- Read the following passage carefully, then answer the questions that follow:

Learning a new language is an important thing that we should seek in our life. This language helps us to communicate with the other side of the world. It also gives us varied chances of jobs. Today, millions of people want to learn and improve their English but it is difficult to find the best method. Is it better to study in Britain or to study in your own country?

The advantages of going to Britain seem ***obvious***. Firstly, you will be able to listen to the language all the time. You will be completely surrounded by the language. Another advantage is that you have to speak the language if you are with other people. In your country, it is always possible, in the class, to speak Arabic if you want to and the learning is slower.

On the other hand, there are also advantages to staying at home to study. You don't have to make big changes to your life. As well as this, it is also a lot cheaper than going to Britain. If you have a good teacher in your country, you can learn in a more concentrated way.

So, in conclusion, I think if you have enough time and enough money, the best choice is to spend some time in the UK. This is simply not possible for most people, so being here in your country is the only option available. The most important thing to do in ***this*** situation is to maximize your opportunities to use English whenever possible.
