Social media

Social media is a media for social communication as the comprehensive set behind social media. Google played a big role in the previous stage, as it facilitated many things, Google helped people in finding information, it helped in translating languages and in using location app if we got lost in the way to any place

Using Whatsapp helps you to communicate with your family , friends , etc. by chatting and calling . and nowadays you can post pictures and videos on your own status. you can use a VPN application is essential to maintain your anonymity online and the ease of use of services and blocked websites in your area. Thus, you should secure your movement by using the F-Secure Freedome app which is easy to use, which works quietly and does not consume much of the phone's resources.
