computer programmes, keyboards, and automatic translation tools. The second profile features Hamza Al Khayat, a famous Kuwaiti teacher who dedicated over forty years to improving Arabic education. Both individuals served as cultural ambassadors whose legacy continues to influence and support the Arabic language.

Lesson Three: Grammar

Non-Defining Relative Pronouns and Clauses

Use / Meaning	Form: who=people | which=things | whose=possession | where=places | when= time

We use **non-defining relative clauses** to give extra information. The sentence is still complete without this extra information.

Non-defining relative clauses add extra information about:

- People: *Mr Jamal, **who really enjoys his job**, is a history teacher.*
- Things: *This car, **which is very expensive** , has a very unique style.*
- Possessions: *My sister, **whose name is Mariam**, is 13 years old.*
- Places: *In Qatar, **where he was born**, Salem has become famous.*
- Time: *In February, **when we celebrate National Day**, the streets are full of flags.*

From a, b, c, or d, choose the best option to complete each sentence.

1. Mr Jamal, _____ really enjoys his job, is a history teacher.

A) which **B) who** **C) whose** **D) where**

2. This car, _____ is very expensive, has a very unique style.

A) who **B) where** **C) which** **D) when**

3. My sister, _____ name is Mariam, is 13 years old.

A) who **B) which** **C) where** **D) whose**

4. In Qatar, _____ he was born, Salem has become famous.

A) when **B) where** **C) which** **D) who**

5. In February, _____ we celebrate National Day, the streets are full of flags.

A) whose **B) where** **C) who** **D) when**

Lesson Four: Listening

Stories Beyond the Walls

This lesson focuses on historic forts in the GCC region. It explores how these old structures were built to protect people and places. Students listen to a podcast about famous heritage sites like The Bahla Fort, The Zubarah Fort, and The Red Fort. The lesson also encourages students to think about local historical places that could become UNESCO sites.

Lesson Five: Speaking

Big Dreamers

This lesson focuses on big dreamers and inspiring individuals who make a difference. It features short profiles of imaginary characters, including a mechanical engineer in space technology, a humanitarian leader, and a filmmaker documenting cultural heritage. Students practice speaking skills by imagining their own future profile 10 years from now. They learn how to give a talk sharing their future achievements, inspirations, and an inspiring message to others.

Lesson Six: Writing

Honour, Inspire, Remember

3 **Plan** and **write** a paragraph of no fewer than **8 sentences** (approximately **90 words**) **suggesting different ways to honour distinguished people** and **providing examples.**
Your outline should include:

Outline

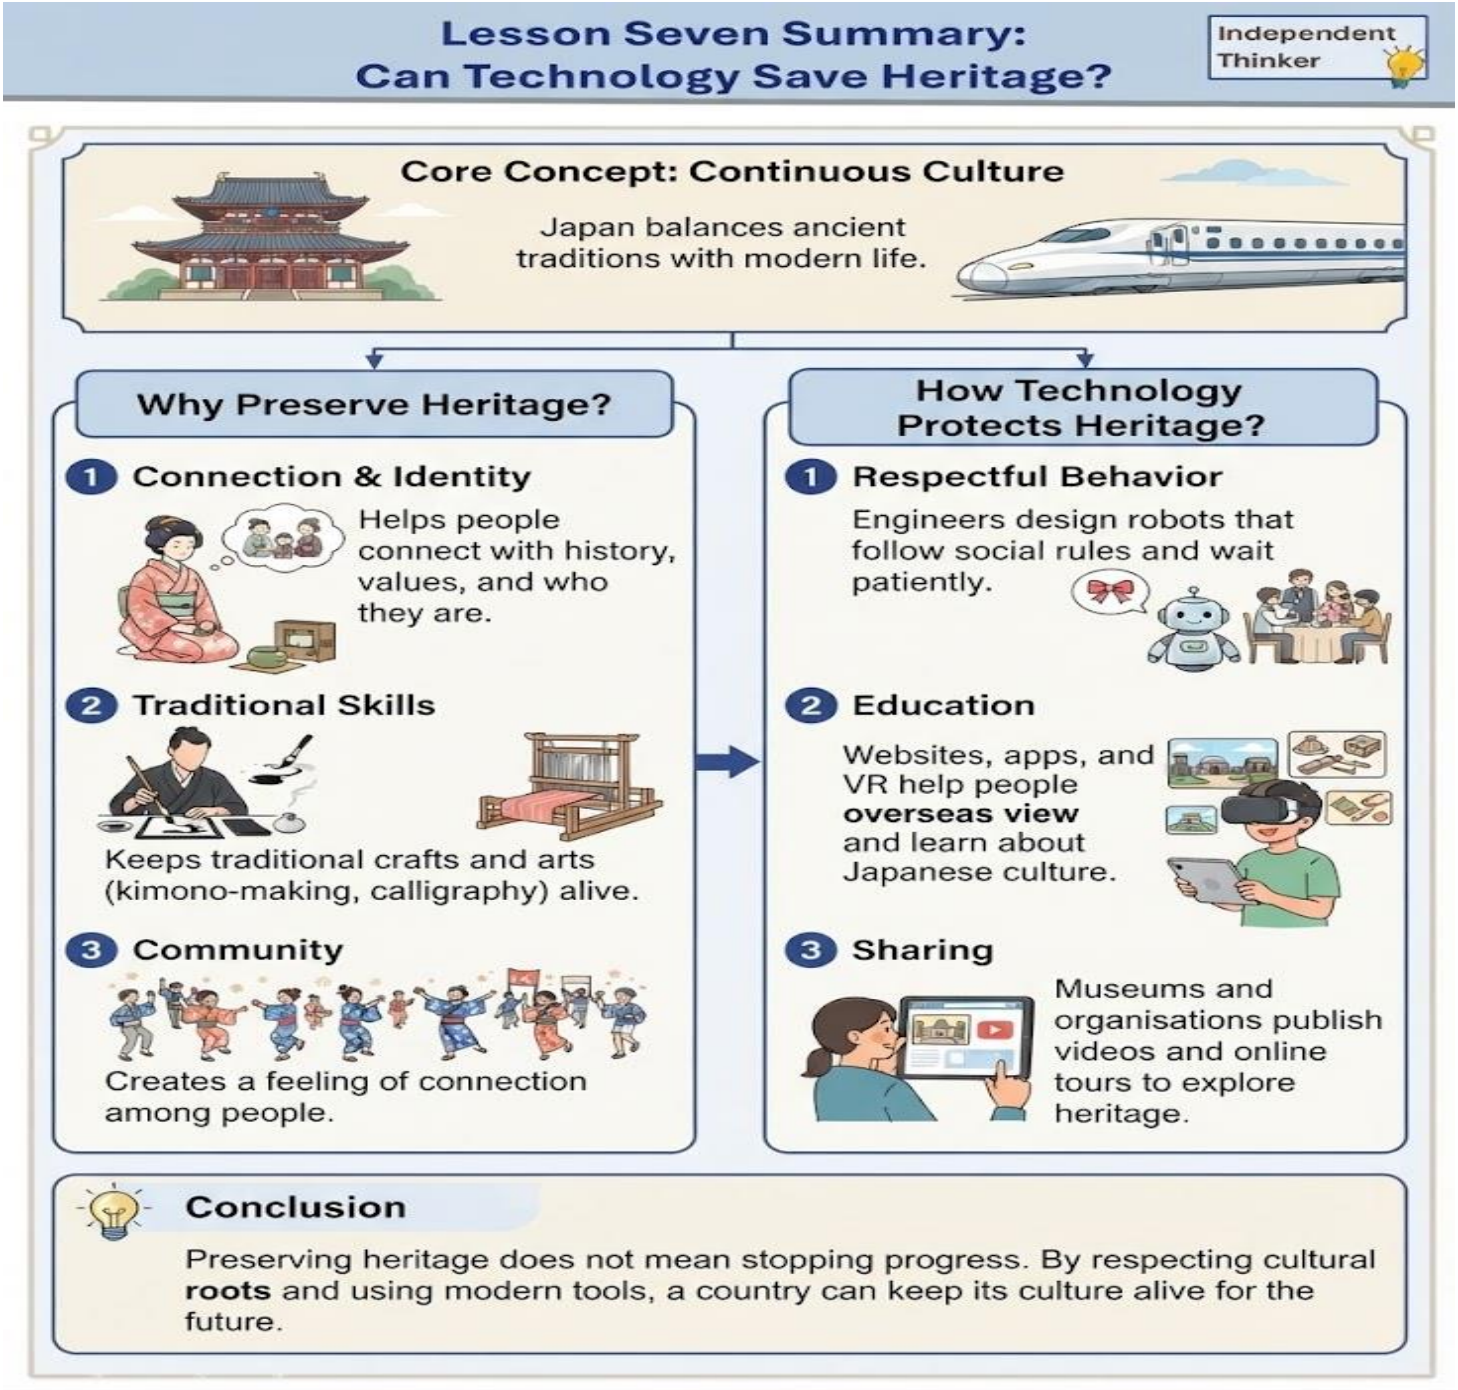

An Introductory Sentence:
Honoring special people is very important because it shows we appreciate their hard work.
Supporting Idea 1:
One good way to honor them is by naming buildings after them so people remember them forever.
Supporting Idea 2:
We can also honor them by putting their pictures or stories in museums.
A Concluding Sentence:
In the end, thanking distinguished figures in these ways is important because it shows we truly value their great contributions.

Honoring special people is very important because it shows we appreciate their hard work. One good way to honor them is by naming buildings after them so people remember them forever. For example, a primary school can be named after a famous teacher to show respect, which keeps their good name alive in the community. We can also honor them by putting their pictures or stories in museums. For instance, a museum can display the tools and books of a great writer to help young people learn about their achievements and feel inspired. In the end, thanking distinguished figures in these ways is important because it shows we truly value their great contributions.

Lesson Seven: Reading

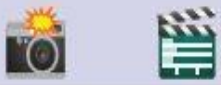

Can Technology Save Heritage?

This lesson explores how a country can stay modern without losing its old heritage. It uses Japan as an example of a continuous culture, where traditions and modern technology live together. Preserving heritage helps people connect with their history, values, traditional skills, and arts. Japan also uses modern technology, like robots and apps, to support and share its traditional culture with others. In conclusion, keeping cultural roots alive does not mean stopping progress.

Lesson Nine: Listening
Continuous Culture: Sadu Weaving

This lesson, titled "Continuous Culture: Sadu Weaving," introduces new vocabulary words such as identity, dye, decorative, classic, and bridge. The pre-listening activity engages students in matching various Sadu patterns with their corresponding meanings like stars, water, scissors, and snake paths. During the listening portion, students listen to an informational talk to answer comprehension questions and evaluate statements as true, false, or not given. Finally, the post-listening section allows students to design their own Sadu product by drawing a pattern, naming it, and using designated helpful language to explain its importance.

Lesson Ten: Speaking
Hidden Gems

This lesson focuses on the theme of discovering "Hidden Gems" like The Secret Garden in Salmiya to emphasize community cooperation and environmental protection. It explores core values such as kindness, unity, wisdom, appreciation, innovation, and tradition through collaborative practice. Students engage in role-playing exercises to discuss how apps and artificial intelligence can promote these cultural values in Kuwait. Finally, the lesson concludes with production tasks where learners share app ideas, vote on the best concepts, and use functional language to justify their choices.

🕮Reading Comprehension Passage

Tom had strange ideas of fun. His favourite way of amusing himself was to annoy other people. But the day of the fire was the day he learnt his lesson. In some parts of the town where Tom lived there were fire alarms in the streets. You had to break the glass and turn a handle; that was all, and then the firemen came to put out the fire. Tom would start one of these alarms and then enjoy watching the fire engines as they raced down the street looking for the fire. He used to hide behind a wall at the corner of the street and laugh as the firemen discovered that there was no fire and got back angrily on to their engines.

Tom told some of his friends at school about the fun he was having and the result was that there were soon boys all over the town who went about starting false alarms of fires. In the holidays Tom liked to do chemistry **experiments** in his bedroom. One day there was an accident He was using a burner to heat some liquid, when suddenly he knocked it over, and in a few moments **his** bed was on fire. Tom saw immediately that firemen would be needed to put the fire out. At top speed he ran downstairs and out of the house and along the street to the corner where the fire alarm stood. There for a moment his heart stopped beating; it was broken. Tom turned to look back at his house.

Black smoke was beginning to climb up from his bedroom window. He stood by the fire alarm, not knowing what to do. It seemed that his home was about to be burnt down perhaps because of a trick which some other foolish boy had learnt from him!

At the sound of a clanging bell his fear changed suddenly to hope. Yes, it really was the fire engine that came racing down the road! Although he never discovered who started the alarm, he knew he was luckier than he deserved to be by chance, an unknown boy's silly trick had had useful result.

From a, b, c and d choose the right answer:

1- The main idea of the passage is:

a) not to make foolish tricks
b) not to make fire
c) not to call fire engines
d) to make tricks

2 -The word "experiments" in line 12 in the second paragraph means:

a) making fire
b) testing
c) school subject
d) putting out fire

3 - In the second paragraph the pronoun "his" refers to:

a) Tom
b) Tom's friend
c) a fireman
d) an inventor

4- All the following statements about the passage are TRUE EXCEPT:

a) Tom likes funny tricks
b) Tom was using a burner when his house was on fire.
c) Tom's home was burnt down.
d) A boy's silly trick saved Tom.

5 **- In the holiday, Tom was fond of……**

a) Mathematics
b) Chemistry
c) Physics
d) Biology

6- When Tom used to start false fire alarms, the firemen…….

a. laughed at what happened

II Summary-Making

- Read the following passage, then do as required below:

It is well known that some cultures prefer sons to daughters. Sons are wanted because they can work to help the family earn income. Also, sons will be able to support their parents when the parents are old. In some countries, sons are important because the family name will continue for another generation. This is because the wife in these cultures takes her husband's family name, and sometimes belongs to the husband's family. Not only that, but having a daughter can sometimes cause difficulty for the family. In India, for example, having a daughter can be a burden. Families must save a lot of money to pay a dowry when the girl gets married. According to a survey done in 2000, people in some developed countries would prefer to have daughters. Researchers said that parents in these societies do not have the same economic reasons that exist in other countries, so they do not need to have a son to help make money.

In a paragraph of four (4) sentences, only summarize and paraphrase the previous passage in an answer to the following question:

Why do people prefer to have sons in some countries?

🕮Reading Comprehension Passage

Read the following passage then answer the questions:

I have returned to my hometown of Wilson Creek after an absence of 10 years. So many things have changed around here. When I left Wilson Creek, there was a small pond on the right as you left town. They have filled this pond, and they have built a large shopping mall there. There is a baseball stadium on the outskirts of Wilson Creek which has been changed completely. They have now added a new **stand** where probably a few thousand people could sit.

The biggest changes have taken place in the downtown area. They have pedestrianized the center, and you can't drive there anymore. A European-style fountain has been built, and some benches have also been added along with a grassy area and a new street cafe. My street looks just the same as **it** always has but a public library has been built in the next street along. There used to be a great park there, but they have cut down all the trees, which is a pity. The library now has a large green area in front of it but it's not the same as when the park was there. A Chinese and an Italian restaurant have opened in the town center, and a Mexican restaurant has opened near my home. This is where I am going tonight!

From a , b , c and d choose the right answer:

1) The underlined word (stand) means ----------
a. park b. position c. restaurant d. tree

d- The stadium of Wilson Creek which has become bigger.

6) Why can't People drive through the center of the downtown ?
……
……

7) What kind of restaurants have opened in the town center?
……
……

SUMMARY MAKING

Read the following passage, then do as required:

The tiger is the largest of all the cats. This wild mammal is found in some remote forests and rainforests in East Asia. At present, the tiger is an endangered species in the wild. There are many things we might do to save this animal. Tigers would survive if we stopped cutting down the rainforests where they live. The best thing to do is to create natural reserves for this rare animal is another step that can help. Also, if biologists took care of the existing tigers, they would protect them. And if we all stopped illegal tiger trading, hunters wouldn't kill them. If we took these actions, the situation of this species would become better and tigers wouldn't be in danger of extinction.

In FOUR sentences, summarize the passage in answer to the following question:

What can we do to save tigers from extinction?
