Expeditions

the preparations

have a team

food and water

take clothes

have tents

the risks

bad weather

accidents

shortage of food

wild animals

Expeditions are so important for scientists .They help them to discover new discoveries. They have to prepare before going on expeditions .First , they need to make a team .They have to take water .They need to buy tents .They also need to take some clothes.

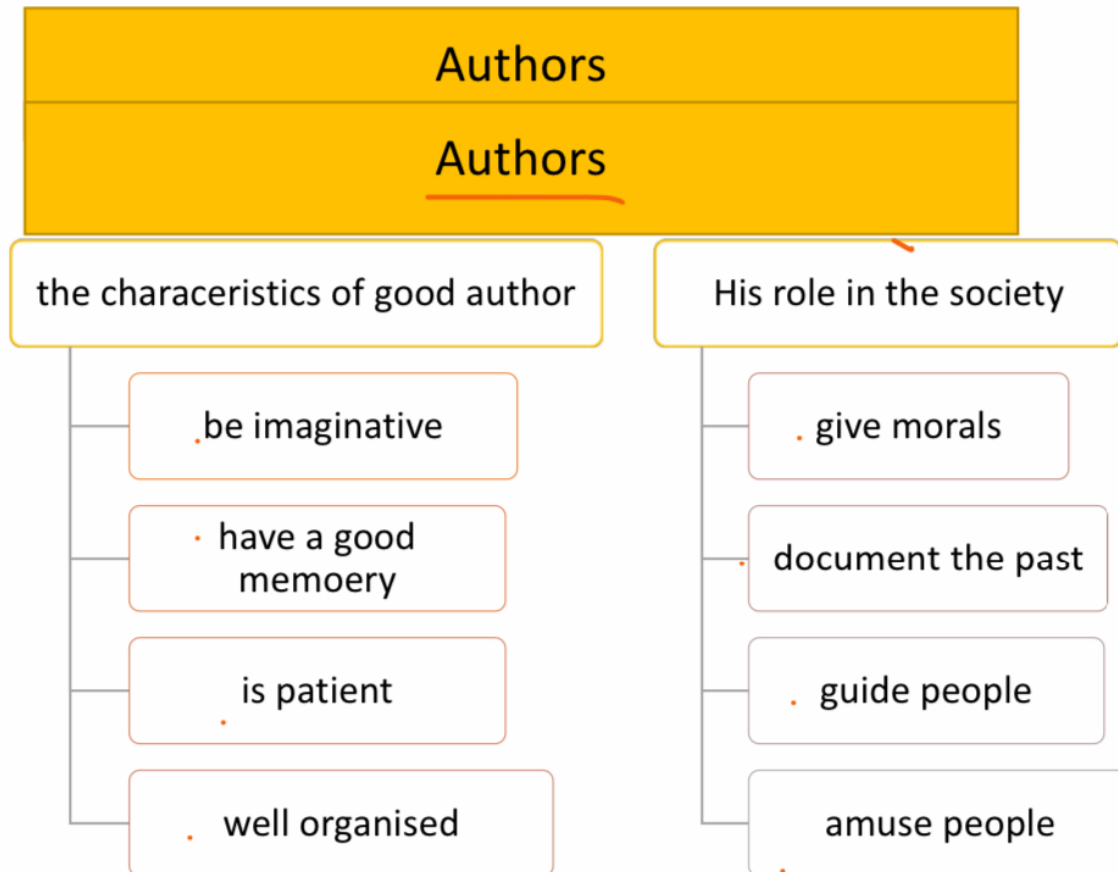

Despite it's importance yet expeditions have many risks. Scientists may be exposed to bad weather .They also may have accidents .The wild animals are also one of the dangers they face .Scientist may face shortage of food .To sum up, we have to appreciate the scientists role for their efforts to help the world .
