Part 3 : Inference question

Read the following text and answer the question below in full sentences

Once upon a time, in a world filled with modern technology, there lived a young boy named Saif. He loved playing video games and scrolling through social media on his phone. He was always stuck to the internet and couldn't imagine a life without technology.

One day, Saif's phone suddenly stopped working. He tried everything he could think of to fix it, but nothing worked. He felt lost without his phone and didn't know what to do. He decided to go for a walk to clear his head.

According to the text above ,what can you infer about Saif's connection with technology?

Saif has a very strong connection with technology. He is completely reliant on his phone to get entertained and communicate with the people around him through social media. He gets lost when he is disconnected to his phone.

Part 4: Justification question

Write your answer in full sentences

Once upon a time, in a world filled with modern technology, there lived a young boy named Saif. He loved playing video games and scrolling through social media on her phone. He was always stuck to the internet and couldn't imagine a life without technology.

One day, Saif's phone suddenly stopped working. He tried everything he could think of to fix it, but nothing worked. He felt lost without his phone and didn't know what to do. He decided to go for a walk to clear his head.

Why is your answer to the inference question the best answer?
Use the information in the text above to support your answer.

My answer to the inference question is the best answer because the text indicates that Saif is very connected to his phone as it says that he was always stuck to the internet and couldn't imagine a life without technology. It also adds that he felt lost without his phone and didn't know what to do. It seems as if he is addicted to his phone, and he is searching for a kind of therapy like walking to recover from his addiction to the phone.

Part 3 : Inference question

Read the following text and answer the question below in full sentences

In a small town nestled in the mountains, there lived a young girl named Carla. She loved spending her days exploring the woods and playing with her friends. But one day, Carla's world changed when she discovered social media.

At first, Carla was excited to connect with people from all over the world. She loved sharing pictures of her adventures and seeing what others were up to. But soon, Carla found herself spending more and more time on her phone, scrolling through endless feeds, and comparing herself to others. Carla's friends noticed a change in her. She became more distant and less interested in playing outside. They tried to talk to her about it, but Carla was too caught up in the world of social media to listen.

One day, Carla stumbled upon a post that made her feel terrible about herself. She felt like she didn't measure up to the perfect lives she saw online. She started to doubt herself and her worth.

According to the text above ,what do you think will happen next in the story?

After seeing that unpleasant post, Carla will start to evaluate her experience with social media and compare between her life before and after using social media. She will find out how her life before using social media was much better and more peaceful. Therefore, she will stop using social media and will continue enjoying the nature around her.

Part 4: Justification question

In a small town nestled in the mountains, there lived a young girl named Carla. She loved spending her days exploring the woods and playing with her friends. But one day, Carla's world changed when she discovered social media.

At first, Carla was excited to connect with people from all over the world. She loved sharing pictures of her adventures and seeing what others were up to. But soon, Carla found herself spending more and more time on her phone, scrolling through endless feeds, and comparing herself to others. Carla's friends noticed a change in her. She became more distant and less interested in playing outside. They tried to talk to her about it, but Carla was too caught up in the world of social media to listen.

One day, Carla stumbled upon a post that made her feel terrible about herself. She felt like she didn't measure up to the perfect lives she saw online. She started to doubt herself and her worth.

Why is your answer to the inference question the best answer?
Use the information in the text above to support your answer.

My answer to the inference question is the best answer because the text shows that Carla loved spending her days exploring the woods and playing with her friends. In addition, the bad post she read and made her feel terrible about herself and started to doubt herself and her worth indicates that there is going to be a twisting point in the story, and she will go back to the life she belongs to and enjoys much.

Part 3 : Inference question

Read the following text and answer the question below in full sentences

Laila is a technology reporter at the Al Khaleej Times newspaper . As part of an assignment, she accepted to be part of an ethical hacking experiment. Basically, a group of ethical hackers would try to compromise her system without her knowing how, when, and where. Laila only knew that it would happen at some point. For a whole month, the hackers did an extensive research on Laila, crawling through her Instagram and Facebook pages, Al Khaleej Times articles and even found out her date of birth from a website on family trees.

Almost two months after the assignment began, the hackers launched their attack. They pretended to be whistleblowers in control of sensitive government information and sent her an email with some of the files attached. The malware infection occurred the moment she opened the file, and the attackers got access to everything, including email address and webcam. And it wasn't even that difficult to do.

According to the text above ,what can you infer about Laila's concern about her safety when using the internet?

The text implies that Laila does not care a lot about her online safety and security. Although she is doing an important job that needs her to be so cautious with any correspondence she regularly receives, she immediately opened the link that was sent to her from unknown contact. She didn't even think for a while that it might have been sent for a malicious purpose.

Part 3 : Inference question

Read the following text and answer the question below in full sentences

Saeed has been working in the same organization for over 20 years. He loves managing his small team of staff and felt that he thrives on the stress of work. He is in a job which he perceives to be rewarding and stressful in equal measure. He is the problem solver, the one to volunteer for any task. He works extra hours and feels a great sense of responsibility in his role.

However, recently, he began to struggle to manage the stress of his job. Thoughts and worries about work seeps into every part of his life. He would wake up at night with nightmares, worrying about a task he has not completed, or trying to remember if he had sent an urgent email. He found that his mind wanders to work whilst he is spending time with his family. He withdrew from friends as he didn't have the headspace to switch off and relax.

According to the text above , what type of life does Saeed have now?

The text indicates that Saeed is leading a very stressful and tiring life that impedes him from enjoying his social life. Due to the heavy workload that he has had for 20 years and despite his brilliant skills that helps him handle all the stress of work over this long period of time , he started to get fed up with the continuous demands of his job.

Part 4: Justification question
