Student's Name: **Grade: 6 (.....)**

20

Understand a narrative text about inventions by identifying key details, time sequence, and the main idea.

Part 1: Reading Comprehension

5

Read the passage and answer the question:

The Al Noor family often talked about inventions and how they affect daily life in different ways. The father preferred the car because it saves time and makes travel easier, especially for work and family trips. However, he believed that cars also cause pollution and traffic, which can harm the environment and people's health.

The mother liked the washing machine because it reduces effort and gives her more free time to spend with her family. At the same time, she worried that people might depend on machines too much and forget how to do simple tasks by themselves.

The older son chose the smartphone as his favorite invention. He said it helps him study, communicate with friends, and learn new skills through educational apps. However, he knew that it could waste time if it is used incorrectly. The younger daughter preferred the television, as it provides information, news, and entertainment. Still, she understood that watching it for long hours could harm health.

In the end, the family agreed that inventions are a double-edged sword. When used wisely, they improve life, but when misused, they can cause problems.

1. Why does the father think the car is both useful and harmful?

- A) It is fast but expensive B) It saves time but causes pollution and traffic
C) It is old and difficult to use

2. What problem can happen if the smartphone is not used wisely?

- A) It stops working B) It wastes time C) It becomes expensive

3. Why does the family describe inventions as a “double-edged sword”?

- A) Because inventions are sharp
B) Because inventions have both advantages and disadvantages
C) Because inventions are dangerous

4. Which family member is most concerned about health, and why?

- A) The father, because of traffic B) The mother, because of effort
C) The daughter, because watching TV for long hours can harm health

5. What is the main idea of the passage?

- A) Family members prefer different inventions B) Modern inventions are unnecessary
C) Inventions are important but should be used wisely

Use appropriate vocabulary words related to inventions and technology by completing sentences using context clues.

Part 2: Vocabulary

10

Read the sentence and choose the right word to fill in the blank:

gadget	useful	compass	tablet	smartphone	game console
computer	screen	keyboard	heavy	light	headphones

1. A _____ helps travelers know directions when they are lost.
2. The _____ is a modern device that people use to call, message, and take photos.
3. A _____ can be very _____ for students when they study online.
4. You should not spend too much time playing on a _____ because it can waste time.
5. A _____ is bigger than a phone and is often used for reading and learning.
6. The _____ of the computer shows pictures, videos, and text.
7. You use a _____ to type letters, numbers, and symbols on a computer.
8. Some school bags are _____ because they have many books inside.
9. This new invention is very _____, so it is easy to carry anywhere.
10. Many students wear _____ to listen to lessons or music without noise.

Use the past simple tense and adverbs of manner correctly in context.

Part 3: Grammar

5

Read the text and choose the correct word(s) to complete the sentences:

Last Friday, Lina and her classmates visited a science museum. The teacher ...(1)... the rules before they entered the museum. When the students walked in, the guide explained the exhibits ...(2)... so everyone could understand. Lina ...(3)... as she wrote notes about the new machines. Her friend Omar ...(4)... to see a robot moving across the room. During the trip, the students ...(5)... and talked about what they had learned.

1.
A) explains
B) explained
C) explaining

2.
A) clearly
B) clear
C) clearlyly

3.
A) listened carefully
B) listens carefully
C) listening careful

4.
A) ran quickly
B) runs quickly
C) running quickly

5.
A) talked happily
B) talks happily
C) talking happy

20

Understand a narrative text about inventions by identifying key details, time sequence, and the main idea.

Part 1: Reading Comprehension

5

Read the passage and answer the question:

The Al Mazroui family often imagined what inventions might exist in the future and how they could change people's lives. The father believed that flying cars could save a lot of time and reduce traffic on the roads, especially in big cities. However, he worried that they might be too expensive to buy or dangerous if not used carefully.

The mother imagined robot chefs that could cook meals automatically and help busy families save time. At the same time, she was concerned that people might depend on them too much and forget basic cooking skills.

The older son pictured virtual reality classrooms, where students could learn from anywhere in the world. He liked the idea, but he wondered if spending too much time in virtual classes could reduce real social interaction. The younger daughter imagined smart glasses that show information instantly, yet she knew that looking at screens for long hours could harm eyesight.

In the end, the family agreed that future inventions may make life easier, but they must be used wisely and responsibly.

1. Why does the father have mixed feelings about flying cars?

- A) They are slow and uncomfortable B) They are difficult to control
C) They save time but may be expensive or unsafe

2. What does the mother worry about if people use robot chefs too much?

- A) Food will taste bad B) People may lose important cooking skills
C) Robots will break easily

3. Why does the older son question virtual reality classrooms?

- A) They are expensive B) They might reduce face-to-face social interaction
C) They are difficult to use

4. Which problem is connected to smart glasses in the passage?

- A) They may harm eyesight if used for long periods B) They are too heavy
C) They are hard to charge

5. What is the main idea of the passage?

- A) Future inventions will replace human skills
B) Future inventions can help people, but responsible use is important
C) Technology is dangerous for children

Use appropriate vocabulary words related to inventions and technology by completing sentences using context clues.

Part 2: Vocabulary

10

Read the sentence and choose the right word to fill in the blank:

thick	thin	tiny	large	important	laptop
arcade game	stereo	channel	umbrella	useless	invention

1. The scientist showed a new that could help people save energy.
2. The teacher said it is to study every day to get good grades.
3. Ali bought a to play video games with his friends at home.
4. The book was very , so it took a long time to read.
5. The cat had a tail and a very soft fur.
6. During the rain, Sara always carries an to stay dry.
7. My brother uses his to finish homework and write reports.
8. The weather forecast on that predicted heavy rain today.
9. The music sounded loud from the in the living room.
10. The chip in the cake was , so we could barely see it.

Use the past simple tense and adverbs of manner correctly in context.

Part 3: Grammar

5

Read the text and choose the correct word(s) to complete the sentences:

Last Saturday, Rami and his friends visited a science museum. They ...(1)... excited when they entered the hall. First, they ...(2)... a demonstration of old computers and learned how they worked. Rami ...(3)... carefully to the guide as she explained the exhibits. Then, his friend Sara ...(4)... many photos of the new inventions. At the end of the trip, everyone ...(5)... home feeling happy and full of ideas.

1.
A) was
B) were
C) is

- 2
A) saw
B) see
C) seen

3.
A) listened careful
B) listened carefully
C) listens carefully

4.
A) take
B) took
C) taken

5.
A) go
B) went
C) gone

20

Understand a narrative text about inventions by identifying key details, time sequence, and the main idea.

Part 1: Reading Comprehension

5

Read the passage and answer the question:

In the past, people lived very differently before modern inventions existed. They used candles to see at night, wrote letters by hand, and walked long distances to reach places. Daily life required more time and effort, and simple tasks were often difficult. Because of these challenges, people began to search for better solutions. This is why we say that need is the mother of invention.

One famous example is Thomas Edison. Before the electric light bulb, people depended on candles and oil lamps, which were unsafe and weak. Edison tried many times and failed, but he did not give up because people needed a safer and stronger source of light. When he finally invented the light bulb, it changed the way people lived, worked, and studied, especially at night.

Thanks to inventions, life became easier, faster, and more comfortable. Even today, new inventions appear because people continue to face problems and look for better ways to solve them.

1. Why did people in the past need new inventions?

- A) Because they were bored
- B) Because daily life was difficult and time-consuming
- C) Because they wanted to be famous

2. What does the phrase “need is the mother of invention” suggest?

- A) Inventions happen by accident
- B) Problems push people to create solutions
- C) Only scientists can invent things

3. Why is Thomas Edison a good example in the passage?

- A) He invented many things quickly
- B) He invented the light bulb to solve a real problem
- C) He never failed

4. How did the invention of the light bulb indirectly change education?

- A) Students stopped studying
- B) People could study and work at night
- C) Schools became smaller

5. What is the main idea of the passage?

- A) Life was better in the past
- B) Inventions are created to solve problems and improve life
- C) Only old inventions are important

Use appropriate vocabulary words related to inventions and technology by completing sentences using context clues.

Part 2: Vocabulary

10

Read the sentence and choose the right word to fill in the blank:

calculator	microwave	can opener	prosthetic limb	fridge	fresh food
supermarket	cold	hot	expensive	watch	cheap

1. I bought some vegetables from the because I wanted good quality food.
2. The hot soup was cold, so I heated it in the
3. My father used a to open a tin of beans.
4. It is important to store milk and meat in the to keep it safe.
5. The student used a to check his math homework quickly.
6. Water from the fridge is always during summer.
7. The chocolate cake was still when I took it out of the oven.
8. That new smartphone is very, but the old model is much cheaper than it.
9. I bought some and vegetables for dinner because they taste better.
10. I wear a every day to know the time.

Use the past simple tense and adverbs of manner correctly in context.

Part 3: Grammar

5

Read the text and choose the correct word(s) to complete the sentences:

Last weekend, Ali helped his grandmother in the garden. He ...(1)... the flowers carefully and watered them. His sister Sara ...(2)... the vegetables while picking the ripe ones. The dog ...(3)... around the garden, barking loudly. Ali carried the soil ...(4)... into the pots. Sara placed the seeds ...(5)... in the ground to grow new plants. At the end of the day, the garden looked beautiful, and everyone felt proud of their work.

1.
A) plant
B) planted
C) planting

2.
A) harvest
B) harvested
C) harvesting

3.
A) run
B) ran
C) running

4.
A) carefully
B) care
C) careless

5.
A) slowly
B) slow
C) slower

20

Understand a narrative text about inventions by identifying key details, time sequence, and the main idea.

Part 1: Reading Comprehension

5

Inventions have always played an important role in human life. One of the most remarkable inventions is the airplane. The Wright brothers created the first airplane in 1903, which could fly for a few minutes only. Over the years, airplanes have developed significantly. Today, modern airplanes can travel long distances at high speeds, carry hundreds of passengers, and use advanced technology for safety and comfort.

Another invention that changed the world is the computer. Early computers were very large and could perform only simple calculations. Over time, computers became smaller, faster, and more powerful. Today, laptops, tablets, and smartphones allow people to work, communicate, and learn from anywhere in the world.

These developments show that inventions evolve to meet the needs of society. They save time, reduce effort, and improve daily life. Inventors continue to search for new ideas, proving that creativity and determination can change the world.

1. Who created the first airplane?

- A) Thomas Edison
- B) The Wright brothers
- C) Alexander Graham Bell

2. How have airplanes improved over the years?

- A) They can travel long distances and carry many passengers
- B) They can fly only for a few minutes
- C) They are slower than before

3. What was a characteristic of early computers?

- A) They were small and portable
- B) They were wireless
- C) They could perform only simple calculations

4. What is the main idea of the passage?

- A) Inventions do not change over time
- B) Important inventions, like airplanes and computers, have developed and improved life
- C) Computers are more important than airplanes

5. Why do inventors continue to search for new ideas?

- A) To copy old inventions
- B) To make life easier and solve problems
- C) To make inventions more expensive

Use appropriate vocabulary words related to inventions and technology by completing sentences using context clues.

Part 2: Vocabulary

10

Read the sentence and choose the right word to fill in the blank:

home	dangerous	safe	price	fantastic	button
calmly	quickly	kindly	carefully	bicycles	wonderfully

1. The teacher spoke to the students during the fire drill so no one panicked.
2. Ali pressed the red to start the new machine.
3. The mountain road was very, so drivers had to be alert.
4. The hotel room was very comfortable, and staying there felt like being at
5. The shopkeeper told us the ... of the new computer before we bought it.
6. The movie we watched last night was; I really enjoyed every scene.
7. Sara crossed the street, looking both ways before stepping forward.
8. The lifeguard said the swimming area was ... for children.
9. I ran to catch the bus because I was late for school.
10. The old man spoke to the little boy and gave him some advice.

Use the past simple tense and adverbs of manner correctly in context.

Part 3: Grammar

5

Read the text and choose the correct word(s) to complete the sentences:

Yesterday, Omar and his family ...(1)... to the park for a picnic. They ...(2)... very excited when they arrived. Omar ...(3)... to his mother as she explained the rules of the game. His little sister ran ...(4)... around the playground, laughing loudly. Omar helped his father carry the food ...(5)... to the picnic table. At the end of the day, everyone returned home tired but happy, remembering all the fun moments they shared.

1.
A) go
B) went
C) gone

2.
A) feels
B) felt
C) feeling

3.
A) listen
B) listened
C) listens

4.
A) quickly
B) quick
C) quicker

5.
A) carefully
B) care
C) careless
