VI- Reading Comprehension (16 Marks)

16

Read the following text carefully, then answer the questions that follow:

Online shopping is now a very popular way for people to buy products. Instead of going to stores or shopping malls, many people prefer to shop on websites. It is fast, easy, and available all the time. You can shop from home, at work, or even while travelling. Online stores are open 24 hours a day, so you do not need to worry about closing times. This is very helpful for busy people who do not have time to visit shops during the day.

Websites offer many different products such as clothes, shoes, books, electronics, toys, and even food. You can see pictures of the items, read details, and check prices. Many websites also show reviews from other customers. **They** help you decide if the product is good or not. Some websites offer free delivery or special discounts, which makes shopping online even more attractive. You can also compare products from different sellers to find the best deal. This helps you save money and choose the right item for your needs.

However, online shopping is not always perfect. Sometimes, the product you receive is different from what you saw online. It may be smaller, a different colour, or lower quality. In some cases, **fake** websites take your money but never send anything. That is why it is important to shop from trusted websites. Before buying, you should check if the site is safe and read reviews about the seller. If the price looks too low, the product might be unreal or of a poor quality. It is better to be careful than to lose money or receive something you do not want.

Another problem is payment safety. Most online stores ask you to pay with a credit card or online wallet. If the website is not secure, someone could steal your personal information. Also, returning products can be difficult. Some websites do not accept returns, and others ask you to pay for return shipping. It is smart to read the return policy before you buy anything.
