Reading / Part 1: Comprehension

In this section, you will read a passage and answer (2) selected response questions and (2) constructed response ones. Be sure to put your answer in the space provided.

1 There are over 2,000 various kinds of tea in the world. This enormous number of teas can be divided into five categories: green tea, black tea, white tea, oolong tea and herbal tea. All these types of tea come from the same plant, camellia. Different teas are made by doing different things to the leaves of the camellia plant.

2 A variety of tea that has recently grown in popularity worldwide is green tea. There are several reasons why green tea has become popular. It has less caffeine than black tea and has a nicer flavour. But the most likely reason green tea has increased in popularity is the fact that many people think that drinking green tea is good for your health.

3 Green tea was first drunk in China more than 4,000 years ago and it still enjoys popularity there today. There are many kinds of green tea in China. Each province, or area, of China produces various kinds of teas. The most famous Chinese tea, called Longing Tea, comes from Zhejiang Province. This area of China has a very good climate for growing tea and there are many **famous** kinds of tea that come from there.

4 China isn't the only country to have tea drinking traditions. Japan, Korea, Vietnam, Thailand and many other Asian countries produce and drink green tea and have done so for thousands of years. Japan has an especially rich green tea culture. Like China, there are different areas of Japan that are famous for various kinds of tea.

5 People have thought for a long time that green tea has positive effects on our health. Firstly, many studies have shown that green tea can reduce heart disease, some kinds of cancer and improve brain functioning. Scientists also have studied green tea's effect on weight loss, cancer, heart disease, Parkinson's disease and glaucoma. The results of these studies have shown that green tea might help in treating or preventing these diseases. Whether you believe that it can cure all your diseases or not, green tea is very popular now and will most likely continue to be popular in the future.

1. What type of writing is the text above?

- A. Short story
- B. Formal letter
- C. Business report
- D. Magazine article

2. Read the following sentence from paragraph 2.

Reading 2 - Junk Food

1 In today's fast-moving world, people have less and less time to spend eating. It is probably for this reason that junk food has become so popular, and there is no doubt that it is here to stay. In fact, it seems that you simply cannot get away from it. One British hotel group recently announced that the guests are able to order fast food through room service, a move which is seen by many as signifying a new era in the couch potato lifestyle.

2 So what exactly is junk food? Basically, it is anything that is high in calories but lacking in nutrition. Burgers, crisps, chocolate bars and hot dogs fall into this category. Pizzas, although they can have vegetables and cheese toppings, are also included as they contain a lot of fat.

3 Obviously, a diet of junk food is not the best thing for your health, particularly as it is high in saturated fat. In 1993, the Journal of the National Cancer Institute reported this type of fat to be associated with greater risk of cancer. Apart from the risk of cancer, another side effect of consuming highly fattening junk food is that you are likely to gain weight. This is especially true because you tend to eat more, as junk food is less satisfying and lower in vital nutrients than healthier food. The best advice, then, for those who cannot live without their burgers or chocolate bars, is to limit the amount of junk food they eat. A little now and then will probably do no harm.

4 But why have our eating habits changed? "It is lack of time and loss of tradition," says an expert. He explains that people are too busy to cook and eat proper meals, so they grab whatever is available, and that is usually junk food. Also the style of life represented on TV, especially in music videos, is fast. Young people pick up the idea that speed means excitement, whereas anything traditional is slow and boring. As a result, they turn down traditional food and go for junk food instead.

5 Another alarming thing about people's lifestyle today is that while the amount of junk food we eat has increased, the amount of exercise we do has actually decreased.

Exercise plays an important part in keeping the body fit and healthy; it helps control our weight and, if taken regularly, can also decrease our chances of having a heart attack in later life. What is more, you do not have to exercise much to gain visible benefits. Doctors say that twenty minutes' exercise three times a week is all that is necessary.

6 Even though people nowadays are actually far more aware of the importance of exercise and healthy diet than they were a few years ago, the new unhealthy way of life is surprisingly popular. This is illustrated by statistics gathered by researches over the past two decades. Researchers suggest that the new generation will be much more likely to suffer from heart and liver disease. What cannot be emphasized enough is the fact that a balanced diet and regular exercise bring significant health benefits.

1. According to doctors, how often should everyone take exercise?

- A. 3 hours every week
- B. 20 minutes every day
- C. 20 minutes three times a week
- D. 30 minutes three times a week

2. What is the author's attitude towards the modern lifestyle?

- A. People should not eat junk food at all.
- B. People should keep their current life style.
- C. People should make regular medical checkups.
- D. People should take regular exercise and eat less junk food.

**3. According to paragraph (5), what is the best way to keep fit and healthy?
