The tower reaches so high in the sky that people can see it from 95 km away. There are hotels, shops apartments, coffee shops and offices. It has the world's fastest elevator, which climbs 162 storeys, in just seconds. Not only is Burj Dubai the highest building in the world, this breathtaking tower reminds the world of the Middle East's wealth and success.

I am going to write about my charitable causes and fundraising. Fundraising means raising money or collecting clothes and food for poor countries and people. We have been helping to raise funds for the library this summer. We are helping to collect enough money to help the library to buy new computers. We are happy because our library is beautiful and has computers. In the future, I would really like to continue donating and helping needy people .I think being part of a fundraising activity shows how generous and helpful we are to each other. Charity is needed in our society nowadays, so we must encourage doing these works

Write an article about an imaginary experience at the airport.

When I arrived at the airport, I went to the check-in desk. I showed them the ticket and my passport. After that, I went to the security control then to the departure lounge. When I was at the gate, I showed them my boarding card to get on the plane. When I got off the plane, I went to the passport control. Then, I collected my bags at the baggage reclaim. I went through the customs. Finally, I left the airport through the gate and began my holiday.

Unit 12

Write a paragraph about an extreme thunderstorm

Thunder and lightning always go together because thunder is the sound that is made by lightning. This means that lightning is always followed by thunder. When a thunderstorm is a long way away, you see the lightning, but you might not hear the thunder. Thunderstorms happen more often in hot climates and more often in summer than in winter. The temperature of lightning is measured in degrees Celsius. Lightning is close to 30,000 degrees Celsius. When you see lightning, start counting one, two, three for each second. Continue counting until you hear thunder. Three seconds equals about one kilometre. So if you count to six, the storm is about two kilometers away. But if you only count one or two seconds before you hear thunder, the storm is very close. Take care

Write a paragraph about an eco-city.

I am going to talk about an eco-city. Buildings will have green roofs to protect them in summer and winter. Green roofs also help the building last longer by protecting them from the sun. Houses will be fitted with solar panels that will help provide electricity they need. Green spaces will be located all through the city. They are beneficial because they filter pollutants and dust from the air, they provide shade and lower temperatures and they even reduce erosion of soil into waterways. A metro will be put in place to make public transport easy and help reduce car emissions. Sewage will be recycled to produce water that is suitable for irrigating green areas and crops. All of these things will help to make a healthier environment to live in. I think it will be an amazing city.
