**+ Unit 10**

**E-mail about a charitable work**

**(A fundraising activity)**

**From : Khattab**

**To : Qasim**

Hi Qasim, how are you? Hope you're good, I'm writing to tell you about our class charitable work.

Last Saturday, our class team decided to hold a book fair at the school as a charitable work, we were looking forward to collecting as much money as we could to buy new computers for our school computer lab.

Everybody was generous; many of the students' parents came to the fair and donated. Some local businesses promised to double the money we collect. It was a great work because we collected about 3000 Dhs. We bought five computers for the computer lab. Everybody was excited. See you soon.

Khattab

**Free time activities**

There are many activities I do at my free time; I spend most of my free time doing these activities. About three days a week, I go to the gym with my friends. All the weekends, I meet up with my friends and some classmates to have fun together.

Most of week days, I stay at home to study my lessons, I sometimes play computer games and read short stories, I often watch cartoon movies or TV programs.

In fact, I have a good program to spend my free time.

## Unit 11

### **A plan for holiday**

**Hi Rashid,**

Great news! We're going on holiday to Cairo in Egypt next month. Have you ever been there? I haven't, but I'm really excited about going. My cousin is living there at the moment and he told me all about it. He said that Cairo was one of the biggest cities in Africa, and that it was the perfect place to go on holiday because it was great for sightseeing tours. He said that he often visited the Pyramids of Giza and the Mosque of Amr Ibn Al-Aas. He has also been to the Cairo Tower and the Khan El-Khalili market. He told me that the tower was very tall. He told me that the Khan El-Khalili market was exciting and colourful. He said he was really enjoying her time in Cairo. I can't wait to go.

See you soon,

**Ghaith**

### **An experience at an airport**

It was my first experience of being at an airport, I was travelling to England. I was at Abu Dhabi airport. I didn't know what to do before or after the plane lands. I asked a person in the airport to tell me where I will need to go and what I will need to do.

First, I checked in and got my boarding card. I looked for my flight on the board. On the plane, I asked the person in the seat next to me some questions about what we need to do after the plane lands. After landing, I went the passport control area, then to baggage reclaim to get my baggage after that I went to the arrival point because my cousin was waiting for me.

## Unit 12

### **Extreme weather situation**

Three years ago, it was evening time when my dad decided to take us to the park for fun. It was a cool and sunny day; we went to the park by car.

When we got there, we played on the swings and we had a walk around the park. Suddenly, it became cloudy and windy. At once, it rained heavily. The weather became extremely cold.

My dad told us to prepare ourselves to go home, it was my first time to see a snowy weather will never forget that day.

### **Eco-school**

Emirates School is the eco-friendly building in the UAE. It saves energy in amazing ways! Solar heating panels warm up water for the kitchens and produce some electricity. The ceilings are made of glass so classrooms and halls get lots of sunshine. This cuts down lighting bills. Super-thick walls and thick window glass don't let heat escape. Desks are made from reused drainpipes and the plants on the roof protect the school from heat and cold. Rainwater is collected and used for the toilets. The most important part of the school is the 'Intersessional Heat Transfer' system. This system takes heat from the sunshine that falls on the playground and stores it in thermal banks in the ground underneath the school.

### **Best wishes**
