Read the following passage and answer the questions :

The LgNTEK is a company that produces VR headsets. Computing experts and software engineers from all over the world mainly want to work at the UAE branch of this organization because of its distinctive management style. It is because of this that the company receives more than a thousand job applications every day. The office building has several quiet rooms where the employees can go to relax. These rooms have interesting names such as 'artisan', 'heritage' and 'dhow journey' and these spaces create a relaxed and comfortable working environment.

The company culture includes several perks for the employees. These include a free breakfast and free drinks and snacks throughout the working day. Additionally, new parents receive paid maternity and paternity leave. The company is about to introduce a plan which means the employees can spend some time each week working on their own personal projects. The company ethos is that, if workers are happy, they will be more productive in their job.

Although the perks are important to the staff, one of the best things about working for LgNTEK is the large variety of fascinating jobs, such as a research engineer and 3D artist. All of the employees are able to participate in a new and exciting field of electronic engineering. Virtual reality (VR) is a computing idea that is years ahead of the technology that is available today. In order for someone to experience VR, they will need to wear a headset which creates a 3D virtual environment. In this way the user can experience the sights and sounds of a place, just as if they were real. However, there is still more work for the company to do on researching how to stimulate a user's sense of taste and smell.

Most people associate VR with video gaming but this technology has many other benefits to society. For example, airline companies use VR for flight simulation to train pilots. This technology can also be used by medical students, which is a safer way to train new doctors. Additionally, VR is used in education and learning. Students are able to interact with each other in a three-dimensional environment and it is even possible for them to go on a virtual school trip to a museum.

1-LgNTek's employment culture makes the company popular.

- a-True
- b-False
- c-Not given

2-The company perk that staff like the best is the free meals.

- a-True
- b-False
- c-Not given

3-There is a limited number of interesting jobs at LgNTek.

- a-True
- b-False
- c-Not given

4-These days, a VR user is less likely to experience sound than smell.

- a-True
- b-False
- c-Not given

5-VR technology has many positive uses for the community.

- a-True
- b-False
- c-Not given

Read the following passage and answer the questions :

Computers are machines that can help us in many ways. But they cannot think or do things on their own. Humans have to feed them with information and tell them what to do with it. They cannot come up with any new information. But they can save much time and work. For example, all the information and the office files can be stored in a computer's "memory". If a clerk were to trace any information from a particular file, the computer would only take seconds to find it. It would take a clerk days or even weeks to go through every file if no computers were used.

The first computers were huge and costly. They filled up almost the whole floor of large offices. Later, because of the usefulness and demand for computers in business, scientists soon found ways to produce cheaper and smaller computers. They invented chips which made it possible to store more information in less space.

Today, computers are not only cheaper, but also *more compact*. They can just be placed on top of an ordinary writing table. They can even be carried from place to place easily. Computers are not only used in offices by companies, but they are also used at home, by families who can afford them.

Robots, on the other hand, are not mechanical people. They are only moving parts controlled by a computer. A robot can do the same work for twenty-four hours, and yet, it does not complain or get tired. In the United States robots are computers that tell them where to guard and what to do. These robots are programmed to listen for certain noises and signals for help in case of trouble or danger.

In Japan and in some places in America, robots are used in factories to assemble cars. As computers become more common businesses and factories, people fear that one day computers and computer controlled robots will put human workers out of work

1-Why do humans have to feed the computers with information and tell them what to do ?

- (A) Because computers can save time and work.
- (B) Because computers cannot think or do things on their own.
- (C) Because computers can store office information in their memory.
- (D) Because computers can help us in many ways.

2.Why did the first computers fill up almost the whole floor ?

- (A) Because they were huge and costly.
- (B) because of the usefulness and demand for computers in businesses.
- (C) Because the office floor was small.
- (D) Because they were huge.

3.Find a word in the passage that has the same meaning as *more compact*.

- (A) Huge
- (B) Cheaper
- (C) Smaller
- (D) Costly

4.Which of the following statements in NOT TRUE ?

- (A) Robots are controlled by a computer.
- (B) Robots are mechanical people.
- (C) Robots do not get tired of working.
- (D) Robots guard factories and museums in the United States.

5.Humans fear that one day computers and robots

- (A) are busier than humans.
- (B) are cleverer than humans.
- (C) will make humans jobless.
- (D) will make humans listen to certain noise.

6.The BEST title for this passage would be

- (A) Computers and Robots
- (B) Old and New Computers

Maze questions:

Choose the correct answer:

To begin studying in this **{field – point – magazine}** in the United States, you must have first **{subject –degree- rank}**. In other parts of the world, like the Middle East, you don't have to have a first degree, you can start studying towards this career straight out **{in- -on –of}** high school. When you start work, you have to work very long hours and you have to read a lot about different cases, in various situations, **{so- in order to-that}** learn from different experiences. Although you work in an office most of the time, you sometimes have to **{arrive – left –attend}** court. An important part of the job is having strong social skills and the **{confidence- attraction – field}** to put across your points and opinion; you must show confidence when you're talking to the judge.

2-Complete the sentences with the words below. There is one extra word.

{architecture -environmentalists -smart –organic- energy efficient- automation- building contractors}

1-..... light bulbs do a great job lighting houses and actually use 25–80% less energy than regular ones.

2 -There's a campaign in my city to encourage people to use fewer plastic bags. It's organized by a group of

3 - I think more people are now aware of the dangers of processed and chemical products. Everyone wants to buyfood, building materials and even cleaning supplies.

4- Students doing an degree usually spend long hours designing buildings for their projects.

5 -have very stressful jobs; they have to manage big projects, which includes organizing construction site workers and building materials.

6 The of locking systems increases the security of your home.

3-Complete the sentences with the words below. There is one extra word.

{clerical - multitask - decade - harvesting - diminish - obsolete - consultant}

1- In order to..... successfully and work on different things at the same time, you must organize your material before you start.

2 -When it's fruit season, a lot of workers are needed to gather all the fruit before it goes bad.

3- I've been living here for around nine years, almost a..... !

4 -Public pay phones are almost..... because everyone has a mobile phone.

5 -We hired a..... to help us with our new project. He knows a lot about computers and should be able to give us some great advice.

6 -The new secretary needs to do work; typing letters, fling documents and arranging meetings.

4-Complete the sentences with the words below. There are two extra words.

{create - event -social media -wedding -launched -market -sharing}

1 When they..... their business, they only had five employees. They started as a really small company.

2 Teenagers are not the only ones using..... to post videos and pictures. The older generation is also using it to hear about news and connect with friends.

3 If you want to start a business, you need to study the..... and find out what people need.

4 I attended a(n) last week that was so well planned. The decoration, the food and the entertainment were all perfect.

5 You have to be careful whenyour personal information over social media. The wrong people might see it.

Read the following passage and mark true, false or Not given

Electric cars are not new on the roads and we have all heard about the benefits of 'green cars', such as cutting greenhouse gases. In fact, electric vehicles, or EVs, are 100 percent eco-friendly as they run on electrically-powered engines. They do not emit toxic gases or smoke, so they have a low impact on the environment because they run on clean sustainable energy. They are even better than hybrid cars, which typically consume petrol or diesel fuel and therefore produce harmful emissions. I think everyone should start driving electric cars as soon as possible because EVs are much quieter and greatly reduce noise pollution.

Even though electric cars have many advantages, some people still have worries about them. For example, they say that there are not enough electric fueling stations, so there is a real risk of running out of charge if they are on a long trip. Other arguments against the use of EVs are the high cost of electricity and their long recharge time. If electricity was cheaper, and fueling stations easier to find, more people would consider buying EVs. Also, since most of the electric cars on today's market are small and only seat two people, larger families may not find them suitable for their needs

1. The best thing about electric cars is that they reduce greenhouse gases.

a- True b-False c-Not given

2 According to the writer, driving electric cars is better than driving hybrid cars.

a-True b-False c-Not given

3. People do not worry about finding fueling stations for electric cars.

a- True b- False c-Not given

4. People like driving bigger cars.

a-True b-False c-Not give

How To Outline an Argumentative Essay in 4 Steps

Argumentative essays should have a straightforward structure so they are easy for readers to follow. The goal of an argumentative essay is to clearly outline a point of view, reasoning, and evidence. A good argumentative essay should follow this structure:

1. **Introductory paragraph.** The first paragraph of your essay should outline the topic, provide background information necessary to understand your argument, outline the evidence you will present and states your **thesis statement**.
2. **The thesis statement.** This is part of your first paragraph. It is a concise, one-sentence summary of your main point and claim.

3. **Body paragraphs.**

A typical argumentative essay comprises two or more paragraphs that explain the reasons why you support your thesis. Each body paragraph should cover a different idea or piece of evidence and contain a **topic sentence** that clearly and concisely explains why the reader should agree with your position.

* Address **opposing points** of view and disprove them or explain why you disagree with them. Presenting facts and considering a topic from every side .

- support each side with evidences and examples

4. **Conclusion.** One paragraph that restates your thesis and **summarizes all of the arguments** made in your body paragraphs. A good conclusion will appeal to a reader's emotions.

1-Write an argumentative essay about the advantages and disadvantages of **automated houses**.

1- reduce greenhouse effect

2- low impact on the environment

3- using robots

4- energy efficient

3-Young people share too much information on social media nowadays. Some people believe oversharing may lead to problems in their future and that sharing should be restricted. **To what extent do you agree or disagree?**

write an essay in your notebook answering this question.

1- waste time 2- acquire bad behavior 3- sharing personal details

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Introduction

- Overview of essay content
- Outline of how essay will be organized

Paragraph 1

- Idea supporting statement
- Reason

Paragraph 2

- Idea disagreeing with statement
- Reason

Conclusion:

- Summary of main points •

Your opinion

How To Outline an informative Essay in 3 Steps

The Introduction.

- Present the topic and grab your audience attention.
- Give some background information about the new topic
- Start with a general idea which gradually get more and more specific.
- Provide your thesis statement.

The Body.

- Provide all the necessary information and materials to your target audience
- Use various sources, facts and expert judgments
- Make sure all your facts are accurate.
- support each idea with examples and evidences.

The Conclusion.

- Restate about the seriousness of issue and summarize the facts.
- Never introduce some new information or ideas in the conclusion.
- The main purpose for your conclusion is to round off the essay by summing up

Have you used **full stops** correctly?

Have you used **capital letters** at the start of your sentences?

Does your sentence have **finger spaces** between each word?

a b c

Are all your letters the **right way round**?

Today I played football with my friends.

Does it **make sense**?

Wow!

Have you used **interesting words**?

Have you used **full stops** correctly?

A

Have you used **capital letters** at the start of your sentences?

Does your sentence have **finger spaces** between each word?

a b c

Are all your letters the **right way round**?

Today I played football with my friends.

Does it **make sense**?

Wow!

Have you used **interesting words**?

and

Have you used **conjunctions**?
