The famous fast food restaurants like Hardee's make sure that a beef burger in Kuwait tastes the same as the one in New York and not different from the one bought in London. An example of fast food is beef burgers. They have too much salt, fat and spices. This mixture of fat, sugar and salt set off the pleasure chemicals in the brain. That is why people like having fast food. But, some people say that they are not good for health. They don't have the important food elements **which** our bodies need.

Food experts advise us not to eat tinned food because it is not fresh. Sometimes, fast food is not well protected from dirt, dust, and insects, especially flies.
