B- Reading Comprehension (16 Marks)

Read the following passage carefully, then answer the questions that follow:

16

Imagine a place where colourful birds fly in the sky and where strange and beautiful plants grow everywhere. That is the rainforest! Rainforests are special forests, and they are different from other forests. They are found in warm areas with lots of rain. Many kinds of plants and animals live there.

One of the most famous rainforests in the world is the Amazon Rainforest in South America. The trees there are very tall, and they cover the sun. The forest floor is covered with all kinds of plants, and some grow on the trees. Rainforests are also home to many colourful birds and animals like parrots, monkeys, and snakes.

Rainforests get a lot of rain, making them humid and warm. This helps plants grow quickly. Many of these plants can be used to make medicine to help people feel better when they are sick.

Rainforests are very important for our planet. They help clean the air and keep the Earth cool. They also make oxygen and fresh air for us to breathe.

Sadly, rainforests are in great danger. People are cutting down trees to build houses and grow food. This is destroying the homes of many plants and animals. So, we need to protect these forests. We can do this by learning more about them and sharing what we know with others.

a) Choose the correct answer from a, b, c and d: (6 x 2 = 12 Marks)

9. The best title for the passage is:

- a) A Day in the Rainforests
