**(1) Reading Comprehension (16 Marks )**

**Read the following text carefully , then answer the questions below**

Dolphins are one of the smartest animals on Earth. They send messages to one another in many different ways. They squeak, squawk, and use body language. They jump as high as six meters in the air, **slapping** their tails on the surface of the water and blowing bubbles. They can grow to be anywhere from 2 to 4 meters long. Each dolphin has a special whistle that is created soon after it is born. This whistle is used to know them personally, just like a human's name.

Dolphins also have a sharp sense of hearing. **It** is two times stronger than the humans' sense. They are very social and playful mammals because they form friendships that last for many years hunting together and protecting each other. These sea animals are fed on fish and shrimps. They are found in warm water all over the world. They live in shallow water close to the beach and far out in deep dark water. There are 37 types of dolphins around the world. They face a lot of problems by getting trapped in the garbage humans leave on the beach. It affects their health and sources of food.

**Read the following passage then answer the questions below** Polar bears

will be extinct by the end of the 21<sup>st</sup> century if the global warming continue this constant rate. Temperatures are rising in the arctic. It is the only place where polar bears are found. This change of nature is having a strong effect on the health and numbers of the world's population of polar bears.

During the winter, polar bears live and hunt on the sea ice. They travel for many kilometers to catch their main food, which is the seal. Through the ice, polar bears can feel the movement of a seal. They sit close to a hole in the ice and wait for the seal to come up for air.

In summer, as the ice melts, some bears return to the shore, fasting until the colder weather and sea ice returns. Others continue to hunt. They swim in the icy water until they reach floating sea ice where they can wait for a seal. Bears who have been fasting all summer weigh less and are weak. They have lost too much of their fat, which is needed to keep them warm and as a source of energy.

Global warming has increased the temperature in the arctic so much that the warmer weather comes sooner each year and its lasts longer. It has

### 3)Read the following passage then answer the questions below

Twenty years ago, kids in schools had never even heard of the internet. Now, I will bet you cannot find a single person in your school who has not at least heard of it. The “net” in internet really stands for network. A network is two or more computers connected together so that information can be shared or sent from one computer to another, the internet is a vast resource for all types of information. You may enjoy using it to do research for a school project, download your favorite songs or communicate with friends and family. Information is accessed through web pages that companies, organizations, and individuals create and post. Anyone can put anything on the internet, so you have to be careful and use your judgement and common sense. Therefore, you must be sure that however posted the information knows what they are talking about, especially if you are doing research! If you are just emailing people, you still have to be very careful. If you have never met the person that you are communicating with online, you could be on dangerous ground! You should never give out any personal information to someone you do not know, not even your name! And just like can't believe the information on every website out there.
