

 Beginners -Read the Passage: Circle the correct answer:

Technology: Then and Now

In the past, people used simple machines to do their work. They used old computers that were big and slow. Cameras were heavy, and people could only take a few photos. There were no smartphones, tablets, or smartwatches, so people wrote letters and used paper maps to communicate and learn.

Today, technology has changed a lot. Modern computers are fast and small. People use smartphones to call, send messages, and take clear photos with a camera. Many students use a tablet to read, write, and study. A smartwatch helps people check the time, count steps, and stay healthy.

In the past, machines could not think or fly by themselves. Now, a robot can help people at home and in hospitals. A drone can fly in the sky and take pictures from far away. These modern machines show how technology has improved and made life easier.

Level 1 – Beginners (5 Questions) Choose the correct answer:

1-In the past, computers were:

A- fast and small b- big and slow c- new and smart

2. What did people use to communicate in the past?

a- Smartphones b- Letters c- Tablets

3. Which machine takes photos?

a- Robot b- Camera c Tablet

4. Modern computers are:

a- heavy b- slow c- fast

5. Which word means a flying machine?

a- Drone b- Camera c- Tablet
