Reading Comprehension:

Directions: Read the passage and answer the questions.

(1) Dolphins are marine mammals that are related to whales and porpoises. A marine mammal is one that lives in the water. Dolphins are found all over the world's oceans as well as in rivers and marshes. Dolphins eat fish, squid, and other marine life. They often swim together in groups. They have **powerful** eyesight and hearing, but do not have a sense of smell.

(2) Dolphins come in different sizes. Some are smaller than the average person, but others, such as the orca, can be 30 feet long, or more than five times as long as the average person. Dolphins are very intelligent because they can solve problems, learn new skills, and teach those skills to others. Have you ever seen a dolphin? Groups of dolphins can often be seen easily when they bob in and out of waves close to the shoreline. Dolphins can live up to 25 or 45 years.
