(B)	Touch the person when they are still in contact with the power source.	
(C)	Get a first aid kit and AED if available.	
(D)	When it is safe to touch the person, give CPR if needed.	

Part 2:

6.	Provide a term for the following sentence: A condition that happens when there is a lack of oxygen to the brain.	/1

7.	Provide a term for the following sentence: The body's immune response to substances that it has become hypersensitive to.	/1

8.	Provide a term for the following sentence: A sudden attack that occurs when there is abnormal electrical activity in the brain.	/1

9.	Provide a term for the following sentence: A condition that occurs when there is not enough water in the body	/1

10.	Provide a term for the following sentence: A poisonous liquid that some spiders and snakes produce	/1

Part 3:

11.	What are signs of hypoglycaemia? Choose four of the below options.	/4
(A)	Frequent urination	
(B)	Dizziness	
(C)	Feeling hungry	
(D)	Sweating	
(E)	Pale	
(F)	Fruity breath	

12.	What are the signs to recognize someone is having a stroke? Choose four of the answers below.	/4
(A)	Face drooping	
(B)	Thirst	
(C)	Speech difficulty	
(D)	Walking normally	
(E)	Arm weakness	
(F)	Time	

13.	Which of the following could be signs and symptoms of dehydration? Choose three of the answers below.	/4
(A)	Confusion	
(B)	Hungry	
(C)	Feeling thirsty	
(D)	Blisters on the skin	
(E)	Dizziness	

14.	Which of the following are signs that someone has a potential head injury? Choose three of the answers below?	/3
(A)	Sweating	
(B)	Difficulty speaking or staying awake	
(C)	Blisters on their skin	
(D)	Vomiting	
(E)	Memory loss	

Part 4:

15.	Look at the actions you should take when giving emergency medical care for a complete airway obstruction. Write them in the correct order.	/5				
1..... 2..... 3..... 4.....						
<table border="1"> <tr> <td>Grab fist with other hand and give up to five abdominal thrusts in rapid succession</td> <td>Identify if it is a complete airway obstruction</td> <td>Make a fist and place it against the abdomen, with thumb just above belly button</td> <td>Position yourself behind the patient, and with your index finger find their navel (belly button)</td> </tr> </table>			Grab fist with other hand and give up to five abdominal thrusts in rapid succession	Identify if it is a complete airway obstruction	Make a fist and place it against the abdomen, with thumb just above belly button	Position yourself behind the patient, and with your index finger find their navel (belly button)
Grab fist with other hand and give up to five abdominal thrusts in rapid succession	Identify if it is a complete airway obstruction	Make a fist and place it against the abdomen, with thumb just above belly button	Position yourself behind the patient, and with your index finger find their navel (belly button)			

16.	Look at the actions you should take when giving emergency medical care for a small burn. Write them in the correct order.	/5					
1..... 2..... 3..... 4..... 5.....							
<table border="1"> <tr> <td>Get a first aid kit and wear PPE</td> <td>Cool the burn as soon as possible with cold water</td> <td>Make sure the scene is safe</td> <td>If needed, cover the burn with a dry, non-stick dressing</td> <td>If you are not near a tap, apply a cold compress</td> </tr> </table>			Get a first aid kit and wear PPE	Cool the burn as soon as possible with cold water	Make sure the scene is safe	If needed, cover the burn with a dry, non-stick dressing	If you are not near a tap, apply a cold compress
Get a first aid kit and wear PPE	Cool the burn as soon as possible with cold water	Make sure the scene is safe	If needed, cover the burn with a dry, non-stick dressing	If you are not near a tap, apply a cold compress			

Part 5:

17.	Complete the sentences using the words below.	/4
An airway obstruction is any blockage to a part of the airway. This can happen due to infections, tissue _____ or foreign objects in the throat. An airway obstruction can either be _____ or complete. Signs of a partial airway obstruction include noisy _____, such as snoring, gurgling, wheezing and _____, which is a high-pitched, wheezing sound. A. partial B. damage C. stridor D. breathing		

18.	Complete the sentences using the words below.	/5
	When providing emergency medical care for insect stings and bites, the first thing you always do is to make sure the scene is _____ for yourself and the patient. Get the first aid kit and wear _____. Call emergency services and if you can, _____ the area with soap and water. If you can, put a bag of _____ in a towel and put it on the bite.
