B. Reading Comprehension (16 Marks)

• Read the following passage carefully, then answer the questions below:

Every year, I spend part of my holidays on my grandparents' farm. We live in Boston, so we can't visit them that often. Spending my summer holidays with them is a great opportunity to do things I normally never do. My two cousins are also there and we all sleep on the tree house my grandfather built for us when we were little kids. In the morning, we ride our bikes through the mountains and valleys, free from the city traffic. Other mornings we just love to explore nature and so we go for long walks. That's when we come back home with a bucket full of wild berries which are very tasty.

Of course we all help out on the farm. I prefer feeding the sheep, chicken and cows while my brother is more keen on fruit picking and cleaning the stable. Our cousins are more interested in gardening with the help of our grandmother.

In the afternoon, we love to take <u>a nap</u> so that we can stay up late at night in our amazing tree bedroom, playing cards, board games or just talking and laughing. When the sun goes down, we usually go fishing with grandpa to a river nearby. I'm the luckiest one because fish seem to be attracted to my fishing pole.

a. Choose the correct answer from a, b, c and d: $(6 \times 2 = 12 \text{ Ms.})$

- 9. What's the best title for this passage?
- a. City Traffic
- b. Mountains and Valleys

Read the following passage carefully, then answer the questions below:

Everything that is alive needs energy. All animals get the energy they need from food. Think about the human body as an amazing machine. It can do all kinds of activities for us. Food is the fuel that helps keep the amazing machine **running**.

Plants use sunlight to make their own food. Animals are not able to do that. Some animals eat plants, while others eat other animals as meat. Some animals and people eat both plants and animals.

Since plants make their own food using sunlight, the sun's energy is found in plants. The sun's energy is very strong. It loses a lot of its strength by the time <u>it</u> goes into a plant.

When we eat plants, we get more of the sun's energy than when we eat animals. That's why it is good to eat fruits and vegetables. When an animal eats a plant, the energy is less strong. The animal also uses its energy to find the plant to eat.

Like a car that has to be filled with gasoline, living things have to eat again and again. Instead of gasoline, living things use food as fuel.

A) From a, b, c and d, choose the correct answer: (6X2=12 Marks)

- 9. What is the best title for this text?
 - a- Cars and Gasoline

-Read the following passage carefully, then answer the questions below:

Some airplanes are made specifically to land on water, but US Airways Flight 1549 was not one of those planes. The plane took off from LaGuardia airport on January 15, 2009, with 155 people on board. Just three minutes later ,the pilot, Captain Chesley Sullenberger, radioed that the plane was in trouble. It had hit some large geese. The left engine had exploded in fire, smoke, and metal.

Captain Sullenberger quickly realized that the plane couldn't make it back to the airport. Sullenberger turned the plane toward the Hudson River. Many passengers were <u>tense</u> and scared, but the flight crew did their best to keep <u>them</u> calm. Most passengers lowered their heads and got ready for a rough crash landing.

After several minutes, Captain Sullenberger landed the plane perfectly on the surface of Hudson River. The plane's passengers climbed onto the wings as the plane began to fill with water and sink. Boats from both sides of the river rushed to aid the passengers. The water was icy and cold. As passengers scrambled from the plane to the waiting boats, rescuers handed them blankets, coats, and life jackets to stay warm.

All 155 people were brought to safety, and Captain Sullenberger was celebrated as a hero.

B- Reading Comprehension (16 Ms)

Read the following text carefully, then answer the questions below:

A robot is a special kind of machine that moves and follows the instructions which come from a computer. That is why it neither makes mistakes nor gets tired. Some robots can help make cars in factories. Other robots are used to **explore** dangerous places such as volcanoes. **They** can help women do all the housework. Also, they can be used to answer telephone calls. Mainly there are two types of robots: The fixed robot which is kept to a certain place while doing his work with his hands and the mobile robot which moves from place to place using wheels, legs or other moving mechanisms.

Long ago, over 2000 years ago, a famous writer called Homer imagined robots. His robots were made of gold. They cleaned things and they made things. Nobody was able to make a real robot at that time.

The first real robot was made in 1961. It was called Unimate. It was used to help make cars. Today, it is used everywhere. In the future, we will have even more robots. They will do difficult and dangerous things that we cannot do. Robots will help us fight fires, fight sickness and do many of the tasks that we don't or can't do.

B: Reading Comprehension (16 Marks)

Read the following text carefully then answer the question below:

The Olympics are an <u>international</u> sporting competition where thousands of athletes from around the world would gather and compete against each other. The Olympic Games celebrate physical strength and the hard work of well-trained athletes all over the world.

The Games began in Olympia, Greece almost 3000 years ago! The first few Olympics just had a running race **that** took place on one track and only lasted one day, but more events got added on later and it became a five-day event. The athletes would compete in sporting events like running races, boxing, wrestling, and horse races. In the past, there would only be one winner and he would receive an olive leaf crown. Nowadays, the three top winners get gold, silver and bronze medals at the end of each event.

The Olympics are held every four years in different countries all over the world. There are now four different types of Olympics games that suit different people: The Summer Games which originally started in Greece; The Winter Games which focus on snow and ice games; The Paralympics which allow disabled athletes to join; and The Youth Games which give athletes between the ages of 14 and 18 a chance to compete.

B. Reading Comprehension(16Ms)

Read the following passage, then answer the questions below:

Japan is a group of islands in the south east of Asia. It is not a very big country but it has a large population. Tokyo is the capital city. The sea is important for the Japanese. They cultivate pearls in the warm water around the islands. They also grow rice and vegetables. Japan is mainly an industrial country. Some of the best products like radios, televisions, computers, cameras and cars come from Japan and they are famous all over the world. So, "Made in Japan" is a trustful label.

The Japanese are very polite and active people. They work hard. They even don't like holidays. They love flowers and they welcome their visitors warmly. Old Japanese usually wear traditional clothes called kimonos. The Japanese don't sit on chairs when they eat; they kneel on the floor. They don't use knives, forks or spoons. They use wooden chopsticks. Their favourite food is raw fish and rice.

The Japanese writing is very strange. It has no alphabet as in Arabic or English. It has a system of pictures and their writing goes from top to bottom. Japan is a good model of a modern country.

B. Reading comprehension (16 Marks)

Read the following text carefully then answer the questions below:

16

Although we still don't know how our sense of smell works, our love of perfume is very old. The Ancient Egyptians used to put perfumed oils in their hair. The oil found in Tutankhamen's tomb was still fragrant when it was opened 2.000 years after he'd been buried there. At feasts in Roman times, white birds with their wings covered in perfume, too flew around the room so that the air was filled <u>magnificently</u> with a sweet scent.

In Paris there's a perfume museum called Osmotheque, which has an amazing 1.100 perfumes. Next to the museum is a school. Perfumers who make perfumes are taught **there** how to create new fragrances. There are only about 400 of them in the world. To make a single kind of perfume you need between 400 and 500 ingredients, which are often costly.

How do you decide whether a perfume is right for you? First, never buy a perfume that you haven't tried on your skin. What smells nice on a friend may smell terrible on you. Secondly, avoid heat and light. It's important to keep perfumes in a dark place at a temperature of no higher than 15°C.

A) Choose the correct answer from a, b, c & d: (6x 2 = 12 Ms.)
