Watching television
How could we benefit from TV
TV as an educational aid

The fact that can't be easily swept under the carpet is that TV has been vital in everyday's modern life.

Regarded as a crucial mean of getting information, people have got used to deal with TV in such a way that avails them to obtain different kinds of data. Not only can TV be used for having information, but it would be widely used as a valuable teaching aid. Students nowadays are to use TV for helping them visualize what they have already been taught at school. They can learn languages through watching films, serials or even programmes. They can revise lessons they have been taught at school via the educational channels that are available nowadays.

Concerning the advantages of TV, we can promote our knowledge and imagination through watching TV. We can learn the family values and the teachings of our religion. Also, TV is likely to be used as an integral mean of entertainment.

It also has some disadvantages. One of these disadvantages is its bad effect on the eyes when we watch it for a long time. Watching it for along time and during the mealtime turns us to be lazy and idle. It may promote bad thinking and encourage violence if it obtained in the hands of bad communities. It can transmit bad ways of thinking. It can spread improper ideas against our values and traditions.

We can benefit from TV by putting guidelines to consume it appropriately. We should set viewing time. As I see, we should set family rules.

Finally, TV can be a double- edged weapon; so, we should use it properly for the benefits of people and the society.
