I. Reading Comprehension

The Internet is an important way to communicate with friends and family. Many people use social media, messages, and video calls to stay connected.

Socializing on the Internet is easy and fast.

We can talk to our friends at any time, even if they live far away. We can send messages, share photos, and make video calls. We can also meet new people who have the same interests

However, socializing on the Internet has some disadvantages. Sometimes, people spend too much time online and do not talk to others in person. Also, we can't always know how someone feels through a message.

In my opinion, socializing on the Internet is useful and fun. It helps us stay in touch with people and make new friends. We should use the Internet wisely and also spend time with people face-to-face.
