Read the following passage carefully, then answer the questions that follow:

As technology and the number of people with access to the internet have grown, people are turning to mobile applications for a variety of everyday tasks. For example, driving has never been easier than it is now, thanks to the taxi booking applications in app stores and online pages all over the world. Currently, there are several taxi booking applications available, and **they** are free to download.

One of the advantages of taxi booking apps is the **various** payment options. That is, you can pay online beforehand or cash on delivery. There are no taxis on the road that accept card payments. If you do not have cash, you will not be able to stop a road taxi. So, the best solution will be to order a taxi through the app. Another advantage is that you do not need to wait on the street, which may not be good for you, especially in bad weather. So, you can request your ride in seconds with a few clicks.

There are few disadvantages anyway. For example, your mobile app will not work unless you have a good connection to the internet. You need an access to the internet down the street or when you are outdoor. Another disadvantage is the price. Online booking systems are expensive. Do not be fooled by free trials or "free" online booking solutions that suggest a lot but do not give real offers.

A. From a, b, c or d, choose the most suitable answer: (6X2=12 Marks)
