Read the following passage and answer the questions below:

Although it's not the longest river in America, the Rio Grande has great importance. Its location makes it important. Since 1846, it has been the official border of Texas and Mexico.

The Rio Grande is either the fourth or fifth longest river system in North America. It all depends on how it is measured. Because the river twists so much, it occasionally changes course. The river starts in Colorado and extends downward to the Gulf of Mexico. Not only does the river extend south, but it also starts in the mountains and gets lower and lower in elevation as it extends to the Gulf. Its name is Spanish for the "Big River," but the Rio Grande is known as Rio Bravo in Mexico. "Bravo" translates as **furious** so the name makes sense. Because of its twists and turns, it certainly does seem to be angrier than most rivers!

The Rio Grande is mostly used as a source of drinking water. Sadly, much water has been drained from the river. This is because people use more water from the river than the river can get back from rain and other sources. Parts of the river are almost dry! Experts are working to correct this, though, with hopes of restoring the river to its past strength. Today, the river is important as a source of water for Texans and Mexicans. More important, it is a symbol of cooperation between two nations. Though borders like the Rio Grande separate nations, **they** are also shared spaces. The Rio Grande is a symbol of friendship between two peoples.
