1-Reading comprehension

Read the following passage carefully, then answer the questions below:

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again.

Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass and plastic can be recycled. It also **reduces** pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done over and over again. Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

2-Reading Comprehension

Reading the following passage carefully, then answer the questions below:

My four grown children were all home visiting last weekend so we decided to go out for breakfast. My young granddaughter had never had pancakes before, so we were **excited** about her trying them. We ordered different kinds of pancakes and the baby loved them.

There was a lovely environment at the table and lots of smiles. As I was looking around the table, enjoying this wonderful scene, a lady at a nearby table caught my eyes. She was eating her breakfast alone quietly, in the corner. She frequently looked over and smiled as my granddaughter was laughing loudly. Suddenly, I had a great idea. I took out a smile card from my bag and called the waitress. I explained to **her** that I wanted to pay that lady's bill secretly and that instead of the bill she would give her the smile card.

The waitress came over and told us that the lady had passed the smile card on and paid for another table before she left. How great! Not only that, the waitress then came back later and told us that the second table had now paid for someone else and passed the smile card on too! I couldn't believe it when the waitress came back and told us that the third table had done the same thing.

What was really amazing, though, was that by the time we left, half the room had ended up paying for a different table! Isn't that great?

A) Choose the correct answer from a, b, c and d:

1) The underlined word **"her"** in the **2nd paragraph** refers to:
