Unit 9
Lesson 3

Daily Basic Fact Question

Find the answer mentally

$$4 \times 3 = \dots\dots\dots 12$$

$$5 \times 6 = \dots\dots\dots 30$$

Send Your answer on the Chat Box

Divide by 5 and 10

Learning Outcome

Learning Targets

- I can use related multiplication facts to recall division facts with 5 and 10.
- I can describe strategies used to recall division facts with 5 and 10.

Divide the buttons equally into 5 groups.

Padma has 50 cents in pennies.

If Padma trades her pennies for nickels, how many nickels will she get? If she trades her pennies for dimes, how many dimes will she get?

The value of a nickel is 5 cents.

Divide 50 into groups of 5.

Think about 5 multiplied by what number equals 50.

$$10 \times 5 = 50$$

$$50 \div 5 = 10$$

Padma will get 10 nickels.

The value of a dime is 10 cents.

Divide 50 into groups of 10.

Think about 10 multiplied by what number equals 50.

$$5 \times 10 = 50$$

$$50 \div 10 = 5$$

Padma will get 5 dimes.

The relationship between multiplication and division can be used to divide by 5 and 10.

Math is... Precision

Why is the quotient equal to a factor in a related multiplication equation?

Work Together

How can Jayden use multiplication to help him complete the facts $35 \div 5$ and $90 \div 10$?

$$5 \times 7 = 35 \quad \text{and} \quad 10 \times 9 = 90$$

$$\text{So, } 35 \div 5 = 7 \quad \text{and} \quad 90 \div 10 = 9$$

1. Which equations can help you find the unknown ?

Circle all the correct answers.

$$20 \div 5 = ?$$

$$20 = 5 \times ?$$

$$? \times 5 = 20$$

$$? = 20 \times 5$$

$$20 \times ? = 5$$

2. Draw a line to the number that makes each equation true.

$$10 \div 10 = ?$$

9

$$40 \div 5 = ?$$

1

$$45 \div 5 = ?$$

6

$$60 \div 10 = ?$$

7

$$35 \div 5 = ?$$

Quiz

Divide by 5 and 10

A

3

C

2

A series of multiple choice questions. Tap the correct answer to proceed.

<https://wordwall.net/resource/28580532>

What number makes the equation true?

Write a related multiplication equation to help you.

3. $15 \div 5 = \underline{3}$
 $5 \times 3 = 15$

4. $\underline{3} = 30 \div 10$
 $10 \times 3 = 30$

5. $\underline{10} = 70 \div 7$
 $7 \times 10 = 70$

6. $100 \div 10 = \underline{10}$
 $10 \times 10 = 100$

7. $\underline{1} = 5 \div 5$
 $5 \times 1 = 5$

8. $30 \div 5 = \underline{6}$
 $6 \times 5 = 30$

9. What are the facts in the multiplication and division fact family that use 5, 2, and 10?

$$5 \times 2 = 10$$

$$2 \times 5 = 10$$

$$10 \div 5 = 2$$

$$10 \div 2 = 5$$

10. Error Analysis Maya says she can use a related multiplication fact to help her find the unknown in $30 \div ? = 10$. Do you agree? Explain.

Yes, she can use the fact $3 \times 10 = 30$

The unknown ? is 3

11. Leon has 60 tickets. He wants to use all of his tickets, but is only allowed to get 6 prizes. How can he use all his tickets to buy only 6 prizes?

Gum.....	2 tickets
Eraser.....	4 tickets
Sticky Hand.....	5 tickets
Yo-Yo.....	10 tickets

60 tickets divided to 6 is 10, so he can get 6 yo-yo'sv

12. **Extend Your Thinking** How might you use multiplication to help you find the unknown in the division equation show ?
 $500 \div 100 = ?$

$5 \times 100 = 500$,so the unknown is 5

Does this make sense?
