Introduction:

- **Thesis statement: Advancements in artificial intelligence (AI) and technology are expected to revolutionize the future of business and jobs, offering both benefits and challenges.**

Body Paragraph 1:

- **Topic sentence: One major benefit of AI and technology is the increased efficiency and productivity in businesses.**
- **Supporting details:**
  - **Automation of repetitive tasks will free up time for employees to focus on creative and strategic roles.**
  - **Examples: AI-powered customer service tools and inventory management systems.**
  - **Impact on business success: Increased profits, faster decision-making processes.**

Body Paragraph 2:

- **Topic sentence: However, there are also challenges and potential negative consequences that come with these advancements.**
- **Supporting details:**
  - **Job displacement: Automation may lead to job losses, especially in industries that rely on routine tasks.**
  - **Examples: Manufacturing jobs being replaced by robots, data entry jobs being automated.**
  - **Solutions: Companies can invest in employee retraining programs and help workers transition to new roles.**

Conclusion:

- **Summary: AI and technology offer significant benefits to businesses, such as increased efficiency and new job opportunities. However, the negative effects, including job displacement, should be addressed through proper planning and retraining efforts.**
- **Restate thesis: Ultimately, AI and technology have the potential to improve business outcomes, but their challenges must be managed to ensure a positive future for both industries and workers.**

How do advancements in artificial intelligence (AI) and technology impact the future of business and jobs? **Response:** **Advancements in artificial intelligence (AI) and technology are reshaping the future of business and jobs. On the positive side, businesses stand to gain significant benefits from AI, including improved efficiency and productivity. Automation of routine tasks allows employees to focus on more creative and strategic aspects of their work. For example, AI-powered software can streamline customer service and inventory management, ultimately leading to cost savings and increased profits.**	**الفكرة الرئيسة وتوقع الإجابة على ضوء القصة مع الاهتمام ببعض التفاصيل الموجودة في النص ومحاولة الربط بينها وبين المطلوب** **I think that ----------** **because ----------** **----------** **----------** **يشبه سؤال ----------** **إعطاء الراي**

However, these technological advancements can also have negative effects on the job market. Many workers in routine or manual jobs may face unemployment as AI takes over tasks once performed by humans. Jobs in industries like manufacturing and retail may be particularly vulnerable. To address this challenge, businesses and governments must invest in retraining programs to help workers transition to new roles, particularly in tech-related fields. **In conclusion, while AI and technology offer considerable advantages for business efficiency, it is important to balance progress with a focus on job creation and workforce development to ensure that workers are not left behind.**	**<u>سؤال التبرير (3 درجات)</u>** **يطلب من الطلاب تبرير اجابتهم على سؤال الاستنتاج السابق مدعمين اجاباتهم بمعلومات موجودة داخل النص.مثلا لماذا اجابتك هي افضل إجابة** **My answer is the best because ----------** **----------** **----------** **----------as it is mentioned in paragraph ( ) line( ) I quote some evidence that support my answer"_____**

Question 1: Inference (2 Marks) Read the following text and answer the questions below. Use full sentences. **Text:** **The Future of Work: The Impact of Artificial Intelligence on Jobs** Artificial intelligence (AI) has been transforming industries at an unprecedented rate, and its impact on the future of work is both exciting and concerning. In the workplace, AI has already shown its potential to automate mundane tasks and increase efficiency. For example, AI can quickly analyze data and generate reports, allowing employees to focus on more strategic and creative tasks. As a result, businesses can increase productivity and innovation, which may lead to a more competitive global economy.	**_____** **_____."** **اجابتي افضل إجابة لأنه---------** **----------كما هو مذكور** **في الفقرة -----السطر -------** **واقتبس الدليل التالي من النص** **"----------"**

However, there are significant challenges. The widespread adoption of AI could result in job displacement, especially in sectors that rely heavily on routine, manual labor. According to a recent study, automation could eliminate millions of jobs in the next few decades, particularly in industries like manufacturing and retail. While some argue that AI will create new jobs, these may require skills that many workers do not currently possess. To address these issues, experts suggest that workers will need to adapt by acquiring new skills, especially those related to technology. Companies and governments are urged to provide retraining opportunities and promote lifelong learning to help workers transition into new roles. The future of work will require collaboration between businesses, policymakers, and employees to ensure that technological progress benefits everyone.	

Free-Response Question: **1. In your opinion, what is the primary concern regarding AI's impact on the future of work as discussed in the text?** **Model Answers** **Question 1 (Inference):** The main challenge faced by the villagers is the destruction of their forest by the logging company. **Question 2: Justification (3 Marks)** **2. Justify your answer to the previous question using evidence from the text.**	

This is the main challenge because the text mentions that the villagers "relied on the trees for food, shelter, and income." It also states that "large trucks arrived, and workers began cutting down the trees at an alarming rate," which caused the villagers to worry about losing everything. Their decision to write a letter and contact environmental organizations further shows how serious this problem is to them. **I think that ----------because ----------** **----------** **----------** **My answer is the best because ----------** **----------as it is mentioned in paragraph ( ) line( ) I quote some evidence that support my**	

1. Inference Answer (2 marks): **The primary concern regarding AI's impact on the future of work is the potential for job displacement, especially in sectors that rely on routine, manual labor.** **2. Justification (3 marks):** **The text highlights the concern that AI will eliminate millions of jobs, particularly in industries like manufacturing and retail. It states, "Automation could eliminate millions of jobs in the next few decades, particularly in industries like manufacturing and retail." This clearly shows that job loss due to AI automation is a significant worry.**

In today's globalized world, technology has made vast strides in improving communication. The advent of the internet, smartphones, and social media has significantly impacted the way people interact with each other. In the past, communication was limited by geographical and

technological barriers, but now, people can connect instantly, regardless of their location. Social media platforms, such as Facebook, Twitter, and Instagram, have created new spaces for individuals to share their thoughts, images, and experiences. These platforms also provide businesses with new ways to interact with customers and promote their products. **However, while technology has facilitated communication, it has also led to new challenges. The rise of digital communication has contributed to the decline of face-to-face interactions, which can negatively affect personal relationships. Studies have shown that excessive use of social media can lead to feelings of loneliness and isolation, especially among younger generations who spend much of**	**نص 1 (6درجات)** **6يقوم الطلبة قراءة نص بسيط والاجابة عل أسئلة اختيار من متعدد الإجابات مباشرة ومستوى النص اقل من مستوى الصف**

their time online. Furthermore, the prevalence of online misinformation and cyberbullying are growing concerns. As people become more reliant on digital platforms, it is essential to consider how this shift impacts society on a broader scale. **Despite these challenges, technology also has positive aspects. It has made it easier to access information, learn new skills, and stay connected with family and friends across the globe. Educational platforms and online courses are helping people improve their knowledge, while video calling allows families to maintain close relationships, even when they are far apart. As technology continues to evolve, it will be interesting to see how it shapes human communication in the years to come.**

Text: Maria had always been fascinated by the stars. Ever since she was a child, she would spend hours gazing up at the night sky, wondering about the vastness of the universe. As she grew older, her fascination turned into a passion for astronomy. Maria spent her evenings studying constellations and reading books about distant galaxies and space exploration.	**نص 4 (3درجات)** يقوم الطلبة بقراءة نص طويل والاجابة على 3 أسئلة اختيار من متعدد تكون بمستوى الصف

One evening, as she was observing the stars through her telescope, she noticed something unusual. A bright light appeared in the sky, moving slowly but steadily. Maria couldn't believe her eyes. Was it a plane, a satellite, or something else? She watched intently, her heart racing with excitement. The light seemed to grow brighter and then disappeared into the night, leaving her with more questions than answers.	وتكون الإجابات وغير مباشرة وتحتاج لتحليل وتفكير خارج الصندوق والربط والاستنتاج للوصول للإجابات لذا يجب التركيز

In the days that followed, Maria couldn’t stop thinking about what she had seen. She told her friends, but they were skeptical, dismissing it as a trick of the light or some ordinary object in the sky. Maria, however, felt a deep sense of wonder and curiosity. She knew that the universe was full of mysteries, and this experience only fueled her desire to learn more. As she looked up at the stars once again, she realized that there was so much	

more to discover, and she was determined to keep searching for answers.	
1. What is Maria's main passion in life? a) Space travel b) Astronomy c) Writing books	
2. How does the tone of the text change when Maria sees the unusual light in the sky?	

a) It becomes more relaxed and humorous. b) It becomes more excited and filled with curiosity. c) It becomes sad and confused.	
3. What can be inferred about Maria's personality from the text? a) She is skeptical and dismisses unusual events. b) She is driven by curiosity and a desire to	

explore.

c) She prefers to stay indoors rather than explore the outdoors.

Text:

In recent years, there has been an increasing focus on sustainable living, with more people choosing to live in a way that minimizes their environmental impact. Sustainable living refers to making

choices that are environmentally responsible, economically viable, and socially equitable. People who adopt a sustainable lifestyle aim to reduce their carbon footprint, conserve natural resources, and support practices that contribute to the well-being of the planet. One significant aspect of sustainable living is reducing waste. Many people have adopted the practice of recycling and composting, which helps keep materials out of landfills and reduces the need for new resources. Some individuals have gone further by opting for a zero-waste lifestyle, where they try to avoid any waste at all. This involves using reusable items, such as cloth bags, glass containers, and metal straws, and reducing the consumption of single-use plastics. Another important aspect is the use of renewable energy. Solar panels, wind turbines, and other forms of clean energy are becoming more accessible and affordable. These technologies	

allow households to generate their own energy, reducing their dependence on fossil fuels. In addition to benefiting the environment, renewable energy can also lower utility bills, making it a practical option for many. Sustainable living also involves making conscious choices when it comes to food. Eating locally grown produce, for example, reduces the carbon emissions associated with transporting food over long distances. Many people also choose to eat less meat, as livestock farming has a significant environmental impact. These choices not only benefit the planet but can also improve personal health. While sustainable living may require some initial investment or changes in lifestyle, the long-term benefits are undeniable. It contributes to a cleaner environment, helps conserve resources, and promotes a healthier lifestyle. As more people embrace these	

practices, the collective impact on the planet will continue to grow, leading to a more sustainable future for generations to come.	
1. What does sustainable living primarily aim to reduce? a) The cost of living b) Environmental impact c) The need for technology	
2. What is one of the main practices that people who follow a sustainable lifestyle adopt? a) Using more disposable products b) Recycling and composting c) Increasing consumption of meat	

3. According to the text, how does renewable energy benefit individuals besides helping the environment? a) It provides free energy forever. b) It can lower utility bills. c) It makes people more reliant on fossil fuels.	
4. What is one way people reduce their carbon footprint related to food consumption? a) By eating food that is imported from other countries. b) By eating less locally grown produce. c) By choosing locally grown produce.	
5. What does the text suggest about the initial investment in sustainable living?	

a) It is too expensive for most people.

b) It has little effect on lifestyle changes.

c) It may require effort or cost but offers long-term benefits.

6. How does reducing meat consumption relate to sustainability?

a) It decreases the environmental impact of livestock farming.

b) It increases reliance on imported goods.

c) It has no effect on the environment.

7. What is the overall tone of the text?

a) Negative and critical

b) Informative and encouraging

c) Pessimistic and doubtful

Answers:

1. b) Environmental impact
2. b) Recycling and composting
3. b) It can lower utility bills.
4. c) By choosing locally grown produce.
5. c) It may require effort or cost but offers long-term benefits.
6. a) It decreases the environmental impact of livestock farming.

Text: **In recent years, there has been a growing movement towards plant-based diets. People are increasingly turning to vegetarianism or veganism for various reasons, including health benefits, environmental concerns, and ethical reasons. Research has shown that plant-based diets can reduce the risk of chronic diseases such as heart disease,**	

diabetes, and obesity. Additionally, plant-based eating has a lower environmental impact compared to diets that rely heavily on animal products. Livestock farming is a major contributor to greenhouse gas emissions, deforestation, and water pollution, making plant-based diets a more sustainable choice for the planet. **Beyond the health and environmental aspects, many people choose plant-based diets for ethical reasons. Factory farming, which is commonly used in the meat industry, often involves inhumane treatment of animals. By adopting a plant-based diet, individuals can reduce their involvement in these practices and support more ethical food production systems.**	

Despite these benefits, switching to a plant-based diet can be challenging for some people. For one, it often requires significant changes to eating habits, which may be difficult to maintain over time. Additionally, plant-based foods may be perceived as less convenient or more expensive, although this perception is changing as more people embrace this lifestyle. Many grocery stores now offer a wide variety of plant-based products, making it easier for people to find alternatives to meat and dairy. **As more people adopt plant-based diets, there is also an increasing demand for plant-based products, which has led to innovation in the food industry. Companies are developing new plant-based meats, cheeses, and dairy alternatives that are more affordable and accessible than ever before. As the**
