7. Everybody has the right to..... happiness.

8. The U.S. has a variety of groups made up of immigrants and native Americans.

B- Reading Comprehension (16 Ms)

-Read the following passage carefully, then answer the questions below:

Rainbows are often seen when the sun comes out after or during a rainstorm. Rainbows are caused when sunlight shines through drops of water in the sky at specific angles. When white sunlight enters a raindrop, it exits a different color.

When light exits lots of different raindrops at different angles, **it** produces the red, orange, yellow, green, blue, indigo, and purple that you see in a rainbow. Together, these colors are known as the spectrum. These colors can sometimes be seen in waterfalls and fountains as well. The view of the rainbow in the sky is very **spectacular** and amazing. Rainbows can be full circles. However, the observer normally sees only an arc formed by illuminated droplets above the ground, and centered on a line from the sun to the observer's eye.

Did you know that there are double rainbows? In a double rainbow, light reflects twice inside water droplets and forms two arcs. In most double rainbows, the colors of the top arc are opposite from those in the bottom arc. In other words, the order of colors starts with purple on top and ends with the red on bottom.

In addition, rainbows sometimes appear as white arcs at night. These rainbows are called moonbows and are so rare that very few people will ever see one. Moonbows are caused by moonlight (rather than sunlight) shining through drops of water.

A) Choose the correct answer from a, b, c and d: (6x2 = 12 Ms)

9) The best title for this passage is

- a) beautiful sky b) beautiful fountains c) beautiful rainbow d) beautiful water
