Plan

Technolgy

- Good Effects
  - Creative Actions
  - Fast Actions
  - Completed Needs
- Bad Effects
  - Enviromental Pollution
  - Loneliness
  - Psychological Problems

There is no doubt that technology makes a real revolution in our lives. Today people can't live without technology as smart phones, laptops, robots and tablets. All industries, engineering and inventions now are done through smart applications which provided by technology and science everywhere. We can say that technology teach people how to be creative and smart in their actions in life to lead a happy life. It also affects our behaviours to be fast in all actions. Due to technology we can say that we live in the age of sandwich. Everything is done fast. Technology proved to the humanity that no single piece of technology has zero impact on human society. Since the necessity is the mother of invention. All invented technology was created to meet the needs of a society.

In the light of the above, we can say that technology has many good and bad effects on our lives. No one can deny that technology help us thinking fast and better to solve our problems. It creates many amazing tools and resources providing us more and more job opportunities especially in Corona pandemic. Also, it saves time and money as well as technology provides safe storage for information. We can say without technology via the different platforms and online courses, sure all the educational systems can be destroyed completely. On the other hand we can find many bad effects as destroying the social relationships in families. Children suffer from loneliness as a result of using smart devices too much time. For the same reason, even adult people can suffer from psychological problems. Finally due to the more industrial humans' activities technology causes serious environmental pollution. But really technology gives us a comfortable, easy life.
