hippo

Wolf

Name : class:.....

Wild animals

Wild animals have special body parts that help them live in nature.

The lion has strong legs and sharp claws. These help the lion run fast and catch its food. Lions also have sharp teeth to eat meat.

The **eagle** has big wings and strong feathers. These help the eagle fly high in the sky. The eagle's sharp eyes help it see food from far away

The **gorilla** has strong arms and hands. These help it climb trees and move on the ground. Gorillas are very strong animals.

The **dolphin** has fins and a tail. These help the dolphin swim fast in the water. Dolphins have smooth bodies to move easily in the sea.

All animals use their body parts to swim, fly, run, or climb.

Chose a , b or c

1. use fins and a tail to swim?

- a) Lion b) Eagle c) Dolphin
