

B) Reading Comprehension (16 Marks)

16

Read the following passage carefully, then answer the questions below:

Cobras are one of the most dangerous types of snakes. They are poisonous. They live in the southern parts of Asia and Africa. Some of them live in grasslands, forests or deserts. Some others live in trees or along the shores of lakes. Cobras usually come in a single colour or with spots. **They** also come in different sizes. Cobras change their skin around 4 to 6 times per year.

Cobras usually raise their heads when they are scared and ready to attack. They hunt and look for food in the evening and at night. They feed on birds, other snakes, lizards and frogs. When Cobras lay their eggs, they build a nest to put them in and protect them until they hatch.

There are more than 40 kinds of Cobras. King Cobra is one of the deadliest. It is extremely **venomous** and have enough poison that can kill 20 people. The longest one can reach 18 feet long. They usually live for 20 years and are found mostly in India.

a) Choose the correct answer from a, b, c and d: (6 x 2 = 12 Marks)
