Read the following passage then answer the questions below:

When you are fit, studying becomes easier, and you can do daily tasks better. It doesn't have to be extremely difficult to keep fit. Walking is easy and doesn't need any special equipment. Try to take the stairs rather than the lift. Even playing a friendly game of football helps you keep fit.

There are three main types of exercise - aerobic, resistance and stretching. Aerobic exercise is when you make your heart and lungs work. Examples of this are swimming a roller skating. Resistance training, such as push-ups and weight-lifting, is for building muscles. Stretching activities, such as yoga, make you more flexible. In general, it is important to an exercise have exercise regimen which contains all the above types of exercise.

It is important to have routine for training. A good exercise session has a warm-up of about 5-10 minutes. This could be walking or jogging. Then, move to exercises such as push ups to help you strengthen your muscles. Include aerobic exercise like cycling and basketball. Finally, stretching exercises will help you cool down.

Read the following passage then answer the questions below:

Vegetarianism has become **popular** worldwide. Some people stop eating meat because, they believe it to be the key to a healthy life. They follow a strict diet that includes fruits, vegetables, cereal grains, nuts, seeds and sometimes eggs and dairy products.

A vegetarian diet has its advantages. The main advantage is that there is less risk of obesity and heart disease. The diet includes high amounts of vitamin C, folic acid and fiber. This diet helps to avoid diseases because of the vegetables which are an excellent source of antioxidants. A vegetarian diet helps in digestion because vegetables contain more fiber. Lastly, more energy is gained from vegetables because they are the primary source of the food chain.

Being a vegetarian, also, has its downside. It can negatively affect your health. This diet is low in calcium, proteins, iron, vitamin B12 and zinc. Vegetarians who do not consume milk or dairy products can lack vitamin D as well. These nutrients are all found in the vegetarian diet but not in adequate amounts. Athletes for instance cannot be vegetarians because they need huge amounts of protein that is found in meat.

In conclusion, I think that eating a balanced diet is important for maintaining good health and keeping the body in top condition. I think a balanced diet does not cut out any food group. It consists of a wide variety of foods, served in the correct amounts to support our body and keep us energised, motivated and healthy.

Read the following passage then answer the questions below:

16

A 16-year-old Kuwaiti girl, Juri Mohammed Al-Azmi, has always loved reading books and poetry. She lost her sight but did not lose her determination or hope. She was able to overcome being blind and achieve first place in Kuwait at the "Arab Reading Challenge" contest. She beat 16,000 Arab students by reading 50 books. She also participated in the "Arab Reading Challenge Champion" contest in the United Arab Emirates. There were 18 other Arab students who had reached the final stage of the competition.

One of the difficulties facing Juri is the lack of books in Braille. Braille is a method of writing that helps the blind to read with their fingers. She said, in a statement published by the organising committee, that she loves reading, and that her visual handicap is not a barrier between her and the world around her.

Everyone knows the pyramids of Egypt very well. People consider them as one of the Seven Wonders of the World. Tourists from all over the world travel thousands of miles to visit Egypt to see them closely. In the past, pyramids were holy places, where ancient Pharos believed that spirits passed into the afterlife. A lot of pictures, statues and writings were carved inside the pyramids to guide each spirit on its journey.

Building a pyramid was an **enormous** project. Thousands of workers worked hard for many years to finish building it. They cut millions of huge stone blocks which could weigh as much as 15,00 kilograms! Or even more. Then, they pulled them up stone slopes using some tools such as ropes, wooden rollers and muscle power.

Inside, each pyramid there are special rooms for the dead person and for the treasures to be used in the afterlife. Many treasures were buried with royal mummies. The ancient Egyptians believed that all of the items a person used in life would also be needed after death. So, they buried thousands of items with Pharaohs and other important people. These items were made of the richest materials, such as gold and jewels. The entrances of these pyramids were hidden by secret passages and doors to prevent thieves from stealing the treasures. Even so, most of the pyramids were robbed by grave robbers who stole the treasures.

Twenty years ago, kids in schools had never even heard of the internet. Now, I will bet you cannot find a single person in your school who has not at least heard of it. The 'net' in internet really stands for network. A network is two or more computers connected together so that information can be shared or sent from one computer to **another**.

The internet is a **vast** resource for all types of information. You may enjoy using it to do research for a school project, download your favourite songs or communicate with friends and family. Information is accessed through web pages that companies, organizations and individuals create and post. Anyone can put anything on the internet, so you have to be careful and use your judgment and common sense.

Therefore, you have to be sure that whoever posted the information knows what they are talking about, especially if you are doing research! If you are just emailing people, you still have to be very careful. If you have never met the person that you are communicating with online, you could be on dangerous ground! You should never give out any personal information to someone you do not know, not even your name! And just like you can't believe the information on every website out there.

Read the following passage carefully, then answer the questions below:

Golden Beach Town is a wealthy neighbourhood in South Florida, USA. Many rich and famous people spend the autumn and winter months from October to April there. In the summer, when temperatures get too hot, they leave town. They hire security guards to protect their homes when they are away.

All the security did not, however, stop a 19-year-old traveller from entering the villa of a rich businessman last year. It happened on Sunday, the fifteenth of January, just before seven in the evening. The young man managed to get into the villa through a second floor bathroom window and climbed in. He looked around, liked what he saw, and stayed in the house for the next three months. He was never caught, despite the guards, maids and gardeners who were working in the house and on the grounds every day.

While he was staying in the house, the stranger ate everything in the fridge, freezer and cupboard, ran up a \$7.000 telephone bill and wore or sold most of the men's clothes in the closets. When the owner returned at the end of April, he found his uninvited guest fast asleep in his bed-just like a little child! The young man is now a guest in a Florida prison.
