1 Talk about it

Look at the photos. What do you think the text is about?

99 2 Read and listen

Read and listen to the text to see if your prediction in Activity 1 is correct.

The UAE has the tallest skyscraper in the world. It is called the Burj Khalifa, which is in Dubai. It is nearly 830 metres tall and has 163 floors!

Dubai has over 196 high-rise buildings. If a fire starts in a tall building, it is very difficult to put it out.

Helicopters can fly up high and throw water on the flames, but this can take a long time. It is very dangerous and firefighters must be very brave.

Firefighters in Dubai will soon have flying jetpacks so they can fly up to the high skyscrapers and fight the fires.

It can be very windy at the top of skyscrapers and the wind makes the fire bigger and stronger. The jetpack firefighters will be able to reach the higher floors more easily and more quickly. Firefighters are people who do amazing things to help other people.

Vocabulary

dangerous: something that could harm you

jetpack: something worn on a person's back to help them fly in the air
