VI- Reading Comprehension (80 Marks)

Read the following passage, and then answer the questions below:

We use energy to run our cars and trucks. Both the gasoline used in our cars, and the diesel fuel used in our trucks are made from oil. The propane that fuels our outdoor grills and makes hot air balloons soars made from oil and natural gas.

We use many different energy sources to do work for us. Energy sources are classified into two groups – renewable and nonrenewable. Renewable and nonrenewable energy can be converted into secondary energy sources like electricity and hydrogen. In the United States, most of the energy used comes from nonrenewable energy sources. Coal, petroleum, natural gas, propane, and uranium are nonrenewable energy sources. They are used to make electricity, to heat our homes, to move our cars, and to manufacture all kinds of products.

These energy sources are called nonrenewable because their supplies are limited. Petroleum, for example, was formed millions of years ago, from the remains of ancient sea plants and animals. We can't get more petroleum in a short time.

Renewable energy sources include wave energy, solar energy, and wind energy. They are called renewable energy sources because they are renewed in a short time. Day after day, the sun shines, the wind blows, and the rivers flow. We use renewable energy sources mainly to make electricity.

Electricity and hydrogen are different from the other energy sources because they are secondary sources of energy. Secondary sources of energy – energy carriers – are used to store, move, and deliver energy in easily usable form. We have to use another energy source to make electricity or hydrogen. In the United States, coal is the number one energy source for generating electricity. Today the cheapest way to get hydrogen is by separating it from natural gas, a nonrenewable energy source. Hydrogen can also be separated from water and from renewables but hydrogen made from these sources is currently too expensive to compete with other fuels. Scientists are working on ways to make hydrogen from water and renewables more affordable.

Choose the right answer from a, b, c and d:

1- The best title for this passage is:

- a. the need to electricity
- b. the sources of energy
- c. the manufacturing of products

d. the energy used in cars is expensive

2-The word "they" in the second paragraph refers to:

- a. the nonrenewable sources of energy
- b. the renewable sources of energy
- c. all kinds of products
- d. the homes which need electricity

3-One of the following sentences is **NOT TRUE**:

- a. coal, gas and oil are non-renewable sources of energy
- b. solar power, wind power and wave power are renewable sources of energy
- c. electricity is a secondary source of energy
- d. propane is renewable sources of energy

4- What is the purpose of the writer from writing this passage?

- a. to tell us about the different uses of electricity
- b. to explain that hydrogen is a secondary energy source
- c. to give us information about kinds and uses of energy
- d. to convince us to use non-renewable source of energy

5-The **opposite** of the word "affordable" in the last paragraph.....

- a. too expensive to be afforded by the average person.
- b. inexpensive; reasonably priced.
- c. cheap or economical
- d. reasonable or low-cost.

6-What is the source of energy that is used to transfer energy in an easy usable way?

- a. renewable energy
- b. non-renewable energy
- c. electricity
- d. gasoline

7-The cheapest way to get hydrogen is by separating it from:

- a. water
- b. renewable
- c. natural gas
- d. wind

8- Renewable source of energy are:

- a. limited
- b. finite
- c. endless
- d. fixed

VII- Summery Making (60 Marks)

Read the following, then do as required. (4x15=60M)

Indeed, the television brings the world into our house. Hence, by staying at home and pressing some buttons world happenings are immediately presented before us. Children nowadays develop faster in language, owing to the early exposure to television programs. At such tender age, it would be difficult for them to read books or papers. Thus, television programs are a good source of learning for them. Furthermore, pronunciations by the newscasters, actors or actresses are usually standardized, hence young children watching these programs will learn the 'right' pronunciations too. Owing a television is also extremely beneficial to working parents who are usually too busy or tired to take their kids out for entertainments. Surrounded by the comforts of their home, the family can have a chance to get together and watch their favorite television programs.

In FOUR sentences ONLY, summarize and paraphrase the previous passage in an answer to the following question:

"What are the advantages of television?"
