TODAY'S LESSON

- DATE: 30th November 2022
- Unit 3 Lesson 9
- Coursebook p.34
- Workbook p.34
- Communication

LEARNING OBJECTIVES

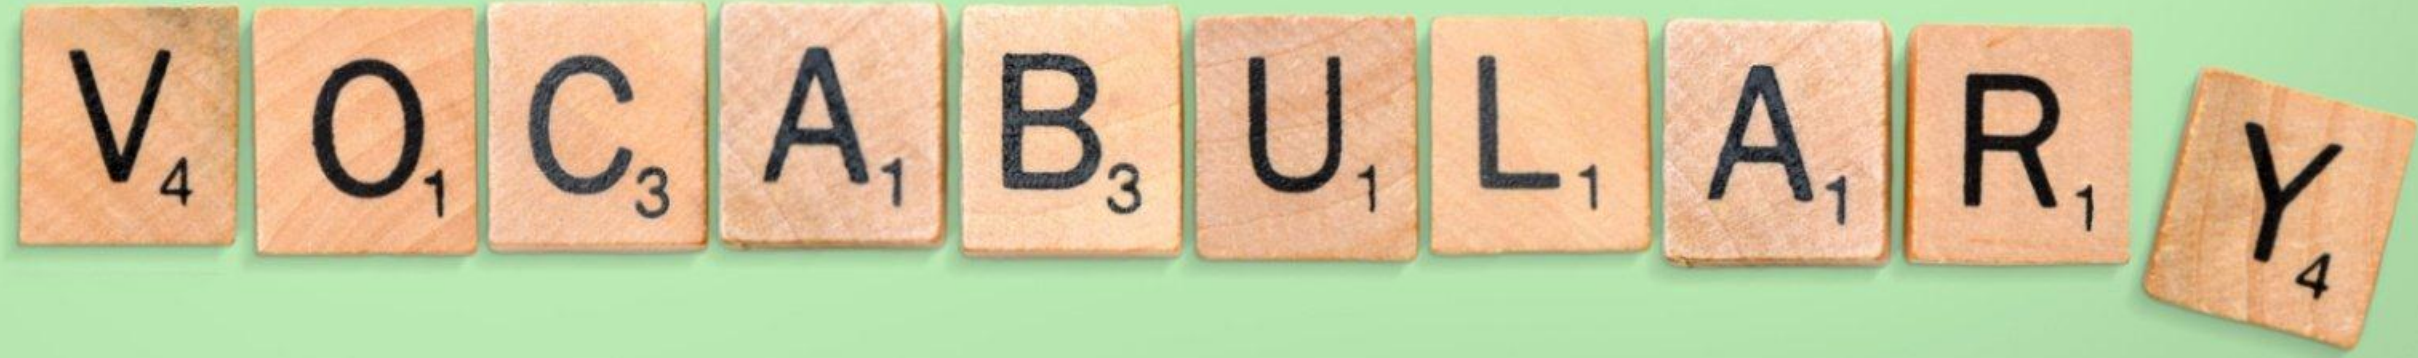

- Communication and social media
- Reading practice + T/F/NG

DISCUSSION QUESTIONS

Lessons 9–10 Communication

- How do you usually communicate with your friends and family?
- Do you communicate in different ways with different people?

VOCABULARY

KEY VOCABULARY

- immersive
- tweet
- exhibition
- upload
- decade
- virtual
- goggles
- simultaneously
- artificial
- dream

KEY VOCABULARY

immersive

(Of a computer display or system) generating a three-dimensional image which appears to surround the user.

KEY VOCABULARY

tweet

A post made on the social media application Twitter.

KEY VOCABULARY

exhibition

A public display of works of art or items of interest, held in an art gallery or museum or at a trade fair.

KEY VOCABULARY

upload

Transfer (data) from one computer to another, typically to one that is larger or remote from the user or functioning as a server.

KEY VOCABULARY

decade

1 biennium = 2 years

1 lustrum = 5 years

1 decade = 10 years

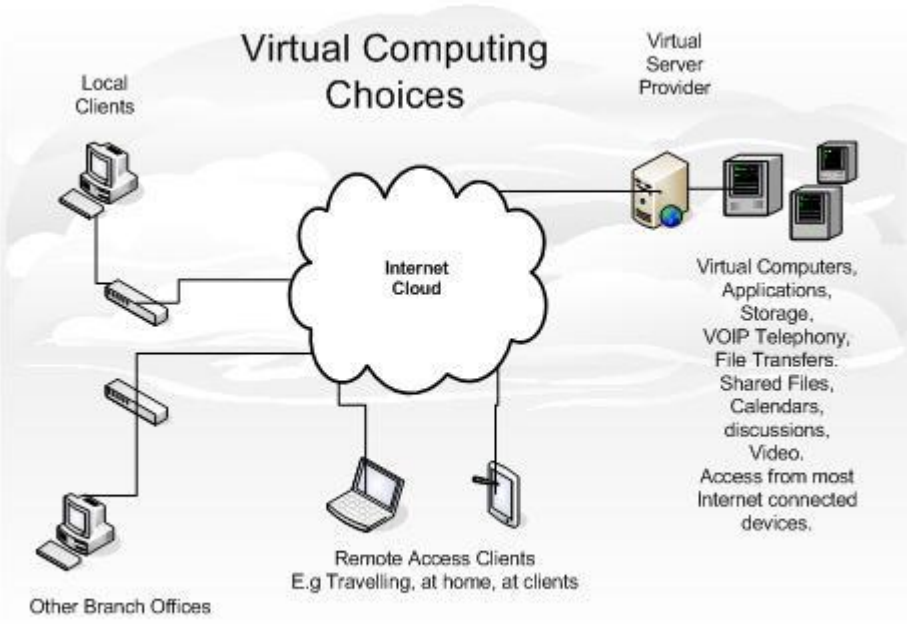

1 century = 100 years

1 millennium = 1000 years

A period of ten years.

KEY VOCABULARY

virtual

Not physically existing as such but made by software to appear to do so.

KEY VOCABULARY

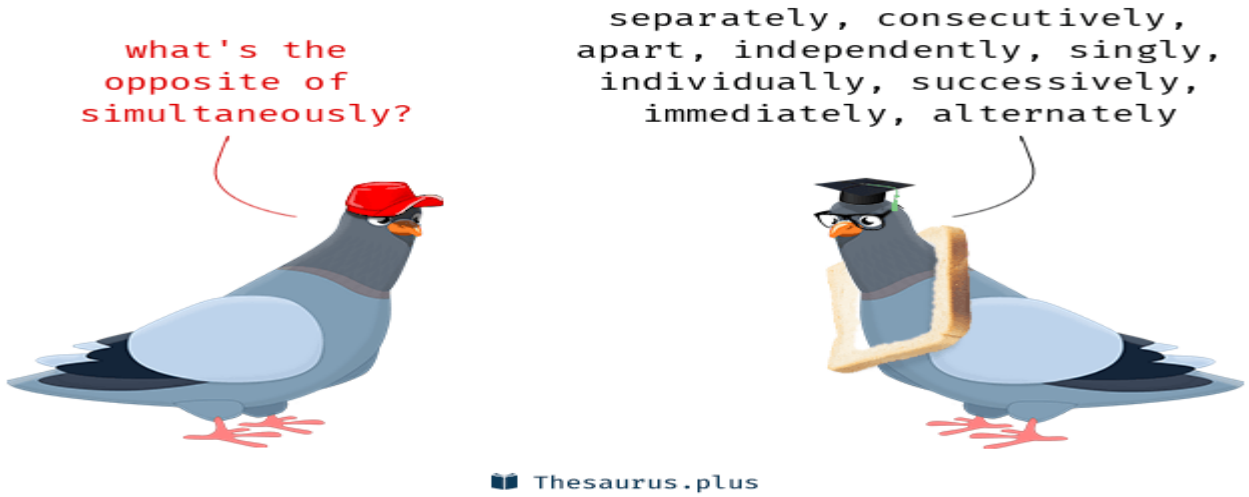

goggles

Goggles, any of a variety of protective eyewear set in a flexible frame that sits snugly against the face. Goggles are worn in a number of sports, including skiing, swimming, and motor sports, and in various industries. Virtual reality headsets are also often called goggles.

KEY VOCABULARY

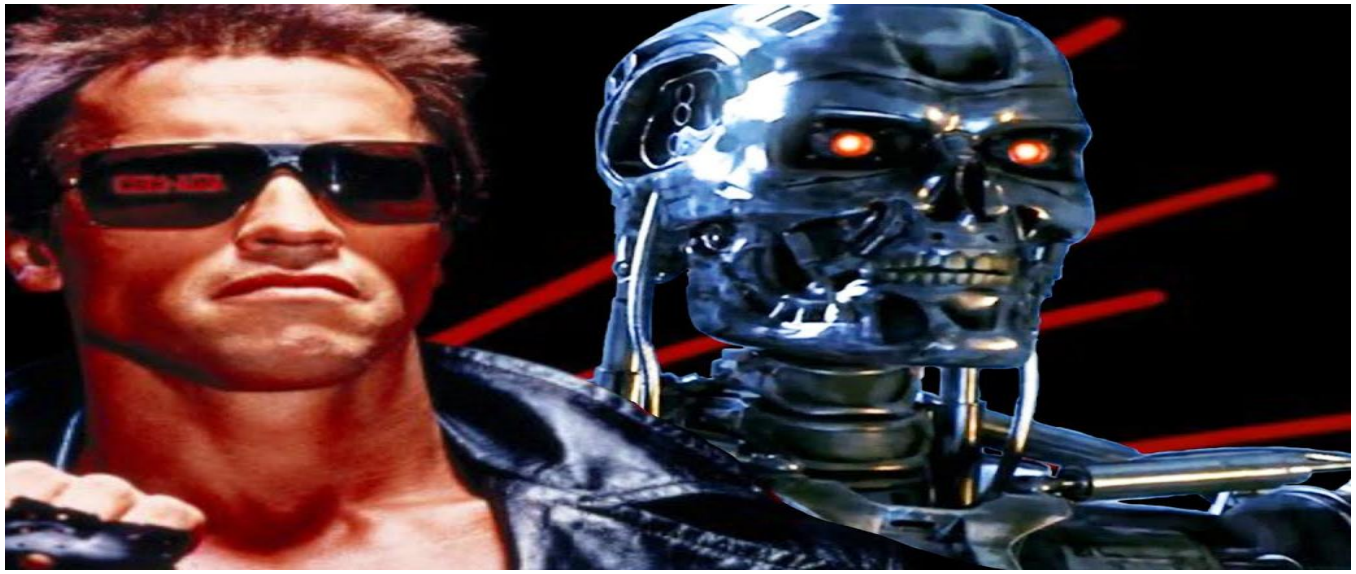

simultaneously

"The telethon was broadcast simultaneously on 31 US networks"

KEY VOCABULARY

artificial

The branch of computer sciences that emphasises the development of intelligence machines, thinking and working like humans.
For example, speech recognition, problem-solving, learning and planning.

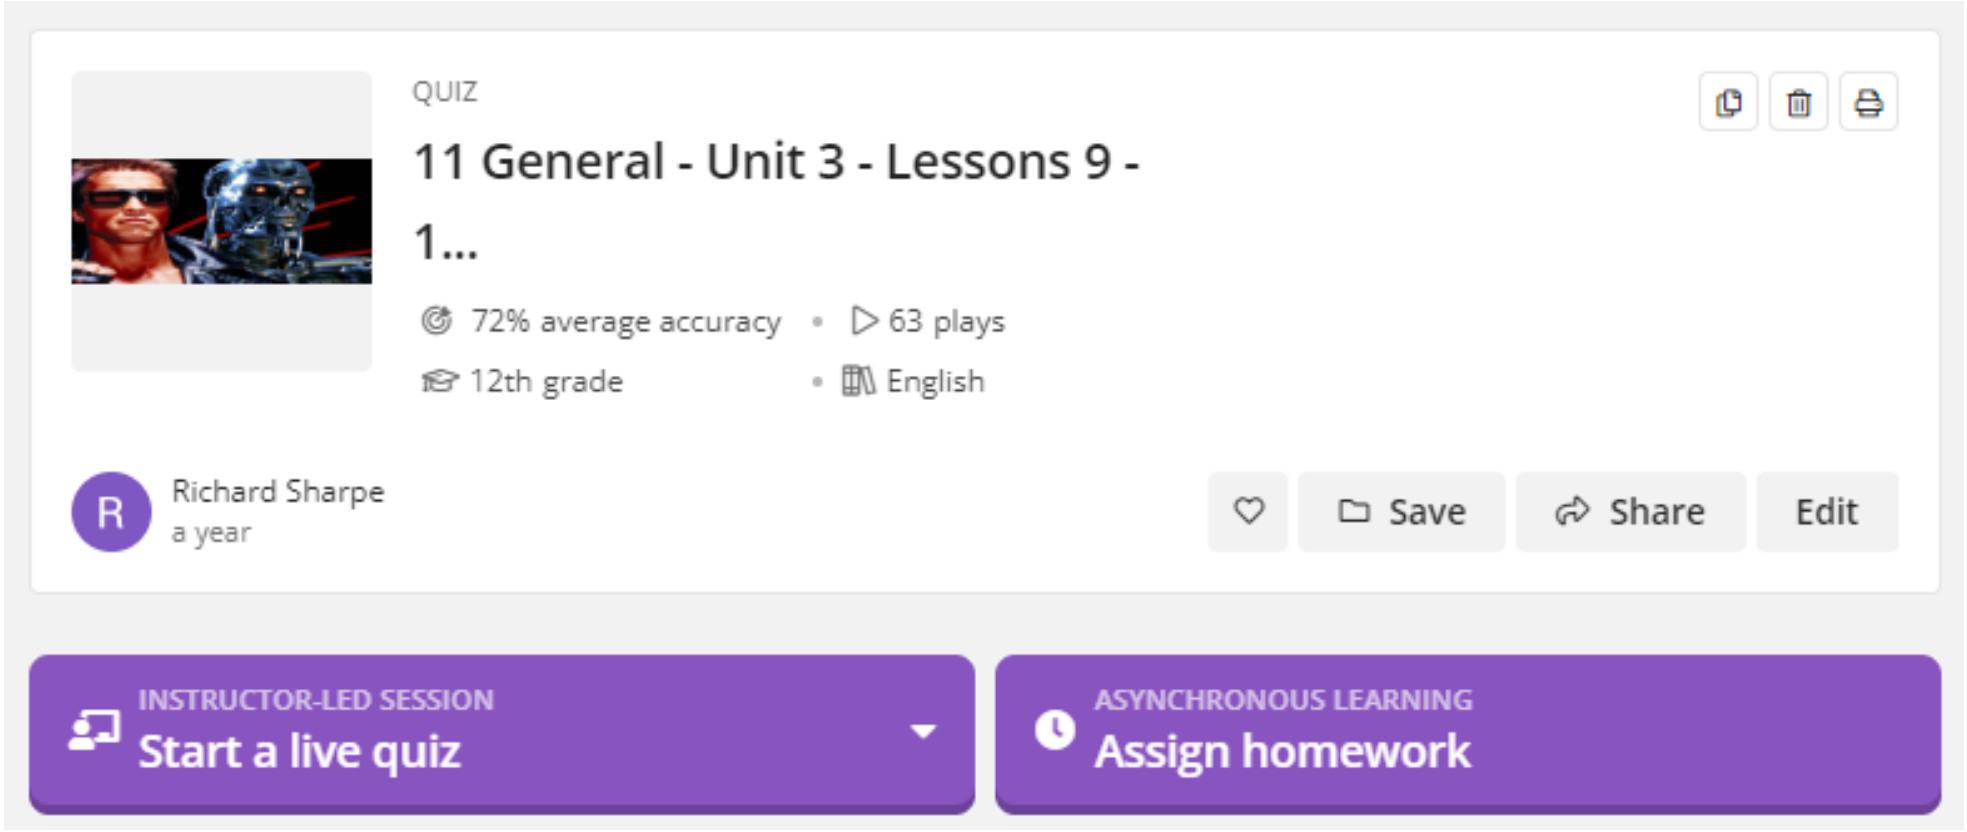

KEY VOCABULARY

dream

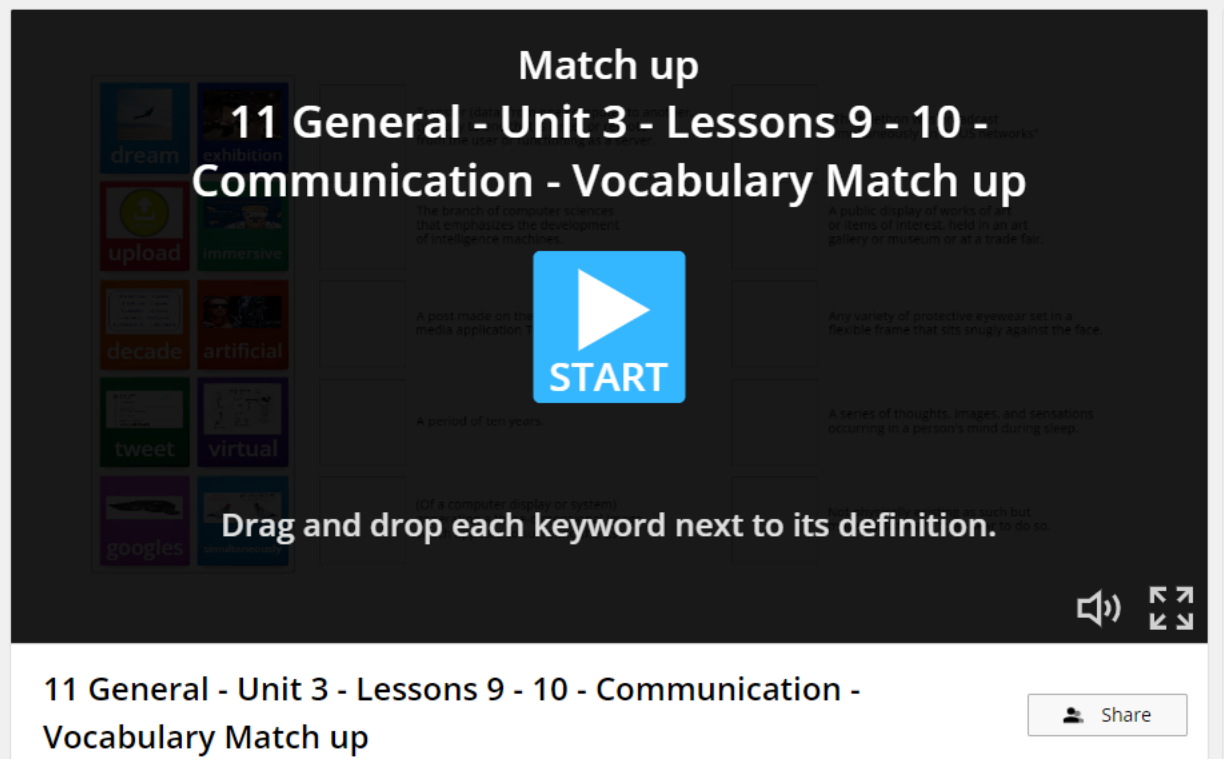

A series of thoughts, images, and sensations occurring in a person's mind during sleep.

WHAT ARE THE ARTICLES ABOUT?
COURSEBOOK P.34

- **Ex 1**

Reading

1 Look at the headlines. What do you think the articles are about?

Property of

A **Meeting in progress – no coffee required!**

B **Information overload!**

C **The future of communication?**

READING PRACTICE
COURSEBOOK P.34

- Ex 2

2 Match the headlines to the correct article. One headline is not needed.

1 Headline C

The Museum of the Future in Dubai now has an exhibition about communication changes in the coming decades. The three main themes are how robots, AI (Artificial Intelligence) and technology will improve human physical capabilities, business relations and communication.

Du, the UAE telecommunications company, has already developed a new technology called EyeShare which allows people to fully share, in real time, their experiences with friends and family. So, for instance, if your friends are having a great day out, instead of looking at their tweets and uploaded photos on a social media site, you will be able to see, feel and hear what they are *doing* simultaneously.

Exhibits at the museum also include Moodview, a form of technology which promises to help us understand how the people we are with are feeling. Then, according to the designers, it will tell us what to say and how to act. Since so many arguments are caused by people not understanding each other, maybe this will help people to stay calm and not fight.

Share your dreams! Sound like something from a science fiction movie? Well, the makers of DreamStream claim that one day we will be able to design and share our dreams with others via a global dreaming network. As we don't all have exciting dreams, why not link up with a friend's dreams! As with Twitter, you will be able to attract followers and share dreams with celebrities, your family or even random strangers.

READING PRACTICE
COURSEBOOK P.34

- **Ex 2**

2 Headline A

It's hard to imagine that less than a century ago most communication was done either face-to-face or by handwritten letters. Since then, the world of communication has changed enormously, from telephones and fax machines to emails. Next came mobiles, then smartphones, which combined speaking, texting and emails all on one small handheld machine. So what's next?

According to some IT experts we are moving rapidly towards the next stage in immersive media. High-tech goggles will allow films, live shows and video games to be beamed into our brains without the need to go anywhere. In addition, virtual reality (VR) won't just be about leisure time, but may become the future of business communication, too. Imagine that instead of everyone going to the same room for a meeting, you will be able to hold a virtual meeting. Everyone stays in their own office but, through VR, they appear to be in the same room wherever they are in the world, whilst all looking at the same virtual whiteboard and sharing ideas and images. As a result, business may be completed more efficiently and cheaply as workers won't need to travel around the world to meet.

READING COMPREHENSION
COURSEBOOK P.35

- **Ex 3**

3 Tomorrow calling!

3 **Read the two articles again. Are the statements below true (T), false (F) or not given (NG)?**

1 The Museum of the Future is only about changes in communication. False
2 Understanding how a person is feeling could help prevent disagreements. True
3 The author thinks that other people's dreams are boring. Not given
4 The world of communication is changing all the time. True
5 People will be able to watch concerts in their living rooms. True
6 Companies will no longer need meeting rooms. Not given

4 Look at these extracts from the articles. Then answer the questions.

… many arguments are caused because people don't understand each other …

In addition, virtual reality (VR) won't just be about leisure time, …

So, for instance, if your friends are having a great day out …

1 Which word or phrase is used to give a reason for an opinion?
2 Which word or phrase is used to give an example to support an opinion?
3 Which word or phrase is used to add extra information?

Can you find any other words or phrases in the articles that support or give a reason for an opinion?

Writing tip

In an argumentative essay, you need to make it clear if you are stating a fact or expressing an opinion. You need to give reasons for your opinions.

GAP FILL
WORKBOOK P.34

- **Ex 2**

2 Complete the paragraph with these words and phrases.

in addition	since	because	such as	one reason
as	another reason		for example	

Many teenagers use social media sites regularly [1] as they want to keep in contact with their friends. They frequently upload information, [2] such as/for example photos, messages and blogs, to tell everyone what they are doing. [3] In addition , they sometimes upload private information, [4] for example/such as phone numbers or addresses, which can cause problems [5] because/since/as phones and social media sites can be hacked. So why do it? According to experts, [6] one reason is the need to be popular – putting photos of social activities looks good. [7] Another reason is social pressure: young people feel they must upload photos and post happy comments [8] since/because/as all their friends are doing the same thing.

Ministry of Education

Write one reason to support each idea

Workbook p.35

- Ex 3

3 Tomorrow calling!

3 Read the essay question below.

> Young people share too much information on social media nowadays. Some people believe oversharing may lead to problems in their future and that sharing should be restricted. Do you agree?
>
> Give reasons for your answer.

Now read these ideas linked to the essay question. Write one reason to support each idea.

Example: Social media is a vital part of young people's lives today.

Young people want to stay in contact with one another all the time and social media such as SMS, Facebook and Twitter are all essential.

Only the older generation spend time talking to one another face-to-face.

One reason older people spend tie talking face-to-face is because it feels more natural for them.

Social media has destroyed young people's ability to communicate effectively.

Another reason young people cannot communicate effectively is due to the overuse of social media.

Mobile phones will be replaced by better ways of communicating.

In addition, new technologies may be introduced that will replace mobile phones.

New social media technology will mean that communicating will get faster but not better.

For example, social media technology may become faster, but not necessarily better.

In the future, we may be able to send messages just by thinking.

As technology advances, we may be able to send messages just by thinking.
