Hala Bint Khuwalid Int. School. Reading Comprehension Quiz (1)
Name:…….. Class: 7/……

Read the following passage and answer the questions:

A material is what something is made of. There are 5 basic materials. They are metal, glass, wood, cloth and plastic. The environment has many other materials. But they are not widely used. Metal is one of the most widely used materials. **It** is very heavy, hard and strong. We use it to make many things such as forks, knives, keys and cars. Glass is also very smooth. It is not as heavy as metal. It is hard. But it is not strong. It breaks very easily! We use it to make things such as windows and glasses because it is clear, and we can see clearly through it.

Wood is lighter than metal and glass. It is not as strong as metal. But it is much stronger than glass. We use wood to make chairs, tables and pencils. Cloth is very light. It is much lighter than wood. And it is very soft. It is used to make clothing and blankets. Now, let's talk about plastic. Plastic is also very light. But it is different from cloth. Sometimes it is soft. Sometimes it is hard. Plastic can be used to make thin plastic bags and bicycle helmets.

Choose the correct answer:

1- The underlined pronoun "it" in the 1st paragraph refers to:
A- wood b- plastic c- metal d- glass
2- The purpose of the writer in this passage is:
a- tell us about using cloth to make things. b- show the importance of wood.
c- focus on the five basic materials. d- concentrate on windows and glasses.

Answer the following questions:

1- Why are windows made of glass?
……
2- What is plastic used for?
……

Comprehension quiz **class Seven** **منطقة الجهراء التعليمية** **مدرسة هالة بنت خويلد**

Name…… **4 marks** **Class……**

It is hard to imagine how certain products were invented. How did someone think of the eraser, clay, and potato chips? It turns out many of society's most well-known inventions were simply mistakes made by scientists when they were trying to invent something else . No one could ever imagine that the flavored potato chips and the morning best preferred breakfast, corn flakes, were accidentally introduced to the world's kitchens.

Potato chips were first meant to be a plate of fried potato. It was invented by George Crum, a chef at the Carey Moon Lake House. How was it created? One day, a customer sent back his plate of potatoes many times and kept asking for them to be more fried and thinner. Crum lost his temper, sliced the potatoes **extremely** thin and fried them until they were hard as a rock. To the chef's surprise, the customer loved them and wanted more!

Corn Flakes were invented by the Kellogg brothers, John and Will. They were trying to make pots of boiled grain. How was it created? The brothers accidentally left a pot of boiled grain on the stove for several days. The mixture turned bad but there was something that was dry and thick. Through experimentation **they** removed the bad part and created corn flakes. Wouldn't it be nice if you could invent something by mistake?

A. From a, b, c and d choose the correct answer:

1- The best title for the passage is :

a. Potato Chips accidents b. Chefs and Scientists c. Discoveries by d. Morning Breakfast

2- The underlined word" extremely" in paragraph (2) means:

a. very b. strangely c. accidentally d. alternatively

B- *Answer the following questions :*

3-What were potato chips first meant to be ?

……

4-Mention something you would like it to be invented by you .

……
