

Reading Passage 1: Saving Water الحفاظ علي المياه**Title: The Importance of Saving Water**

Water is essential for life. Every living thing on Earth needs water to survive. However, fresh water is a limited resource, and we are using it faster than it can be replaced. This is why it is so important to save water wherever we can.

There are many ways we can conserve water. For example, we should turn off the tap while brushing our teeth and take shorter showers. Fixing leaky faucets is also an easy way to save water. In the garden, we can use a watering can instead of a hose, and water the plants early in the morning or late in the evening when the temperature is cooler.

Saving water is not only good for the environment, but it can also save money. The less water we use, the less we have to pay for. We should all do our part to make sure there is enough water for everyone and for the future.

Questions:

1. **Why is it important to save water?**
 - a) Because it is free
 - b) Because it is a limited resource
 - c) Because water is not needed by plants
 - d) Because we use too much energy
2. **Which of these is a way to save water?**
 - a) Leaving the tap running while brushing teeth
 - b) Watering plants during the hottest part of the day
 - c) Taking shorter showers
 - d) Using a hose in the garden instead of a watering can
3. **How can saving water help save money?**
 - a) By using more water
 - b) By paying less for water usage
 - c) By buying more water-saving products
 - d) By using water for cleaning

Reading Passage 2: Recycling at Home إعادة التدوير في البيت**Title: The Benefits of Recycling**

Recycling is one of the easiest and most effective ways to protect the environment. When we recycle, we help reduce waste and save valuable resources. Many materials that are thrown away can be recycled, such as paper, plastic, glass, and metal. Instead of putting these items in the trash, we can put them in the recycling bin.

Recycling helps reduce pollution because it requires less energy than making new products from raw materials. For example, recycling aluminum cans saves up to 95% of the energy that would be needed to make new cans. Recycling also reduces the need for mining, which can harm the environment.

At home, we can make recycling easy by separating our waste. We should have different bins for paper, plastic, and metal. It's important to rinse containers before recycling them, so they are clean and ready to be reused. By recycling, we can help create a cleaner, healthier planet.

Questions:

1. **What is the main benefit of recycling?**
 - a) It takes a lot of energy
 - b) It helps protect the environment
 - c) It creates more waste
 - d) It is not effective
2. **Which material saves the most energy when recycled?**
 - a) Glass
 - b) Paper
 - c) Plastic
 - d) Aluminum
3. **What should we do before recycling containers?**
 - a) Throw them away
 - b) Rinse them to make sure they are clean
 - c) Separate them into different bags
 - d) Leave them outside for the garbage truck

Vocabulary Quiz (Level A2) 2

Recycling إعادة التدوير – deforestation –التعريه-sustainable مستدام – pollution تلوث – global warming احتباس

Sentences

1. We should try not to create too much _____ when we eat.
2. The rainforest is a unique _____ for many animals.
3. Solar and wind energy are examples of _____ energy.
4. _____ Efforts help protect endangered animals.
5. There are many endangered _____ of birds in the world.
6. _____ is causing the Earth's temperature to rise.
7. Air _____ is a major issue in big cities.
8. It's important to use _____ farming practices that don't harm the land.
9. _____ is a major threat to many animal species.
10. _____ paper and plastic helps reduce the amount of trash.

Reading Passage 2

Title: Protecting Nature

Our planet faces many problems caused by humans, including _____, deforestation, and global warming. One of the most important things we can do to help is _____ the environment. This means using natural resources wisely and protecting animals and plants from harm.

We should reduce _____ by reusing and recycling items like paper, plastic, and glass. _____ Materials like wind and solar energy are good alternatives to fossil fuels because they don't harm the Earth. Another way we can help is by supporting _____ practices in farming, which help protect the land and water.

One of the biggest dangers to animals is the loss of their _____. Deforestation and pollution destroy the places where they live, making it hard for them to survive. We need to protect forests and other habitats to ensure that animals and plants continue to thrive.

It's also important to protect endangered _____ before they disappear forever. People are working together to solve these problems, but we all need to play our part to make the world a better place.
