Read the following text carefully then answer the questions below:

Dolphins are known for their intelligence and kindness. Did you know that dolphins can also help people? Dolphins have been trained to save people who are in trouble in the ocean. These dolphins are called rescue dolphins.

Rescue dolphins can swim very fast and reach people who are far away in the water. Sometimes, **they** carry a special float ring that helps people stay above water until a boat comes to **rescue** them. Dolphins are good at finding people in the water, even when the waves are high.

During wars, dolphins have also been used to carry messages, similar to carrier pigeons. The message is placed in a small waterproof case attached to the dolphin. The dolphin then swims quickly to deliver the message to a ship or another location.

Rescue dolphins are especially helpful in bad weather when it is hard for boats or helicopters to see lost people. Their sharp eyes and amazing swimming skills make them great helpers in saving lives.

Read the following text carefully then answer the questions below:

The deep sea is a mysterious part of our planet. It is the part of the ocean far below the surface where sunlight cannot reach. The water is cold, and the pressure is very high.

Many strange creatures live in the deep sea. Some, like the anglerfish, have lights on their bodies to attract prey. Others, such as jellyfish, glow in the dark. These animals have **adapted** to survive in the harsh conditions of the deep ocean.

Scientists use special submarines to explore the deep sea because it is too dangerous for humans to dive there. **They** have discovered fascinating things, like underwater volcanoes and new types of fish.

The deep sea is important to study because it holds clues about the history of our planet. It is also home to resources that could help people, such as rare minerals. However, pollution and climate change are threats to this fragile ecosystem, and scientists are working to protect it.

Read the following text carefully then answer the questions below:

One morning, Omar woke up to hear the sound of rain tapping on the roof. It was a cold and rainy day, but Omar was excited. He loved rainy days because he could go outside and have fun with his dog, Max. Omar quickly put on his raincoat and boots, and together, they went outside. The grass was wet, and there were puddles everywhere. Omar loved jumping in the puddles, feeling the cool water splash up around him. Max ran around, wagging his tail, chasing after sticks and jumping over the small puddles.

As they explored the backyard, Omar spotted a small frog sitting on a rock near the garden. Omar knelt down and watched the frog closely before it hopped away, disappearing into the grass. After playing outside, Omar and Max went back inside. Omar's mother made him a warm cup of cocoa. He sat by the window, watching the raindrops fall as he sipped his drink.

Rainy days were always fun for Omar, filled with puddles, frogs, and warm drinks inside.
