Read the following passage carefully, then answer the questions below:

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again.

Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass and plastic can be recycled. It also reduces pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done over and over again. Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

A) From a, b, c and d choose the right answer:

1) What is the main idea of paragraph (4)?

- a) What recycling is.
- b) How to save the future.
- c) Why plastic is important.
- d) How to recycle different things.

2) What is the **meaning** of the underlined word "**reduces**" in paragraph (2)?

- a) lowers
- b) helps
- c) uses
- d) improves

3) What does the underlined word "it" in paragraph (3) refer to?

- a) fuel
- b) time
- c) energy
- d) recycling

4) Plastic is called the wood of the future because:

- a) it's a natural material.
- b) it helps save money.
- c) it is strong and beautiful.
- d) it can be used to make furniture.

5) According to the text, **one** of the following statements is **NOT TRUE**:

- a) Some All trash and waste can be recycled.
- b) Harsh weather doesn't affect plastic.
- c) It's difficult to find space for trash.
- d) Glass and metal can be recycled many times

6) The **purpose** of the writer is to tell us that:

- a) All materials on earth are useful.
- b) Planting trees helps in recycling.
- c) Recycling is a good way to use trash.
- d) Steel and aluminum can be recycled easily.

B) Answer the following questions:

7) What kind of materials can you find in your house that can be recycled?

I can find paper, plastic and glass.

8) Why is recycling important to the environment?

It is important because it saves space in trash dumps and recycled materials can be used again and again.

Expeditions

Expeditions are good for fun and escaping from the daily routine. Last month, my friends and I organized an expedition across the desert from Kuwait to Saudi Arabia. Before leaving, we were well prepared for our journey. We took enough food and water. We also took a compass to know the directions. We took the tents and some blankets. We took our mobile phones to call someone if we face any problem. We didn't forget to take a cream to protect our skin from the sun light.

H.L.

Our expedition was very interesting but we faced some challenges. At the beginning of our journey, we were lost in the desert, and after a short time we arrived our destination. The temperature was high during the day. We faced some wild animals, but we were able to be safe. Everyday, we walked for a long distance. At night, we slept in our tents and we were careful because of dangerous animals such as snakes and spiders. At the end of our expedition, we went back home with many useful information. Our journey was very successful because we were well-prepared and worked as a team.

Reading Comprehension

Reading the following passage carefully, then answer the questions below:

My four grown children were all home visiting last weekend so we decided to go out for breakfast. My young granddaughter had never had pancakes before, so we were **excited** about her trying them. We ordered different kinds of pancakes and the baby loved them.

There was a lovely environment at the table and lots of smiles. As I was looking around the table, enjoying this wonderful scene, a lady at a nearby table caught my eyes. She was eating her breakfast alone quietly, in the corner. She frequently looked over and smiled as my granddaughter was laughing loudly. Suddenly, I had a great idea. I took out a smile card from my bag and called the waitress. I explained to **her** that I wanted to pay that lady's bill secretly and that instead of the bill she would give her the smile card.

The waitress came over and told us that the lady had passed the smile card on and paid for another table before she left. How great! Not only that, the waitress then came back later and told us that the second table had now paid for someone else and passed the smile card on too! I couldn't believe it when the waitress came back and told us that the third table had done the same thing.

What was really amazing, though, was that by the time we left, half the room had ended up paying for a different table! Isn't that great?

A) Choose the correct answer from a, b, c and d:
